

JAIPUR NATIONAL UNIVERSITY

Jagatpura, Jaipur

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
B. Sc. Clinical Dietetics	BCD-101	Computer Fundamentals	2017-18	The course content provides skills related to the better understanding of computer hardware and software. Students will also be able to work on Microsoft Word, Excel and Powerpoint.
B. Sc. Clinical Dietetics	BCD-102	Fundamentals of Biochemistry	2017-18	Skills related to analyzing the sample qualitatively for different nutrients like carbohydrates, protein and nucleic acids. Students will also be able to have skilled training in operating laboratory instrument.
B. Sc. Clinical Dietetics	BCD-103	General Microbiology	2017-18	The activities and course content will provide skills related to General bacteriology and microbial techniques for isolation of pure cultures of bacteria, fungi and algae as well as better understanding of the causation factors and pathogens which are responsible for various diseases.
B. Sc. Clinical Dietetics	BCD-104	Basic Nutrition	2017-18	This course is designed to educate the students about nutrients, their food sources as well as their importance in maintaining healthy human life. So this course provides skills related to the planning and implementation of diet which is required to maintain the nutritional status of the community people.
B. Sc. Clinical Dietetics	BCD-105	Basic Dietetics	2017-18	The skills related to the planning of different types of hospital diets, modified diets for different life style disorders will be provided by the course content.
B. Sc. Clinical Dietetics	BCD-106	Professional Communication Skills	2017-18	This course enables the students to speak English, including the abilities to express their feelings with proper vocabulary and pronunciation. This course design also intends to guide students in achieving their career and lifelong goals by exhibiting balanced professional attitude in every walk of life.
B. Sc. Clinical Dietetics	BCD-107P	General Microbiology Lab	2017-18	The course content will enable the students to understand different approaches to isolate sub-cellular molecules/organelles and technicalities of microbial cultures, counting and staining methods, physiological analysis under microscope.
B. Sc. Clinical Dietetics	BCD-108P	Fundamentals of Biochemistry Lab	2017-18	The students will be able to handle different analytical instruments as well as analysis of food sample qualitatively for carbohydrates, protein and nucleic acids.
B. Sc. Clinical Dietetics	BCD-201	Clinical Nutrition	2017-18	This course provides skill related to therapeutic diet planning to the students which will help them to set up their private Diet Clinics as well as they can work as a Clinical Nutritionist in the Hospitals.
B. Sc. Clinical Dietetics	BCD-202	Vitamins And Mineral Nutrients	2017-18	The course content will provide detail regarding micronutrients like vitamins and Minerals, their food sources as well as role in body metabolism and human health. These will enable students to plan dietary guidelines for the patients seeking nutritional advice.
B. Sc. Clinical Dietetics	BCD-203	Basic Molecular Biology	2017-18	This course will extend understanding of the molecular mechanisms via which genetic information is stored and expressed. So course will provide skill related to basic techniques used in genetic engineering.

(Prof. D K Maheshwari)
 Registrar
 Jaipur National University
 Jaipur

B. Sc. Clinical Dietetics	BCD-204	Family Meal Management	2017-18	This course enables students to adopt skills related to meal planning according to the requirement of different age groups which ensures their future as a Meal Planner for Family.
B. Sc. Clinical Dietetics	BCD-206	Human Anatomy and Physiology II	2017-18	Skills related to assessment of Blood pressure, Heart Rate, Pulse, Respiration Rate, Body Temperature, recording of electrocardiogram, Blood Group, Complete Blood Count, Radial pulse and Arterial pulse using sphygmograph.
B. Sc. Clinical Dietetics	BCD-209P	Human Anatomy and Physiology I Lab	2017-18	Skills related to assessment of Blood pressure, Heart Rate, Pulse, Respiration Rate, Body Temperature, recording of electrocardiogram, Blood Group, Complete Blood Count, Radial pulse and Arterial pulse using sphygmograph.
B. Sc. Clinical Dietetics	BCD-301	Therapeutic Nutrition	2017-18	This course provides skill related to planning a diet for chronic diseases to the students which will help them to set up their private Diet Clinics as well as they can work as a Dieticians in the Hospitals.
B. Sc. Clinical Dietetics	BCD-302	Nutritional Biochemistry	2017-18	This course enables the students to get skills related to estimation of different components in urine and blood and their diagnostic significance for various health conditions
B. Sc. Clinical Dietetics	BCD-303	Community Nutrition	2017-18	This course provides knowledge and skills related to nutritional assessment of the community people which will provide employability in government funded projects, Non-Government Organizations and may involve in the other research work for community Health and Nutrition.
B. Sc. Clinical Dietetics	BCD-304	Food Commodities I	2017-18	This Course will provide skills related to processing of different food commodities including cereals, pulses, nuts, oilseeds, vegetables and fruits.
B. Sc. Clinical Dietetics	BCD-306P	Therapeutic Nutrition Lab	2017-18	After this course, students will able to plan and prepare different therapeutic diets which is responsible for the nutritional management of diseased person and students will also able to plan suggest different therapeutic recipes for Nutritional Deficiency Disorders
B. Sc. Clinical Dietetics	BCD-307P	Community Nutrition Lab	2017-18	Students will get the skills related to the nutritional assessment of the community people and development of different audio-visual aids for the nutrition education and Nutritional Awareness
B. Sc. Clinical Dietetics	BCD-309P	Nutritional Biochemistry Lab	2017-18	From this course, students will get practical knowledge about estimation techniques used for sugar such as glucose, fructose, maltose and lactose. Students will also able to estimate different components in urine and blood
B. Sc. Clinical Dietetics	BCD-401	Food Microbiology, Sanitation And Hygiene	2017-18	Students will able to perform preservation techniques of different food commodities as well as quality control measures and strategies in food systems.
B. Sc. Clinical Dietetics	BCD-403	Food Preservation	2017-18	This course provides skill related to different food preservation techniques which will help the students for establishment of their own set up for manufacturing of Processed Food.
B. Sc. Clinical Dietetics	BCD-404	Preventive Nutrition	2017-18	This course enables students to formulate preventive and curative measure in context with nutrition to solve community health problems which will provide them opportunity to formulate programs and policies with government policy makers.
B. Sc. Clinical Dietetics	BCD-406P	Food Microbiology Lab	2017-18	After completion of this course, students will able to prepare nutrient media, sterilization and inoculation techniques, identification of food pathogen in water, milk, cereals, pulses, oilseeds, meat and poultry and microbial examination of natural food products

 (Prof. D. K. Mathur)
 Registered
 Jaipur National University
 Jaipur

B. Sc. Clinical Dietetics	BCD-407P	Food Commodities Lab	2017-18	The students will acquire analytical skills about physiochemical and rheological properties of cereals, testing of physical and quality parameters for different food commodities and analysis of quality of water used in industries for different purpose
B. Sc. Clinical Dietetics	BCD-408P	Food Preservation Lab	2017-18	This course will enables students to develop different food products by using different types of Food Preservatives
B. Sc. Clinical Dietetics	BCD-501	Food Fortification	2017-18	This course provides skill related to different food fortification techniques which will help the students for establishment of their own set up for manufacturing of enriched, fortified and value added food products like cereal, beverages etc.
B. Sc. Clinical Dietetics	BCD-502	Food Toxicology and Safety	2017-18	Students will be able to identify food safety hazards and their controlling measures and explain the role of food hygiene and effective food handling in day to day life. This course will provide the skills related to apply a range of food quality systems and prepare a food safety plan
B. Sc. Clinical Dietetics	BCD-503	Food Adulteration	2017-18	Students will able to determine different adulteration, additives, colorants and sweeteners and toxins present in the food
B. Sc. Clinical Dietetics	BCD-504	Food Service Management	2017-18	This is basically entrepreneurship skill development course which enables students to set their own food service establishment.
B. Sc. Clinical Dietetics	BCD-505	Research Methodology and Statistics	2017-18	Students will develop the skill of independent thinking for critically analyzing and writing research reports. This course enables them to choose the right statistical technique to be used with the research method and to understand when to apply which statistical procedure.
B. Sc. Clinical Dietetics	BCD-506P	Food Analysis Lab	2017-18	The student will have a in hand experience about the principles, methods, and techniques of qualitative and quantitative physical, chemical and biochemical analyses of foods.
B. Sc. Clinical Dietetics	BCD-507P	Food Service Management Lab	2017-18	After completion of this course, students will have all the skills required to stablish a food service institutions and related aspects.
B. Sc. Clinical Dietetics	BCD-602	Nutrition in Special Conditions	2017-18	Students will able to plan specific nutritional guidelines during some specific conditions like high performance diet during different sports activity, nutrition in zero gravity for astronauts, nutrition during trekking and on higher altitudes, nutriton for military persons during their military operations etc

JAIPUR NATIONAL UNIVERSITY

Jagatpura, Jaipur

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
B. Sc. Medical Lab Technology	BMLT-102	Basic Biochemistry-I	2017-18	The course contents empowers the students with skill of antocoagulants preparation, It also provides the knowledge of cell structure & functioning, blood formation, identification of blood cells in peripheral blood smears and mechanism of cell injury.
B. Sc. Medical Lab Technology	BMLT-103	General Microbiology	2017-18	The course contents enriches the student with ability to prepare buffer solutions, solutions of different strength and cleaning of the glasswares. The students become familiar to the basic components of balanced diet, BMR etc.
B. Sc. Medical Lab Technology	BMLT-104	Basic Pathology-I	2017-18	This course provides knowledge about history of microbes, bacterial morphology, culture media, methods of cultivation of bacteria, growth and nutrition of bacteria & Structure and characteristics of virus, fungi & protozoa. It also provides the skill of sterilization and disinfection of objects.
B. Sc. Medical Lab Technology	BMLT-105	Human Anatomy & Physiology-I	2017-18	Students will have structural & functional concept of locomotion & support, digestive system, excretory system, endocrinal system, muscular system and sensory organs. It also provides the concept of the pathophysiology of diseases associated with these body systems of human.
B. Sc. Medical Lab Technology	BMLT-106	*Professional Communication Skills	2017-18	This course enables the students to speak English, including the abilities to express their feelings with proper vocabulary and pronunciation. This course design also intends to guide students in achieving their career and lifelong goals by exhibiting balanced professional attitude in every walk of life.
B. Sc. Medical Lab Technology	BMLT-107P	General Microbiology Lab.	2017-18	This course skills the students to prepare the 1% sodium hypochlorite for discarding infectious material, various anticoagulant containers for blood collection, make blood smears and their staining for identification of various blood cells.
B. Sc. Medical Lab Technology	BMLT-108P	Basic Biochemistry-I Lab.	2017-18	This course enables the students to use glasswares & equipments, prepare the various solutions, buffers. The students also learn to perform diffusion, osmosis and dialysis.
B. Sc. Medical Lab Technology	BMLT-110P	Basic pathology-I Lab.	2017-18	This course makes the students skilled in using microscope, sterilising the lab objects, culturing and staining the microbes for their identification.
B. Sc. Medical Lab Technology	BMLT-111P	Human Anatomy & physiology-I lab	2017-18	Through this course, students will learn to perform clinical examination to GIT and muscle bulk, identify the human bones, tissue morphology of salivary gland, oral cavity, GIT, muscles & kidney of the human. Students will also learn to assess muscle reflex, nerve conduction.
B. Sc. Medical Lab Technology	BMLT-201	Basic Pathology-II	2017-18	This course enriches the students with knowledge of hemoglobinometry, hemocytometry, ESR, PCV, Bone marrow examination, pathology of inflammation, neoplasia and disturbance of body fluids.
B. Sc. Medical Lab Technology	BMLT-202	Basic Biochemistry-II	2017-18	This course provides the knowledge of transport of biomolecules across the membrane, chemistry of carbohydrates/lipids/proteins/nucleic acid/enzymes.

B. Sc. Medical Lab Technology	BMLT-203	Microbial Techniques	2017-18	Through this course, students will learn about different microscopy, microbial staining techniques, biochemical tests for bacterial identification, antibiotic sensitivity test and automaion in the clinical microbiology.
B. Sc. Medical Lab Technology	BMLT-204	Human Anatomy & Physiology-II	2017-18	This course provides the theoratical concept of vardiovascular system, reproductive system, respiratory system, nervous system, body fluids, body temperature etc. Students will also learn the pathophysiology of diseases associated with boso systems.
B. Sc. Medical Lab Technology	BMLT-205P	Practical 1 (Basic Pathology-II)	2017-18	This course skills the students to measure the hemoglobin, count the blood cells, determine the ESR/PCV and identify the tumor cells.
B. Sc. Medical Lab Technology	BMLT-206P	Practical 2 (Basic Biochemistry-II)	2017-18	Through this course, students will be able to perform qualitative determination carbohydrates/lipids/proteins etc.
B. Sc. Medical Lab Technology	BMLT-207P	Practical 3 (Microbial Techniques)	2017-18	This course will make the students able to perform staining, biochemical test, motility test, antibiotic sensitivity test and isolation of bacteria in pure culture.
B. Sc. Medical Lab Technology	BMLT-208P	Practical 4 (Human Anatomy & Physiology-II)	2017-18	By this course, students will be able to measure the pulse, BP, heart rate, body temperature. Students will also able to perform blodd group determination, ECG, clincal examination of respiratory system, cardiovascular system, motor nerve system, respiratory movement etc.
B. Sc. Medical Lab Technology	BMLT-301	Clinical Hematology	2017-18	This course will learn about the hemostasis and associated disorders, anaemia, hemoglobinopathy, leucocytes abnormalities, hematological malignancies, special hematological tests and use of radioisotopes in hematology.
B. Sc. Medical Lab Technology	BMLT-302	Metabolic & Blood Biochemistry	2017-18	Studetns will learn about the metabolism of carbohydrates, lipid and protein & associated disorders . This course provides the concept of mechanism & diagnosis of diabetes, cholesterol & liproprotein disorders and renal function test.
B. Sc. Medical Lab Technology	BMLT-303	Bacterial Pathogens & Associated Diseases	2017-18	By this course, students will have the knowledge of microflora of human body, bacterial toxins. Students will also learn about the morphology, pathgenesis & laboratory diagnosis of pathogenic bacteria & spirochetes, pathigenesis and laboratory diagnosis of bacterial diseases.
B. Sc. Medical Lab Technology	BMLT-304	Immunology	2017-18	This course provides the theoratical concept of immunity, cell & organes of immune system, complement system, humoral & cell mediated immunity, Ag-Ab reactions and their mearurment.
B. Sc. Medical Lab Technology	BMLT-305	Preventive Medicine & Health Care	2017-18	Through this course, students will learn about water, air and noise pollution, infection & control, hygien & sanitation, bacteriological examination of water & food, milk, epidemiology, prophylacsis immunization, health proframme in india and introduction of nursing.
B. Sc. Medical Lab Technology	BMLT-306P	Practical 1 (Clinical Hematology)	2017-18	By this course, students learn to perform tests for diagnosis of bleeding disorders, anaemia, hematological malignancies, hemoglobinopathies and osmotic fragility test.
B. Sc. Medical Lab Technology	BMLT-307P	Practical 2 (Metabolic & Blood Biochemistry)	2017-18	This course skills the students to perform test for lipid profile, diagnosis and monitoring of diabetes, serum electrolyte concentration, renal function analysis.

(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

B. Sc. Medical Lab Technology	BMLT-308P	Practical 3 (Bacterial Pathogens & Associated Diseases and Immunology)	2017-18	Through this course, students learn to perform test for isolation, identification of bacteria from biological samples. Students also learn to perform immunological test like immunodiffusion, hemagglutination & flocculation etc. and the tests for diagnosis of typhoid, UTI, TB, leprosy, syphilis and other bacteriological diseases.
B. Sc. Medical Lab Technology	BMLT-401	Histopathological Techniques	2017-18	In this course, students will learn about the histopathological specimens and their fixation, decalcification, tissue processing, section cutting, stain & staining of histopathological specimens, mounting and museum techniques.
B. Sc. Medical Lab Technology	BMLT-402	Biochemical & Biophysical Techniques	2017-18	Through this course, students learn about the techniques like autoanalyser, spectroscopy, flame photometry, chromatography, electrophoresis, blood cell counter, ELISA, RIA, PCR, CLIA and ABG gas analyzer.
B. Sc. Medical Lab Technology	BMLT-403	Pathogenic Viruses	2017-18	This course provides the knowledge about the morphology, classification, cultivation & replication of viruses, and methods of diagnosis of viral diseases. Students also learn about the pathogenic viruses and the diseases caused by them.
B. Sc. Medical Lab Technology	BMLT-404	Clinical Pathology	2017-18	By this course, students will have knowledge of analysis of urine, stool, semen and other body fluids that help them in diagnosis of diseases. The students also learn about the role & techniques of pre-natal diagnosis and in-vitro fertility test.
B. Sc. Medical Lab Technology	BMLT-405P	Practical 1 (Histopathological Techniques)	2017-18	This course makes the students able to perform fixation, decalcification, tissue processing, section cutting of the histopathological specimen. Students will also be able to perform various staining procedure, mounting of the histopathological smears.
B. Sc. Medical Lab Technology	BMLT-406P	Practical 2 (Biochemical & Biophysical Techniques)	2017-18	In this course, students will perform tests for estimation of the metabolite concentration in the blood. Students also perform advance techniques like ELISA, PCR, electrophoresis, chromatography etc for detection, separation and estimation of various compound in the biological samples
B. Sc. Medical Lab Technology	BMLT-407P	Practical 3 (Pathogenic Viruses)	2017-18	Through this course, students will be able to perform serological tests, CFT, isolation of viruses in chick embryonated egg for diagnosis of viral infection.
B. Sc. Medical Lab Technology	BMLT-408P	Practical 4 (Clinical Pathology)	2017-18	This course skills the students to perform various tests in urine, stool and body fluids. The students become able to know the procedures of amniocentesis, CVS and IVF.
B. Sc. Medical Lab Technology	BMLT-501	Blood Banking & Transfusion Medicine	2017-18	This course provides the theoretical & clinical concept of human blood group system, blood transfusion guideline, donor selection & donor blood collection, antibody & TTI screening in donor blood, blood component separation, donor - recipient compatibility testing, blood transfusion reaction and apheresis.
B. Sc. Medical Lab Technology	BMLT-502	Diagnostic Enzymes & Vitamins	2017-18	In this course, students will learn about enzymes inhibition, methods of estimation & significance of isoenzymes in various diseases. It also provides the knowledge about methods of estimation & role of vitamins, electrolyte in the various diseases.
B. Sc. Medical Lab Technology	BMLT-503	Clinical Mycology	2017-18	This course provides the knowledge about characteristics of fungi & fungal spore, Common laboratory diagnosis of mycoses. Students also learn about morphology, life cycle, culture characteristics, pathogenesis, infection with clinical feature and laboratory diagnosis of Subcutaneous Mycoses, Systemic Mycoses, Opportunistic Mycoses.

(Prof. D.R. Mathur)
Registrar
Jaipur National University
Jaipur

B. Sc. Medical Lab Technology	BMLT-504	Biostatistics & Computer Fundamentals	2017-18	This course provide knowledge about variable & data, Measure of central tendency, Measure of Variability, Probability and Standard Distributions, Correlation & Regression, Analysis of variance & covariance and sampling. Students will learn about basics of computer, MS office, internet, LAN etc.
B. Sc. Medical Lab Technology	BMLT-505P	Practical 1 (Blood Banking & Transfusion Medicine)	2017-18	This course skills the students to perform test for blood grouping, donor-recipient cross matching, antibody & trnsfusion transmitted infection screening. The students also learn to perform donor screening, blood component separation and apharesis.
B. Sc. Medical Lab Technology	BMLT-506P	Practical 2 (Diagnostic Enzymes & Vitamins)	2017-18	Students will learn to perform tests for estimation of serum enzymes & vitamins concentration, diagnosis of liver, cardiac, muscle, bone and pancreatic diseases.
B. Sc. Medical Lab Technology	BMLT-507P	Practical 3 (Clinical Mycology)	2017-18	Students will learn to prepare culture media, perform staining and culture of fungus for their identification. This course provides the knowledge perform tests for dianosis of fngal diseases from biological specimens.
B. Sc. Medical Lab Technology	BMLPR508P	Practical 4 (Computer Fundamentals)	2019-20	This course provides knowledge to perform work on work, excell, powerpoint. Students also become able to use internet, LAN etc.
B. Sc. Medical Lab Technology	BMLT-601	Histo & Cytopathological Techniques	2017-18	Through this course, students will learn about methods for cytological studies in disease condition, demonstration of the biomelecules, microbes, enzymes in the tissues. It also provides the knowledge about cytogenetics about and advance techniques like flowcytometry, IHC, FISH and tissue culture.
B. Sc. Medical Lab Technology	BMLT-602	Hormones & Disorders	2017-18	This course provides concept of mechanism of action, metabolic & clinical effects of hormones. Students will learn about the pathogenesis, clinical features and lab diagnosis of hormonal disorders.
B. Sc. Medical Lab Technology	BMLT-603	Clinical Parasitology	2017-18	This course enrich the studetns with knowledge of properties, classification, methods of etection of the parasites. Students will also learn about life cycle, pathogenesis and laboratory diagnosis of the parasitic infection.
B. Sc. Medical Lab Technology	BMLT-604	Research Methodology	2017-18	This course provide the knowledge about Research and Literature, Research methodology, research design, research problems, Measurement & scaling techniques, methods of data collection.
B. Sc. Medical Lab Technology	BMLT-606P	Practical 1 (Histo & Cytopathological Techniques)	2017-18	Through this course, students bcome able to perform various staining of the carbohydrate, lipid, nucleic acid in the tissues, FNAC and cytological samples. Students will learn to perfrom IHC, FISH, karyotyping, LCB techniques for diagnosis of the diseases.
B. Sc. Medical Lab Technology	BMLT-607P	Practical 2 (Hormones & Disorders)	2017-18	This course provides knowledge to perform test for estimation of hormones in the serum, demonstration of the stimulation test, thyroid function test, infertility test for diagnosis of the various endocrinal and non-endocrinal diseases.
B. Sc. Medical Lab Technology	BMLT-608P	Practical 3 (Clinical Parasitology)	2017-18	Through this course, studetns will lerarn to perfrom ELISA and rapid test, blood, stool and body fluid examination for identification of parasites and dagnosis of the parasitic infections.
B. Sc. Medical Lab Technology	BMLT-701	Immunopathology	2017-18	In this course, studetns will learn about hypersensitivity, autoimmune disease, HLA system & its role in transplantaion, introduction to the stem cell and diagnostic molecular pathology.

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
B.Com Pass	BCPFA102	Financial Accounting	2018-19	Preparation of Financial Statements
B.Com Pass	BCPES501E	Entrepreneurship & Skill Development	2017-18	Prepare a B-Plan in five lakh rupees
B.Com Pass	BCPEN106	English	2018-19	Notice board activity
B.Com Pass	BCPIC511E	Indian Constitution	2018-19	Role Play on Fundamental Rights & Duties
B.Com Pass	BCPAM502E	Advertising Management	2018-19	Ad Mad activity, Radio Jingles
B.Com Pass	BCPAA603E	Advance Accounting	2018-19	Preparation of Banking Companies Accounts
B.Com Pass	BCPRM613E	Research Methods	2018-19	Designing the questionnaire , preparation of a research report
B.Com Pass	BCPQT604E	Quantitative Techniques	2016-17	Solving business problems through LPP model
B.Com Pass	BCPOB510E	Organization Behavior	2018-19	Team Building / group development skill
B.Com Pass	BCPSA508E	Security Analysis and Portfolio Management	2018-19	Building a Portfolio as Entrepreneur
B.Com Pass	BCPTD505E	Training & Development	2018-19	Role Play of trainer
B.Com Pass	BCPLS406E	Leadership Skills and Change Management	2018-19	Leadership Style skills
B.Com Pass	BCPMS504E	Management of Service	2018-19	Designing the promotional mix for a hospital
B.Com Pass	BCPFR610E	Financial Reporting	2018-19	Reporting of Public financial statements
B.Com Pass	BCPGS606E	Goods & Service Tax	2018-19	Computation of GST input
B.Com Pass	BCPIR611E	Industrial Relations	2018-19	Role Play of Collective Bargaining & Worker Participation
B.Com Pass	BCPOM507E	Operations Management	2018-19	Location Planning of owning restaurant
B.Com Pass	BCPPD307E	Personality Development	2018-19	SWOT analysis exercise
B.Com Pass	BCPPB612E	Product & Brand Management	2018-19	Identification of Brand -Quiz and brand building exercises
B.Com Pass	BCPFR305	French	2018-19	Quiz on English to French
B.Com Pass	BCPHI206	Hindi	2018-19	Writing an application seeking leave

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
B.Sc Hons Mathematics	BMHDC101	Differential Calculus	2018-19	Maxima minima, and Lagrange's method of undetermined coefficient helps in prediction of various constraints in field of defence, engineering and logistics. Knowledge of differentiability, libnitz and Euler theorem, concavity and convexity trains the student in CURVE SKETCHING
B.Sc Hons Mathematics	BMHAG102	Algebra	2018-19	Foundation and practice of vast knowledge of functions, its types and properties. Skill development of division algorithm, calculation of higher order GCD and LCM. Knowledge of solving higher order word problems using matrix transformation. Calculation of rank and dimension using vector algebra
B.Sc Hons Mathematics	BMHOP103	Object oriented programming in C++	2018-19	Training students in Programming in C language and c++ and simulation in the subject
B.Sc Hons Mathematics	BMHES104	Environmental Sciences	2018-19	The course will prepare the students toward various national level entrance exams of general awareness such as Indian civil services and Indian forest services etc. (such as laws for environmental protection, conservation of biodiversity)
B.Sc Hons Mathematics	BMHPR105	Practical-I : Object Oriented Programming in C++ Lab	2018-19	training to operate windows (MS Word, MS Excel, MS Power point), along with c and c++ programming
B.Sc Hons Mathematics	BMHRA201	Real Analysis I	2018-19	calucation and understanding on limit continuity and differentiability. Problem solving on expansion of series using Taylor and Maclaurin theorem.
B.Sc Hons Mathematics	BMHRA202	Differential Equations	2018-19	Imparts direct formulation techniques for general, particular, explicit, implicit and singular solution of a differential equation. Also lesson on types of first and second order ordinary and partial differential equation. Derivation of heat, wave and laplace equations. Classification of second order linear equations
B.Sc Hons Mathematics	BMHMF203	Mathematical finance	2018-19	Lays significance on the finance aspect of mathematics like risk aversion, arbitrage, inflations etc. Also gives a deep understanding of asset return and maintainance, two find method, and pricing models.
B.Sc Hons Mathematics	BMHEC204	English communication	2018-19	Training students to speak and write with propriety and effectiveness and argue in a positive manner for group discussuion and personal interview
B.Sc Hons Mathematics	BMHRA301	Real Analysis II	2018-19	Deep and critical analysis of Real numbers, its properties , principles and various named theorem like Bolzano weirtrass theorem, nested interval theorem and mean vslue theorems
B.Sc Hons Mathematics	BMHPD302	Partial Differential Equation	2018-19	problem solving ability for first order partial differential equation. Applying method of separation of variable. Solving the vibrating string problem and heat conduction problem.brief knowledge on successive differentiation- Euler's method, Modified Euler's methos and Runge Kutta method

(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

B.Sc Hons Mathematics	BMHRI303	Riemann Integration and series of function	2018-19	Basic knowledge of integrability and understanding of Riemann functions. Introduction to improper integrals and convergence of beta gamma functions. Understanding of powerseries, radius of convergence
B.Sc Hons Mathematics	BMHVC305	vector calculus	2018-19	Analysis of scalar point function and vector point function along with the utility of gradient and curl. Knowledge of various integrals- line integral, surface integrals and volume integrals. Also Greens theorem and Gauss divergence theorem
B.Sc Hons Mathematics	BMHMC401	Multivariate Calculus	2018-19	Skill enhancement in area and volume calculation of rectangular regions, parallelopiped and other solid regions. Deep understanding of Greens' theorem, Stokes theorem and the divergence theorem.
B.Sc Hons Mathematics	BMHAG402	Algebra II	2018-19	Providing insight on pure mathematical aspects of Group theory, Ring theory and Number theory including named theorems- Lagranges' theorem, Euler theorem, Fermat little theorem, euclidean algorithm etc.
B.Sc Hons Mathematics	BMHAA404	Applications of Algebra	2018-19	Provides insight on techniques of balanced incompleteblock design, coding theory, color patterns, LDU pattern
B.Sc Hons Mathematics	BMHCM404	Combinatorial Mathematics	2018-19	Working on counting principles, stirling numbers, inclusion exclusion principle, generating functions, recurrence relation models. Use of Polya's theorem of counting,necklace problem, burnsidess lemma
B.Sc Hons Mathematics	BMHOS405	Opererating System: Linux	2018-19	understand the utility of Operating System, Linux commands which encourage student to learn LINUX Operating System
B.Sc Hons Mathematics	BMHPR406	Practical-I : Opererating System: Linux Lab	2018-19	Working on system process, Ext2 and Ext3 file systems. system calls for files Process Management, Signals, IPC: Pipes, FIFOs, System V IPC, Message Queues, system calls for processes
B.Sc Hons Mathematics	BMHGT502	Group Theory	2018-19	Providing insight on pure mathematical aspects of Group theory, Sylow groups and their application
B.Sc Hons Mathematics	BMHLP503	Linear Programming	2018-19	Skill enhancement for tabular calculation of real life maxima minima problems. utility of optimization in programming. the concept of duality is used in various computer programming. the transportation and assignment problem bears relevance to various industrial diploma.
B.Sc Hons Mathematics	BMHNT503	Number Theory	2018-19	Used in coding and decoding of the Legendre symbol and its properties, quadratic reciprocity, quadratic congruences with composite moduli. Public key encryption, RSA encryption and decryption, the equation $x^2 + y^2 = z^2$, Fermat's Last theorem.
B.Sc Hons Mathematics	BMHPS504	Probability and Statistics	2018-19	A relevant course useful for data analyst and share brokerage. the theme of the subject involves various calculation methods for prediction of profit and losses.
B.Sc Hons Mathematics	BMHNM601	Numerical Method	2018-19	Training in basic concepts of numerical data solution by various estimating method like Regular falsi Runge kutta, Simpsons method.
B.Sc Hons Mathematics	BMHMM603	Mathematical Modeling	2018-19	Create variables and other abstractions to solve college-level mathematical problems in conjunction with previously-learned fundamental mathematical skills such as algebra;
B.Sc Hons Mathematics	BMHME604	Mechanics	2018-19	The physicist, the motor engineers utilise the mathematical aspect of moment, laws of conservation. the mathematical calculation of named theorem like Theorem of Pappus-Guldinus, Chasles' theorem

(Prof. D K Mathur)

B.Sc Hons Physics	BPHWO101	Waves and Optics	2018-19	Training in measurement of small displacements, refractive index changes, total internal reflection, application of Standing Waves as Audible Information in Hypertension Therapy.
B.Sc Hons Physics	BPHPR105	Wave and Optics Lab	2018-19	After successfully completing this laboratory, students are eligible to jobs in LASER based companies, jobs in production and research department. The students are capable to answer the term constructive and destructive interference, optical Sensors, Methen gas sensors and etc.
B.Sc Hons Physics	BPHAS102	Analog Systems and Applications	2018-19	Training students on integrated Circuits makes the students employable in electronic companies dealing with hardware.
B.Sc Hons Physics	BPHPR106	Analog Systems and Applications Lab	2018-19	Hands on training in connecting multi-meter to measure total current, analysis of analog and digital signal via oscilloscope and use of function generator, calibrate the oscilloscope make the student employable in electronics research labs.
B.Sc Hons Physics	BPHOP103	Object Oriented Programming in C++	2018-19	Students aquire knowledge of OOPs concepts like Polymorphism which provide security and apply in website development, software development, and developing of mobile apps. students are eligible and giving prference for getting selection in pharmaceutical industries, it industries and statistical departments.
B.Sc Hons Physics	BPHPR107	Generic Elective Lab: Object Oriented Programming in C++ Lab	2018-19	Student get training in programming language called C++ that help them to analyze problems and implement simple C++ applications and also OPPS concepts like Polymorphism which provide security to the data make the student employable in jobs such as software engineering, Computer operator, Programmer etc.
B.Sc Hons Physics	BPHPC103	Physical Chemistry I: States of Matter & Ionic Equilibrium	2018-19	Acquired the knowledge in theory and practicals to determine acidity, Basicity and Pka value , pH and beffer souldtion and role of indicators, applied in academics and industries.
B.Sc Hons Physics	BPHPR107	Generic Elective Lab: Physical Chemistry I: States of Matter & Ionic Equilibrium Lab	2018-19	students got the knowledge of buffer solutions and preparation and conductometric tiration share this experience in drug analysis in Industry and academic.
B.Sc Hons Physics	BPHAL103	Algebra-I	2018-19	Foundation and practice of vast knowledge of functions, its types and properties. Skill development of division algorithm, calculation of higher order GCD and LCM. Knowledge of solving higher order word problems using matrix transformation. Calculation of rank and dimension using vector algebra
B.Sc Hons Physics	BPHE104	Environmental Science	2018-19	Training students to understand and spread awareness about the environmental problems involving interaction of humans and natural systems at local or global level make the student get job in environmentalists in the near future.
B.Sc Hons Physics	BPHME201	Mechanics	2018-19	We train and develop effective instructional materials to enhance student abilities in understanding simple harmonic motion in term of multiple representations and collision process can be represented in multiple representations, such as verbal, visual, graph, and mathematical.

(Prof. D.K. Mathur)
Registrar
Jaipur National University

B.Sc Hons Physics	BPHPR205	Mechanics Lab	2018-19	Training the student in Bar pendulum whibending properties of beam, rigidity of metal wires and RPM setting of rotating bodies useful in civil and mechanical engineering. Training the student using the sextant useful in civil engineering
B.Sc Hons Physics	BPHDS202	Digital System and Applications	2018-19	Here students get theoritical appoach on Filp-flops a, counters, registers and applicationof CRO, number conversion suchs as digital to binary is a highly employable course and student can find work in many areas, including the electronics, automotive, IT, telecoms, manufacturing, power, transport, utilities and construction industries.
B.Sc Hons Physics	BPHPR206	Digital System and Applications Lab	2018-19	Students know about the different types of made from large assemblies of logic gates XOR / XNOR used as parity checker, representations of Boolean logic functions which helps them for employment in various sector mainly as Electrical Engineers/ Technician/ Electronic & Communication Engineers, Software engeneer and also it have wide employability in goverment projects, in research field.
B.Sc Hons Physics	BPHDP203	Data Structure and File Processing	2018-19	Concept of data structures, like stack, queue, linklist, trees, graphs in this student get training in how data store/update/retrive and are helpful in placement drives of the IT industries, software development companies.
B.Sc Hons Physics	BPHPR207	Data Structure and File Processing Lab	2018-19	Skill development in use of data structures, like stack, queue, linklist, trees, graphs in this student get training in how data store/update/retrive and are helpful in placement drives of the IT industries, software development companies.
B.Sc Hons Physics	BPHDE203	Differential Equation	2018-19	Imparts direct formulation techniques for general, particular, explicit, implicit and singular solution of a differential equation. Also lesson on types of first and second order ordinary and partial differential equation. Derivation of heat, wave and laplace equations. Classification of second order linear equations
B.Sc Hons Physics	BPHPC203	Physical Chemistry –II Chemical Thermodynamics & its Applications	2018-19	Students can involved n the process already there and they can be performed the duties with greate care and cautions they can understand very quickly if any thing going wrong and even should be able to take corrective measures to minimize the loss.
B.Sc Hons Physics	BPHPR207	Generic Elective Lab: Physical Chemistry –II Chemical Thermodynamics & its Applications Lab	2018-19	The thermodynamic analysis of heat of reaction provide opportunity in basic and applied research and also work in power plants sectors.
B.Sc Hons Physics	BPHEN204	English/MILCommu nication)	2018-19	Training students to speak and write with propriety and effectiveness and argue in a positive manner for group discussuon and personal interview.
B.Sc Hons Physics	BPHTP301	Thermal Physics	2018-19	Student get trained in low temperature production study also introduce mechanism of liquification of gases, working of steam, heat engines which help them in get employment in Atomic Power Industries and Nuclear Power Plant gas industries, thermal power plants, hydropower plants.

B.Sc Hons Physics	BPHMP302	Mathematical Physics I	2018-19	Student train in solving ordinary and partial differential equations of second order that are common in the physical sciences and vector analysis in solving physical problems which helps them in getting expert in all fields.
B.Sc Hons Physics	BPHPR307	Mathematical Physics I Lab	2018-19	This subject help the student to get practical knowledge that imparts conceptual base for general, particular, explicit, implicit and singular solution of a differential equation.
B.Sc Hons Physics	BPHEM303	Electricity and magnetism	2018-19	We introduce our students in scalar and vector fields of electric field also involve them in in the activity of how to calculate the capacitance of cylindre makes them to get jobs in Electrician, Audio and Video Equipment Technicians, Electric Home Appliance and Power Tool Repairer.
B.Sc Hons Physics	BPHPR308	Electricity and Magnetism Lab	2018-19	Student get trained in electron produce magnetic field and spinning magnet cause an electric current to flow, and are integral to the working of nearly every gadget, appliance, vehicle, machine used.
B.Sc Hons Physics	BPHPR307	Mechanical Drawing	2018-19	Training in produce drawings and plans for a wide range of fields that provide students visual aids and blueprints for construction and factory workers, engineers and architects.
B.Sc Hons Physics	BPHCP304	Computational Physics skills	2018-19	Training in various crystal structure like atomic structure, crystal structure in form of computational design engineering and also provide detail study to realte thoretical and experimental techniques which help student to get employment in computational design operator.
B.Sc Hons Physics	BPHRE304	Renewable Energy and Energy Harvesting	2018-19	We train our student in the mechanism of water energy, solar energy and wind energy, also explain about chiep, environment friendly energy which help them in getting involving turbine operation.
B.Sc Hons Physics	BPHID305	Introduction to Database Systems	2018-19	Training in relational data model, database systems. Formulation using SQL, solutions to a broad range of query and data update problems..
B.Sc Hons Physics	BPHPR309	Generic Elective Lab: Introduction to Database Systems Lab	2018-19	Skill enhancement in developing and handle large databases and applicable in various IT sector and pharma industries.
B.Sc Hons Physics	BPHDP305	Partial Differential Equation	2018-19	problem solving ability for first order partial differential equation. Applying method of separation of variable. Solving the vibrating string problem and heat conduction problem.brief knowledge on successive differentiation-Euler's method, Modified Euler's methos and Runge Kutta method
B.Sc Hons Physics	BPHPC305	Physical Chemistry –III: Phase Equilibria & Chemical Kinetics	2018-19	Students gain the knowledge of kinetic and phase equilibria. And applied their knowledge in ores and alloys industries.
B.Sc Hons Physics	BPHPR309	Generic Elective Lab: Physical Chemistry –III: Phase Equilibria & Chemical Kinetics Lab	2018-19	Students gain the knowledge of kinetic and phase equilibria and applied their knowledge in ores and alloys industries.
B.Sc Hons Physics	BPHEM401	Elements Of Modern Physics	2018-19	Training in basic knowledge of physics and correlate classical and quantum concept, introduce laser by which we can introduce our student to determine cell structure of Ruby laser, CO2 laser He-Ne laser which makes student to get jobs in medical technical technition.

B.Sc Hons Physics	BPHSS402	Solid state physics	2018-19	Training student study the crystal structure of materials, mechanism transistors and require using X-ray crystallography, neutron diffraction, and electron diffraction which provide student to get employment as Silicon Design Engineer, Technical assistant in labs.
B.Sc Hons Physics	BPHMP403	Mathematical Physics II	2018-19	Introduce the various applications in functional analysis as in Holomorphic functional calculus for several sectorial operators acting in Banach space and is useful in jobs related to electrostatics.
B.Sc Hons Physics	BPHEC404	Electrical Circuit Networking Skills	2018-19	Here the student get trained in design the circuits that serve as the foundation for these products, they may modify existing designs or create new designs because circuit technology is constantly changing, which help in getting various government job Circuit Designer Engineer, Electrical operator, government sector job.
B.Sc Hons Physics	BPHWF404	Weather Forecasting	2018-19	Students get trained to apply their ideas in the the field of Environmental scientists, Storm Chaser, Climatologist, Meteorologist
B.Sc Hons Physics	BPHRS404	Radiation Safety	2018-19	Students are able to perform and evaluate radiation, X-ray, and electromagnetic field measurements. Students are able to assist clients with CNSC license applications, radiation safety protocols and manuals; produce technical reports; participate in scientific and technical meetings
B.Sc Hons Physics	BPHJP405	Java Programming	2018-19	We train our students skills like OOPs concept like data encapsulation, data hiding, polymorphism, inheritance, programming language that help them to analyze problems and implement simple JAVA applications and and providing security to the data , providing jobs such as software engineering.
B.Sc Hons Physics	BPHPR409	Java Programming Lab	2018-19	Training in programming language java help students to ready to work in software industries. and gives you a chance to work at the cutting edge of mobile development. It's a wonderful leg-up into the industry.
B.Sc Hons Physics	BPHOC405	Organic III: Heterocyclic Chemistry	2018-19	Students gained the knowledge of synthesis of heterocyclic compounds and good knowledge of reaction mechanism and predict the products. In pharmaceutical industries , got the position and will used his knowledge and perform his duties care and cautions.
B.Sc Hons Physics	BPHPR409	Organic III: Heterocyclic Chemistry Lab	2018-19	Student trained to Systematic Qualitative Organic Analysis of Organic Compounds, monofunctional group (-COOH, phenolic, aldehyde, ketonic, amide, nitro & amines) and preparation of one derivative , provide employability in researches, in synthesis of organic compounds and their detection in industries as chemist.
B.Sc Hons Physics	BPHAL405	Algebra-II	2018-19	Providing insight on pure mathematical aspects of Group theory, Ring theory and Number theory including named theorems- Lagranges' theorem, Euler theorem, Fermat little theorem, euclidean algorithm etc.
B.Sc Hons Physics	BPHMP501	Mathematical Physics -III	2018-19	Training students to solve basic classical vibrational problems, received basic training in tensor calculus and how to simplify them using coordinate transformations, which help in understanding projectile mapping which makes student to get employment as projectile mapping operator.

(Prof. D. K. Mahapatra)
Registrar
Jaipur National University
Jaipur

B.Sc Hons Physics	BPHSM502	Statistical Mechanics	2018-19	Student get train in fundamental study of any physical system that has many degrees of freedom and the approach is based on statistical methods, probability theory and microscopic physical laws and can get employment in various sectors such as economics, medicine, demography, psychology, advertising, etc.
B.Sc Hons Physics	BPHE503	Experimental Techniques	2018-19	Scientific laboratory technicians carry out the work that allows scientists to concentrate on, and perform, the more complex analytical processes in the laboratory which get involved in a variety of laboratory-based investigations within biological, chemical, physical and life science areas.
B.Sc Hons Physics	BPHDS503	Digital Signal Processing	2018-19	Signal Processing Plays a Key Role in Multiple Industries: Signals are used to transmit information in nearly every imaginable field. They are used extensively in what will likely be a high-growth industry in years to come: health care. Signal processing is essential for the use of X-rays, MRIs and CT scans, allowing medical images to be analyzed and deciphered by complex data processing techniques.
B.Sc Hons Physics	BPHCE503	Communication Electronics	2018-19	Student get platform for learning not only theory but also practical aspects of electronics and communication engineering involving in qualitative idea GPS navigation system.
B.Sc Hons Physics	BPHPR507	Communication Electronics Lab	2018-19	Here students get theoretical approach on Flip-flops a, counters, registers and application of CRO, number conversion such as digital to binary is a highly employable course and student can find work in many areas, including the electronics, automotive, IT, telecoms, manufacturing, power, transport, utilities and construction industries.
B.Sc Hons Physics	BPHNP504	Nuclear and Particle Physics	2018-19	Training in radioactivity, alpha decay, beta decay /, gamma decay etc found in a variety of career fields, such as energy and nuclear power. The most prominent careers in this field include nuclear power station operator/technician
B.Sc Hons Physics	BPHMP504	Medical Physics	2018-19	Provide qualitative knowledge regarding how ionising radiation interacts with matter, how it affects living organisms and how it is used as a therapeutic technique which involve student in therapeutic technique assistant.
B.Sc Hons Physics	BPHPR508	Medical Physics Lab	2018-19	We train student how to use CT Scan, ECG, Laser techniques, sphygmomanometer that provide student technical support in hospital, work as demonstrator and medical sales executive etc.
B.Sc Hons Physics	BPHQM601	Quantum Mechanics and Application	2018-19	Student get the idea about the nature and behavior of matter, provide quantum computational knowledge energy on the atomic and subatomic level an essential knowledge for the jobs in sectors requiring large scale behavior, get jobs in Quantum software programmer.
B.Sc Hons Physics	BPHPR605	Quantum Mechanics and Application Lab	2018-19	Student able to relate theoretical and practical idea in Zeeman effect, there by showing the hyperfine structure, tunneling effect which helps student in getting lab technician jobs.
B.Sc Hons Physics	BPHET602	Electromagnetic Theory	2018-19	Student get trained in the field of Electromagnetics (EM) deals with electromagnetic fields and detailed study of interdependent electric and magnetic fields are varying with time, that is, they are dynamic involve student in engineering disciplines to design complex electromechanical systems.

B.Sc Hons Physics	BPHET606	Electromagnetic Theory Lab	2018-19	The student trained in divesces such multimeter and how to measure AC and DC voltage which help to get jobs as a, Signal processing engineer, Manufacturing operator, Electromagnetic engineer.
B.Sc Hons Physics	BPHNM603	Nano Materials and Applications	2018-19	We train our student in scope and application of nanotechnology such as XRD technique, SEM, TEM and CNT is tremendous and stupendous which help them in getting jobs in medicine, pharmaceuticals, information technology, electronic, optoelectronics, energy, chemicals, advanced materials to textiles, nanotechnology has its applications.
B.Sc Hons Physics	BPHPR607	Nano Materials and Applications Lab	2018-19	We train our student in Experimental techniques like XRD, SEM, TEM etc, CNT and preparing thin films helps them to analyse the study of size, shape, stability and determining crystal structure which involve student in Hologram and Optics Technician.
B.Sc Hons Physics	BPHPE603	Physics of Earth	2018-19	Student get qualitative skills related to the structure and evolution of the Earth as a dynamic planet within our solar system
B.Sc Hons Physics	BPHAS603	Astronomy & Astrophysics	2018-19	Here we student get a qualitative knowledge of stellar evolution, including red giants, supernovas, neutron stars, pulsars, white dwarfs and black holes, using evidence and presently accepted theories which help student to work in weather forecasting.
B.Sc Hons Physics	BPHAP604	Atmospheric Physics	2018-19	Here we student get a qualitative knowledge of stellar evolution, including red giants, supernovas, neutron stars, pulsars, white dwarfs and black holes, using evidence and presently accepted theories which help student to work in weather forecasting.
B.Sc Hons Physics	BPHAP608	Atmospherical Physics Lab	2018-19	Students are able to work in weather stations, offices, or laboratories. Occasionally, they do have to do some fieldwork, which means working outdoors to examine the weather.
B.Sc Hons Chemistry	BCHPC-102	Physical I: States of Matter & Ionic Equilibrium	2019-20	Students gained the good knowledge of practidl to prepare standard solutions, and titration which are widely used in the food industryand chemical industries.
B.Sc Hons Chemistry	BCHPP-106	Physical I: States of Matter & Ionic EquilibriumLab	2019-20	Acquired the knowledge in theory and practicals to determine acidity, Basicity and Pka value , pH and beffer souldtion and role of indicators, applied in academics and industries.
B.Sc Hons Chemistry	BCHOC-103	Object Oriented Programming in C++	2019-20	students got the knowledge of buffer solutions and preparation and conductometric tiration share this experience in drug analysis in Industry and academic.
B.Sc Hons Chemistry	BCHCP-107	Object Oriented Programming in C++ Lab	2019-20	Students aquire knowledge and apply in website development,software development, and developing of mobile apps.
B.Sc Hons Chemistry	BCHES-104	Environmental Studies	2019-20	students are eligible and giving prference for getting selection in pharmaceutical industries, it industries and statistical departments.
B.Sc Hons Chemistry	BCHOC-201	Organic I: Basics & Hydrocarbons	2019-20	The course will prepare the students toward various national level entrance exams of general awareness such as Indian civil services and Indian forest services etc. (such as laws for environmental protection, conservation of biodiversity)
B.Sc Hons Chemistry	BCHOP-205	Organic I: Basics & Hydrocarbons LAB	2019-20	Students understands the concppts of organic chemistry , reaction mechanism. The knowledge of organic reactions and capable of organic mechanism to predict the product and applie this knowledge in academic and industries.

B.Sc Hons Chemistry	BCHPC-202	Physical II: Chemical Thermodynamics & its Applications	2019-20	Students learn the technique chromatography use to purification the organic mixture and determination of melting point and boiling point and beneficial in academic and industries.
B.Sc Hons Chemistry	BCHPP-206	Physical II: Chemical Thermodynamics & its Applications LAB	2019-20	Students can involved n the process already there and they can be performed the duties with greate care and cautions they can understand very quickly if any thing going wrong and even should be able to take corrective measures to minimize the loss.
B.Sc Hons Chemistry	BCHDA-203	Data Structures and File Processing	2019-20	The thermodynamic analysis of heat of reaction provide opporonty in basic and applied research and also work in power plants sectors.
B.Sc Hons Chemistry	BCHSPR-207	Data Structures and File Processing LAB	2019-20	Concept of data structures, like stack, queue, linklist, trees, graphs in this student get training in how data store/update/retrieve and are helpful in placement drives of the IT industries, software development companies.
B.Sc Hons Chemistry	BCHEC-204	English communication	2019-20	Skill development in use of data structures, like stack, queue, linklist, trees, graphs in this student get training in how data store/update/retrieve and are helpful in placement drives of the IT industries, software development companies.
B.Sc Hons Chemistry	BCHIC-301	Inorganic II: s- and p-Block Elements	2019-20	Training students to speak and write with propriety and effectiveness and argue in a positive manner for group discussuion and personal interview
B.Sc Hons Chemistry	BCHIP-306	Inorganic II: s- and p-Block Elements LAB	2019-20	Students acuire the knowledge of non transition elements (p block element) used knowledge in semiconductors and fertilizers industries.
B.Sc Hons Chemistry	BCHOC-302	Organic II: Oxygen Containing Functional Groups	2019-20	Students acuire the knowledge of non transition elements (p block element) theory and practical will used this knowledge in semiconductors and fertilizers industries.
B.Sc Hons Chemistry	BCHOP-307	Organic II: Oxygen Containing Functional Groups LAB	2019-20	Students aquire knowledge of functional groups tranformation, reaction mechanism, . Good camand on organic reaction and mechanism and capable of writing of writing the mechanism and predict the prodycets. In their professional life either industries, higher education or research. They can perform the duities with great care and caution they can understand very quickly.
B.Sc Hons Chemistry	BCHPC-303	Physical III: Phase Equilibria & Chemical Kinetics	2019-20	Students gained the knowledge of organic chemistry, synthesis Good cammond on mechanism and organic reaction and also predict the products. Acquired the ability to synthesis and characterize compounds using laboratory instrument technique or in industries.
B.Sc Hons Chemistry	BCHPP-308	Physical III: Phase Equilibria & Chemical Kinetics LAB	2019-20	Students gain the knowledge of kinetic and phase equilibria. And applied their knowledge in ores and alloys industries.
B.Sc Hons Chemistry	BCHDS-305	Introduction to Database Systems	2019-20	Students gain the knowledge of kinetic and phase equilibria and applied their knowledge in ores and alloys industries.
B.Sc Hons Chemistry	BCHDP-309	Introduction to Database Systems LAB	2019-20	Training in relational data model, database systems. Formulation using SQL, solutions to a broad range of query and data update problems..
B.Sc Hons Chemistry	BCHCI-304	Chemoinformatics	2019-20	Skill enhancement in developing and handle large databases and applicable in various IT sector and pharma industries.
B.Sc Hons Chemistry	BCHIP-304	Intellectual Property Rights	2019-20	CADD (Computer aided drug designing) makes student employable in Pharmaceutical Industries, IT companies related to Drug development like Bioviva and Schrodinger

(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

B.Sc Hons Chemistry	BCHAB-304	Analytical Clinical Biochemistry	2019-20	Training students about the concept of IPR like patent, copyright, trademark will make them innovators in the field of agriculture and other technologies
B.Sc Hons Chemistry	BCHIC-401	Inorganic III: Coordination Chemistry	2019-20	Train the students to identify various molecules for particular pathological condition and their estimation. Students are able to analysis of different pathological samples of blood and urine. Make them employable in assistant in medical laboratory and research institutes.
B.Sc Hons Chemistry	BCHIP-406	Inorganic III: Coordination Chemistry LAB	2019-20	To provide the knowledge of synthesis of coordination compounds. In industries, they can be involved in process already there and perform the duties with great care and caution.
B.Sc Hons Chemistry	BCHOC-402	Organic III: Heterocyclic Chemistry	2019-20	Students learnt the formation of transition metal complexes and used his knowledge in medicinal and pharmaceutical industries.
B.Sc Hons Chemistry	BCHOP-407	Organic III: Heterocyclic Chemistry LAB	2019-20	Students gain the knowledge of synthesis of heterocyclic compounds and good knowledge of reaction mechanism and predict the products. In pharmaceutical industries, got the position and will used his knowledge and perform his duties care and cautions.
B.Sc Hons Chemistry	BCHPC-403	Physical IV: Electrochemistry	2019-20	Student trained to Systematic Qualitative Organic Analysis of Organic Compounds, monofunctional group (-COOH, phenolic, aldehyde, ketonic, amide, nitro & amines) and preparation of one derivative, provide employability in researches, in synthesis of organic compounds and their detection in industries as chemist.
B.Sc Hons Chemistry	BCHPP-408	Physical IV: Electrochemistry LAB	2019-20	Students learnt the functions of electrical batteries and knowledge of corrosion protection and used knowledge in manufacturing cells and batteries and also gain knowledge and apply in corrosion protection.
B.Sc Hons Chemistry	BCHCN-405	Java Programming	2019-20	Students learn the functions of electrical batteries and knowledge of corrosion protection and used knowledge in manufacturing cells and batteries and also gain knowledge and apply in corrosion protection.
B.Sc Hons Chemistry	BCHNP-409	Java Programming LAB	2019-20	Java is the main development language for Android. This alone gives Java a huge advantage in commercial terms – and gives you a chance to work at the cutting edge of mobile development. First-time jobseekers might not be ready to work on an investment bank's infrastructure written in Java, but they ought to be ready to tinker with apps. It's a wonderful leg-up into the industry.
B.Sc Hons Chemistry	BCHPH-404	Pharmaceutical chemistry	2019-20	Training in programming language java help students to ready to work in software industries. and gives you a chance to work at the cutting edge of mobile development. It's a wonderful leg-up into the industry.
B.Sc Hons Chemistry	BCHCC404	Chemistry of cosmetics and perfumes	2019-20	Students have good knowledge of synthetic organic chemistry and reaction mechanism and screening of biological activity of synthesized compounds. In pharmaceutical industries, they absorbed and involved and performed their duties with care.
B.Sc Hons Chemistry	BCHPT-404	Pesticides chemistry	2019-20	train the students for preparation and chemistry involved with the production different cosmetic. Students to take up entry level jobs at cosmetics industry or venture into commercial production of cosmetics as an entrepreneur

(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

B.Sc Hons Chemistry	BCHF-404	Fuel Chemistry	2019-20	Students will be able to examine different types of pesticides, their activity/toxicity provide job opportunity in chemical and pesticide industries to synthesize and examine quality of natural products.
B.Sc Hons Chemistry	BCHOC-501	Organic IV: Biomolecules	2019-20	Students are trained to determine industrially significant physical parameters for fuels and lubricants make employable in different coal and petroleum industries
B.Sc Hons Chemistry	BCHOP-505	Organic IV: Biomolecules LAB	2019-20	Gain the knowledge of Amino acids, peptides, proteins and pharmaceutical compounds chemistry and also understand good laboratory practices and scope in biotech industries and pharmaceutical industries and also apply in Genome and protein sequence.
B.Sc Hons Chemistry	BCHPP-502	Physical V: Quantum Chemistry & Spectroscopy	2019-20	Gain the knowledge of Amino acids, peptides, proteins and pharmaceutical compounds chemistry and also understand good laboratory practices and scope in biotech industries and pharmaceutical industries and also apply in Genome and protein sequence.
B.Sc Hons Chemistry	BCHPP-506	Physical V: Quantum Chemistry & Spectroscopy LAB	2019-20	In the synthetic organic chemistry, the synthesized compounds have been confirmed by spectral studies and students have good command on spectroscopy used for spectral study structural elucidation.
B.Sc Hons Chemistry	BCHAC-504	Analytical Methods in Chemistry	2019-20	In the synthetic organic chemistry, and inorganic chemistry (Transition metal complexes formation) and the synthesized compounds have been confirmed by spectral studies and students have good command on spectroscopy used for spectral study structural elucidation. Also handling the instruments (UV-vis, FTIR, NMR, Mass). Students will get the position in instrumental section in organization.
B.Sc Hons Chemistry	BCHAP-507	Analytical Methods in Chemistry LAB	2019-20	Students are well verse in Analytical chemistry in theory as well as practical and learn the handling instruments. This knowledge will be advantageous in industries.
B.Sc Hons Chemistry	BCHIE-503	Industrial chemicals and environment	2019-20	Students well versed with the instruments handling such UV-vis, FTIR, GC & GC-MS that will be beneficial in industries.
B.Sc Hons Chemistry	BCHCP-506	Industrial chemicals and environment LAB	2019-20	Skill development in synthesis of industrial important chemicals, metallurgy process, Production, storage and handling of industrially important gases open job aspects for students in chemical industries
B.Sc Hons Chemistry	BCHII-503	Inorganic Materials of Industrial Importance	2019-20	Training in synthesis of industrial important chemicals and testing the presence of harmful chemicals and oxygen demand in effluents discharged from the industries will fetch a job in chemical production industries and environmental monitoring
B.Sc Hons Chemistry	BCHMP-506	Inorganic Materials of Industrial Importance Lab	2019-20	training the students in different techniques of manufacturing glass, ceramics, cement employed in Silicate Industries. Students are familiar with fertilizers and their Manufacturing. Students are able to preliminary treatment of surface, classification of surface coatings, Working of batteries, Manufacture of Steel, which make them employable in industries in which part of vehicle manufactured.
B.Sc Hons Chemistry	BCHPY-504	Polymer chemistry	2019-20	Training students to determination of estimation of different fertilizers and analysis of cement property which make employable in cement and fertilizer industries

(Prof. D.K. Mathur)
Registrar
Jaipur National University
Jaipur

B.Sc Hons Chemistry	BCHPP-507	Polymer chemistry Lab	2019-20	training in crystallization, molecular weight determination , glass transition temperature determination give job opportunity in the motor-manufacturing and related supply- and service-industries such as the paint, tyre and plastic-component industries.
B.Sc Hons Chemistry	BCHIC-601	Inorganic IV: Organometallic Chemistry	2019-20	Training the students in synthesis and analysis of polymers by different instrumental techniques provide job opportunity as chemist in polymer industries.
B.Sc Hons Chemistry	BCHIP-605	Inorganic IV: Organometallic Chemistry LAB	2019-20	Training synthesis of organometilic compounds for industrial importance as catalyst, which serve to alter the rate of chemical reaction and certain complex formations and play a key role in production of polyethylene and polypropylene in industries.
B.Sc Hons Chemistry	BCHOC-602	Organic V: Spectroscopy	2019-20	Training in synthesis of organometilic compounds used in industry as catalyst and play a key role in production of polyethylene and polypropylene in industries.
B.Sc Hons Chemistry	BCHOP-606	Organic V: Spectroscopy LAB	2019-20	Skill development in synthesis of organic dyes and Polymers important for jobs in Chemical industries
B.Sc Hons Chemistry	BCHMD-603	Molecular Modelling & Drug Design	2019-20	Skill development in spectroscopic techniques used for identification, estimation and detection of organic compounds in industries and laboratory will make students employable in different sectors.
B.Sc Hons Chemistry	BCHMP-607	Molecular Modelling & Drug Design LAB	2019-20	Skill development in molecular modelling, Molecular docking, Molecular dynamic Simulation and drug design with chemistry finds job scope in various KPOs
B.Sc Hons Chemistry	BCHGC-603	Green Chemistry	2019-20	Skill development in molecular modelling, Molecular docking, Molecular dynamic Simulation and drug design with chemistry finds job scope in various KPOs
B.Sc Hons Chemistry	BCHGP-607	Green Chemistry Lab	2019-20	train student in green Chemistry synthesis and Designing a Chemical synthesis and they get knoweledge in different chemical reaction involving in synthesis of green chemistry products make them employable in pharmaceutical and different chemical industries as chemist.
B.Sc Hons Chemistry	BCHRM-604	Research Methodology for Chemistry	2019-20	Students are train in Preparation of bio-products, functioning of Biocatalysis in heavy organic synthesis of green chemistry provide job areas in Innovative medicines , Fuels technology chemist.
B.Sc. Hons Biotechnology	BBTPM401	Phylogenetic and Molecular Evolution	2019-20	students should be able develop skills into construct a rational research proposal to generate fruitful output in terms of publications, literature review and patents in the field of chemical sciences.
B.Sc. Hons Biotechnology	BBTSB401	Structural Biology	2019-20	Training on MEGA and Phylip for Phylogeenetic tree construction and analysis makes the student employable for KPO (Knowledge Processing Organizations) and research industries
B.Sc. Hons Biotechnology	BBTFD503	Food and Dairy Microbiology	2019-20	Skill development in visualizing nucleic acid and protein structures helps in locating target sites and inferring underlying mechanism of action.
B.Sc. Hons Biotechnology	BBTBP503	Biopharmaceutical	2019-20	Training the students in various dairy product synthesis like ice creams, yogurt, skimmed milk, cheese, cream will pave the way for various jobs in Dairy industry. Also, working knowledge of various fermentation process like alcoholic beverages, pickling, bread baking, vinegar production open the door for students in various food processing industries.

B.Sc. Hons Biotechnology	BBTPH603	Public Health and hygiene	2019-20	Skill enhancement in drug manufacturing process and phases of clinical trials of pharmaceutical products makes the individual employable in Pharmaceutical companies
B.Sc. Hons Biotechnology	BBTBN603	Basic nutrition	2019-20	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc. Hons Bioinformatics	BBIBI401	Biophysics and Instrumentations	2019-20	Training in causes of malnutritions and relation of nutrition to various diseases will make the students employable as qualified health worker
B.Sc. Hons Bioinformatics	BBIPH603	Public health and hygiene	2019-20	training in principle, components, optical path and application of different types of spectroscopic, microscopic, radioactivity measuring instruments centrifugation, electrophoresis, conductometry, potentiometry and chromatographic techniques which is required in research, industries and medical field.
B.Sc. Hons Bioinformatics	BBIBN603	Basic Nutrition	2019-20	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc. Hons Microbiology	BMBPM401	Phylogenetics and Molecular Evolution	2019-20	Training in causes of malnutritions and relation of nutrition to various diseases will make the students employable as qualified health worker
B.Sc. Hons Microbiology	BMBSB401	Structural Bioinformatics	2019-20	Training on MEGA and Phylip for Phylogenetic tree construction and analysis makes the student employable for KPO (Knowledge Processing Organizations) and research industries
B.Sc. Hons Microbiology	BMBBP503	Bioprocess Engineering	2019-20	Skill development in visualizing nucleic acid and protein structures helps in locating target sites and inferring underlying mechanism of action.
B.Sc. Hons Microbiology	BMBBP503	Biopharmaceutical	2019-20	Downstream processing, broth processing, effluent treatment, aerobic and anaerobic slug treatment process, fermentation economics useful in biotech based production industries.
B.Sc. Hons Microbiology	BMBH603	Public Health and hygiene	2019-20	Skill enhancement in drug manufacturing process and phases of clinical trials of pharmaceutical products makes the individual employable in Pharmaceutical companies
B.Sc. Hons Microbiology	BMBBN603	Basic nutrition	2019-20	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc. Hons Biochemistry	BBCBE-604	Bioprocess Engineering	2019-20	Training in causes of malnutritions and relation of nutrition to various diseases will make the students employable as qualified health worker
B.Sc. Hons Biochemistry	BBCSB-401	Structural Biology	2019-20	Downstream processing, broth processing, effluent treatment, aerobic and anaerobic slug treatment process, fermentation economics useful in biotech based production industries.
B.Sc. Hons Biochemistry	BBCPM-401	Phylogenetics and Molecular Evolution	2019-20	Skill development in visualizing nucleic acid and protein structures helps in locating target sites and inferring underlying mechanism of action.
B.Sc. Hons Biochemistry	BBCNB-603	Industry relations and Entrepreneurship	2019-20	Training on MEGA and Phylip for Phylogenetic tree construction and analysis makes the student employable for KPO (Knowledge Processing Organizations) and research industries

B.Sc. Hons Biochemistry	BBCHH-603	Public Health and Hygiene	2019-20	Training the students in steps in planning, Organizing, staffing and directing and controlling as an entrepreneur.
B.Sc Hons Physics	BPHPR306	Thermal Physics Lab	2018-19	training in principle, components, optical path and application of different types of spectroscopic, microscopic, radioactivity measuring instruments centrifugation, electrophoresis, conductometry, potentiometry and chromatographic techniques which id required in research, industries and medical field.
B.Sc Hons Physics	BPHPR406	Elements Of Modern Physics Lab	2018-19	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc Hons Physics	BPHPR407	Solid State Physics Lab	2018-19	Training in causes of malnutritions and relation of nutrition to various diseases will make the students employable as qualified health worker
B.Sc Hons Physics	BPHPR408	Mathematical Physics II Lab	2018-19	Training on MEGA and Phylip for Phylogeneetic tree construction and analysis makes the student employable for KPO (Knowledge Processing Organizations) and research industries
B.Sc Hons Physics	BPHBP504	Biological Physics	2018-19	Skill development in visualizing nucleic acid and protein structures helps in locating target sites and inferring underlying mechanism of action.
B.Sc Hons Physics	BPHPR505	Mathematical Physics -III Lab	2018-19	Downstream processing, broth processing, effluent treatment, aerobic and anaerobic slug treatment process, fermentation economics useful in biotech based production industries.
B.Sc Hons Physics	BPHPR506	Statistical Mechnics Lab	2018-19	Skill enhancemnet in drug manufacturing process and phases of clinical trials of pharmaceutical products makes the individual employable in Pharmaceutical companies
B.Sc Hons Physics	BPHPR507	Experimental Techniques Lab	2018-19	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc Hons Physics	BPHCD604	Classical Dynamics	2018-19	Training in causes of malnutritions and relation of nutrition to various diseases will make the students employable as qualified health worker
B.Sc Hons Chemistry	BCHIC101	Inorganic I:Atomic Structure & Chemical Bonding-I	2019-20	Training the students in steps in planning, Organizing, staffing and directing and controlling as an entrepreneur.
B.Sc Hons Biotechnology	BBTCS504	Cell Signalling	2019-20	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc Hons Biotechnology	BBTCB505	Cancer Biology	2019-20	training in principle, components, optical path and application of different types of spectroscopic, microscopic, radioactivity measuring instruments centrifugation, electrophoresis, conductometry, potentiometry and chromatographic techniques which id required in research, industries and medical field.
B.Sc Hons Biotechnology	BBTED604	Entrepreneurship and skill development	2019-20	Training in preventive measures for various Communicable diseases, Non-communicable diseases, Nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker

B.Sc Hons Biotechnology	BBTIR604	Intellectual Property Rights	2019-20	Training in causes of malnutrititions and relation of nutrition to various diseases will make the students employable as qualified health worker
B.Sc Hons Bioinformatics	BBIPE401	Protein Engineering	2019-20	Training on MEGA and Phylip for Phylogenetic tree construction and analysis makes the student employable for KPO (Knowledge Processing Organizations) and research industries
B.Sc Hons Bioinformatics	BBIMI503	Medical Informatics	2019-20	Skill development in visualizing nucleic acid and protein structures helps in locating target sites and inferring underlying mechanism of action.
B.Sc Hons Bioinformatics	BBINN503	Neural Networks	2019-20	Downstream processing, broth processing, effluent treatment, aerobic and anaerobic slug treatment process, fermentation economics useful in biotech based production industries.
B.Sc Hons Bioinformatics	BBICY504	Cancer Biology	2019-20	Skill enhancement in drug manufacturing process and phases of clinical trials of pharmaceutical products makes the individual employable in Pharmaceutical companies
B.Sc Hons Bioinformatics	BBICS504	Cell Signaling	2019-20	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc Hons Bioinformatics	BBIED604	Entrepreneurship and skill development	2019-20	Training in causes of malnutrititions and relation of nutrition to various diseases will make the students employable as qualified health worker
B.Sc Hons Bioinformatics	BBIIR604	Intellectual Property Rights	2019-20	Downstream processing, broth processing, effluent treatment, aerobic and anaerobic slug treatment process, fermentation economics useful in biotech based production industries.
B.Sc Hons Microbiology	BMBCB504	Cancer Biology	2019-20	Skill development in visualizing nucleic acid and protein structures helps in locating target sites and inferring underlying mechanism of action.
B.Sc Hons Microbiology	BMBCS504	Cell Signalling	2019-20	Training on MEGA and Phylip for Phylogenetic tree construction and analysis makes the student employable for KPO (Knowledge Processing Organizations) and research industries
B.Sc Hons Microbiology	BMBED604	Entrepreneurship and skill development	2019-20	Training the students in steps in planning, Organizing, staffing and directing and controlling as an entrepreneur.
B.Sc Hons Microbiology	BMBIR604	Intellectual Property Rights	2019-20	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc Hons Biochemistry	BBCBE503	Bioenergetics	2019-20	Training the students in steps in planning, Organizing, staffing and directing and controlling as an entrepreneur.
B.Sc Hons Biochemistry	BBCDB503	Developmental Biology	2019-20	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc Hons Biochemistry	BBCIB504	Infection Biology	2019-20	Training the students in steps in planning, Organizing, staffing and directing and controlling as an entrepreneur.
B.Sc Hons Biochemistry	BBCNB504	Cancer Biology	2019-20	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
B.Sc Pass Course PCM	BPMWO101	Wave and Optics	2018-19	Skill developmental in determination of DO, alkalinity, acidity, hardness and chlorine content of given water sample makes them skilled at water chemistry required for environmental and toxicological testing.
B.Sc Pass Course PCM	BPMPR105	Wave and Optics Lab	2018-19	Training in measurement of small displacements, refractive index changes, total internal reflection, application of Standing Waves as Audible Information in Hypertension Therapy.
B.Sc Pass Course PCM	BPMAH102	Atomic Structure, Bonding, General Organic Chemistry & Aliphatic Hydrocarbons	2018-19	After successfully completing this laboratory, students are eligible to jobs in LASER based companies jobs in production and research department. The students are capable to answer the term constructive and destructive interference, optical Sensors, Methen gas sensors and etc.
B.Sc Pass Course PCM/CBZ	Chem-101	Chemistry I: Physico-Inorganic Chemistry-I	2016-17	Detection and analysis of Functional groups in organic compounds, purification by crystallization and production of Ni-Dimethyl glyoxime and methyl orange.
B.Sc Pass Course CBZ	Bot-103	Diversity of microbes	2016-17	Train and develop skill to identification and synthesis of new compound by applying the concept of chemical bond formation and atomic structure of compounds which is provide employability in research and development area in different industries.
B.Sc Pass Course CBZ	Bot -104	Diversity of cryptogams	2016-17	Skill development in identifying diseased plants, based on visual symptoms, single cell proteins production will help in improving commercial agriculture.
B.Sc Pass Course CBZ	Zoo -105	Biodiversity I - Protozoa to Annelida	2016-17	Skill development in identifying fungal diseased plants, based on visual symptoms, will help in agriculture.
B.Sc Pass Course CBZ	PCS-107	Professional Communication Skills*	2016-17	Training the students about characteristics and classification of protozoans such as Amoeba proteus, Plasmodium vivax etc will fetch jobs in public health sector. Skill development in Vermicomposting technique will help in self sustainance in agriculture.
B.Sc Pass Course PCM/CBZ	Chem -108	Practical - I	2016-17	Training the students to speak and write with propriety and effectiveness and argue in a positive manner for group discussion and personal interview
B.Sc Pass Course CBZ	Bot -109	Practical - II	2016-17	Technique of purification by sublimation and determination of melting point and boiling point used for the identification and separation of compounds in pharmaceutical industries.
B.Sc Pass Course CBZ	Zoo -110	Practical - III	2016-17	Training the students to differentiate gram positive and negative bacteria through gram staining procedure and identification, characterization and pathogenic role of different microbes like bacteria, cyanobacteria and fungi on plants through permanent slides and specimens.
B.Sc Pass Course PCM/CBZ	Chem -201	Chemistry I: Physico Inorganic Chemistry-I	2016-17	Demonstration of museum specimen and permanent slides to characterize and identify animals from various taxa makes them employable at zoological parks. Students also develop the skill of dissecting an organism and mounting of tissues.

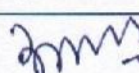

(Prof. D.K. Mahur)
Registrar
Jaipur National University
Jaipur

B.Sc Pass Course PCM/CBZ	Chem -202	Chemistry II: Physico-Organic Chemistry-II	2016-17	conductometric titration train the students for drug analysis in Pharmaceutical Industry and medicine area.
B.Sc Pass Course CBZ	Zoo -205	Biodiversity-II Arthropoda to Hemichordata	2016-17	Train the student to illustrate mechanism of preparation, chemical reaction of organic hydrocarbon, which provide job opportunity in oil industrial ,pharmaceutical fields, research, teaching and competitive exams
B.Sc Pass Course CBZ	Zoo -206	Biochemistry	2016-17	Training the students about characteristics and classification of Arthropods and insect vectors such as Mosquito, Housefly, Sandfly, Tse-Tse fly etc will fetch jobs in public health sector.
B.Sc Pass Course CBZ	Comp-207	Computer Applications*	2016-17	Training in Enzyme kinetics and separation, purification and analysis of various biomolecules is helpful in various aurvedic pharmaceutical compaines
B.Sc Pass Course CBZ	Chem -208	Practical - I	2016-17	The relationship of computers and automation to employment is part of the more general relation of technological change to employment. The most obvious effect is that increases in productivity due to technology.
B.Sc Pass Course CBZ	Bot -209	Practical - II	2016-17	training in distillation, crystallization for purification and separation of compounds & qualitative analysis like element detections and identifications of functional groups and utilize their knowledge in academic and R&D (pharmaceutical industries).
B.Sc Pass Course CBZ	Zoo -210	Practical - III	2016-17	Training the students to differentiate between different plant tissues. skill development in differentiation of dicot and monocot root, stem and leaves and their anomalous growth through section cutting and permanent slide.
B.Sc Pass Course PCM/CBZ	Chem -302	Chemistry II: Physico-organic Chemistry-II	2016-17	Demonstration of museum specimen and permanent slides to characterize and identify animals from various taxa makes them employable at zoological parks. Students also develop the skill of dissecting an organism, mounting of tissues and preparation of solutions and buffers.
B.Sc Pass Course CBZ	Bot -304	Plant Breeding and Evolution	2016-17	Training in mechanism carbonyl and carboxylic acid reactions helps in chemical industries for the production of synthetic analogs of natural chemical products, their analysis by various techniques like spectroscopy for detection and estimation of compound of interest.
B.Sc Pass Course CBZ	Zoo-305	Chordates	2016-17	Training the students about the basic concept of plant breeding like pure line selection, mass selection, pedigree method, back cross, multiline selection, polyploidy and vegetative propagation used in crop improvement for employment in the fields of horticulture, agriculture, agronomy, forestry etc.
B.Sc Pass Course CBZ	Zoo -306	Molecular Genetics	2016-17	Training the students in identification and characterization of various taxa which enables them in competitive exams and makes them employable in zoological parks.
B.Sc Pass Course PCM/CBZ	Chem -307	Practical - I	2016-17	Training in isolation and purification of DNA, RNA and Protein and their analysis based on various biophysical and chemical techniques useful in research, Agriculture and molecular diagnostic labs
B.Sc Pass Course CBZ	Bot -308	Practical - II	2016-17	Training in analytical technique like Thin layer chromatography and detection of alkali content in water sample is important in pharmaceutical/Textiles/Dye synthesis industries for check the purity of organic compounds and monitoring the reactions.

(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

B.Sc Pass Course CBZ	Zoo -309	Practical - III	2016-17	Skill development in the field of plant identification based on vegetative and floral characters and emasculation, bagging and tagging techniques of plant breeding.
B.Sc Pass Course PCM/CBZ	Chem -401	Chemistry I: Physico Inorganic Chemistry - IV	2016-17	Training in DNA isolation and electrophoresis. Skill development in differentiating between poisonous and non- poisonous snakes.
B.Sc Pass Course PCM/CBZ	Chem -402	Chemistry II: Physico organic Chemistry - IV	2016-17	Training in preparation of buffer solutions and pH estimation of solution which helps in all types of chemical industries, Pharmaceuticals and laboratories.
B.Sc Pass Course CBZ	Bot -403	Reproductive Botany (Embryology and Palynology)	2016-17	Training in synthesis of heterocyclic compounds and organometallic compounds and spectroscopy technique provide employability in research field, medicine synthesis , natural product synthesis, textiles.
B.Sc Pass Course CBZ	Bot -404	Biotechnology	2016-17	Training the students about the concept of pollination, polyembryony, parthenogenesis, parthenocarpy and apomixis. They will be able to calculate the percentage of pollen germination and can dissect the embryo/endosperm from developing seeds which helps them to get the employment in nursery
B.Sc Pass Course CBZ	Zoo -406	Anatomy and Physiology	2016-17	Provide technical skills to culture/ micropropagate commercially important varieties plant, Synthetic seed production on large scale which bears directly employability in Agriculture, crop improvement, secondary metabolite production in government/ non-government organisation or startup companies
B.Sc Pass Course PCM/CBZ	Chem -407	Practical - I	2016-17	Training the students in identification of various body systems which prepare them for competitive examinations like civil services forest services etc
B.Sc Pass Course CBZ	Bot -408	Practical - II	2016-17	Training in identification of organic compounds through the functional group and determination of melting point etc, are helpful in academic and industries.
B.Sc Pass Course CBZ	Zoo-409	Practical - III	2016-17	Skill development in pollen germination, pollen viability method and identification of different seed types and endosperms helps establishing a nursery of plants and as palynologist
B.Sc Pass Course PCM/CBZ	Chem -502	Chemistry II: Physico organic Chemistry-V	2016-17	Students learn the clinical skill to measure haemoglobin, Blood pressure, bleeding time, clotting time and identify blood groups from given sample.
B.Sc Pass Course CBZ	Bot -503	Plant physiology and Biochemistry	2016-17	Trained in classical and solid phase peptide synthesis, electrophoresis techniques will open job opportunities in field of commercial peptide synthesis
B.Sc Pass Course CBZ	Bot -504	Analytical Techniques	2016-17	Skill development in basic concept of transpiration, mineral nutrition, Plant growth regulators, nitrogen fixation and osmotic potential for Self-sustenance in agriculture
B.Sc Pass Course CBZ	Zoo -505	Immunology	2016-17	Training in principle, construction, working and application of spectroscopy, microscopy, centrifugation, chromatography, and electrophoresis
B.Sc Pass Course CBZ	Zoo -506	Applied zoology	2016-17	Provides the theoretically as well as technical know-how of the antigen-antibody interaction, production and application of monoclonal antibodies, type of Vaccines and their mechanism of action; which will pave the path for students in fetching jobs of technical sales executives/specialists in Pharmaceutical companies or companies involved in the production of Biologicals.
B.Sc Pass Course PCM/CBZ	Chem -507	Practical - I	2016-17	Skill development in start-up of silkworm rearing/bee-keeping/fish farm/prawn culture/poultry farm etc.

B.Sc Pass Course CBZ	Bot -508	Practical - II	2016-17	Training in column chromatography technique for separation, conductometric titration for pH determination and purification by distillation provide employability in various analytical labs & pharmaceutical industries
B.Sc Pass Course CBZ	Zoo -509	Practical - III	2016-17	skill development in chromatography technique for separation of amino acids and pigments, enzyme activity assay are important in analytical labs & pharmaceutical industries
B.Sc Pass Course PCM/CBZ	Chem -601	Chemistry I: Inorganic Chemistry-VI	2016-17	Skill development in measuring haemoglobin, identify blood groups, observe antigen-antibody interactions with the help of precipitation reactions, estimate WBC and RBC count in given sample.
B.Sc Pass Course PCM/CBZ	Chem -602	Chemistry II: Physico organic Chemistry-VI	2016-17	training in the basic concepts of photochemistry (chemiluminescence/ Fluorescence/ Phosphorescence) techniques, which is basic in many estimation and detection techniques in industries
B.Sc Pass Course CBZ	Bot -604	Economic Botany	2016-17	Training in synthesis of different pharmaceutical drugs and medicines, analyze and evaluate new and existing pharmaceuticals.
B.Sc Pass Course CBZ	Zoo -605	Medical Zoology	2016-17	Skill development in nutritional and medicinal properties of plants those are used in day-to-day daily life which helps to built an idea for directly employability in agriculture.
B.Sc Pass Course CBZ	Zoo -606	Biodiversity and Environment	2016-17	Provides the theoretically as well as technical know-how of the antigen-antibody interaction, type of Vaccines and their mechanism of action; which will pave the path for students in fetching jobs of technical sales executives/specialists in Pharmaceutical companies or companies involved in the production of Biologicals.
B.Sc Pass Course PCM/CBZ	Chem -607	Practical - I	2016-17	The course will prepare the students toward various national level entrance exams of general awareness such as Indian civil services and Indian forest services etc. (such as laws for environmental protection, Indian patent laws and Intellectual/Industrial property rights, conservation of biodiversity)
B.Sc Pass Course CBZ	Bot -608	Practical - II	2016-17	Training in separation and estimation of inorganic ions by ion exchange method, synthesis of organic compound by nitration , halogenation and polarimetry for retraction of mixture of water and glycerol and calorimetry to determination of concentration and absorbance of solution provide employability in pharma, Textile, chemical industries as well as research.
B.Sc Pass Course CBZ	Zoo -609	Practical - III	2016-17	Skill development in testing of economically important plants for starch, fibre, cellulose, hemicellulose and oil droplets which will be helpfull in the field of food Industry/ chemical industry/ pharmaceuticals.
B.Sc Pass Course PCM/PHY HONS	BPMPR106	Atomic Structure, Bonding, General Organic Chemistry & Aliphatic Hydrocarbons	2018-19	Train and develop skill to identification and synthesis of new compound by applying the concept of chemical bond formation and atomic structure of compounds, organic synthesis provides employability in different chemical industries and research.

 (Prof. D K Mathur)
 Registrar
 Jaipur National University
 Jaipur

B.Sc Pass Course PCM/CBZ	BPMAH102	Atomic Structure, Bonding, General Organic Chemistry & Aliphatic Hydrocarbons	2018-19	Training in analytical technique like paper chromatography and detection of alkali content in water sample is important in pharmaceutical/Textiles/Dye synthesis industries for check the purity of organic compounds and monitoring the reactions.
B.Sc Pass Course PCM/MATH HONS	BPMDC103	Differential Calculus	2018-19	A course in Maxima minima, and Lagrange's method of undetermined coefficient helps in prediction of various constraints in field of defence, engineering and logistics. Knowledge of differentiability, libnitz and Euler theorem, concavity and convexity trains the student in CURVE SKETCHING
B.Sc Pass Course PCM	BPMPC104	Professionals Communication Skills	2018-19	Training students to speak and write with propriety and effectiveness and argue in a positive manner for group discussuon and personal interview
B.Sc Pass Course PCM/PHY HONS	BPMMC201	Mechanics	2018-19	Foundation course for academic, research jobs and technical jobs involving study the behavior of various mechanical instruments. Some of the topics like dynamics of rigid bodies, rotational motion, simple harmonic motion are very important in mechine menufactring industries. These are the key features of any mechanical instruments.
B.Sc Pass Course PCM	BPMPR205	Mechanics Lab	2018-19	The students have gets knowledge to design machines and conduct experiments.The students are eligible to design a system, component, or process to meet desired needs in production and menufacturing units. The Students are capable to identify, formulate and solve engineering based problems.
B.Sc Pass Course PCM/CBZ	BPMCF202	Chemical Energetics, Equilibria & Functional Group Organic Chemistry-I	2018-19	Training in functional group chemistry is important for synthesis of drugs and different organic compounds.
B.Sc Pass Course PCM/CBZ	BPMPR206	Chemical Energetics, Equilibria & Functional Group Organic Chemistry- I Lab	2018-19	Purification of organic compound by crystallization, determination of melting and boiling points and synthesis. In the, pharmaceutical industries, students understands these technique and applied in R&D department of the organization and contribute for the betterment.
B.Sc Pass Course PCM/MATH HONS	BPMDE203	Differential Equation	2018-19	Imparts direct formulation techniques for general, particular, explicit, implicit and singular solution of a differential equation. Also lesson on types of first and second order ordinary and partial differential equation. Derivation of heat, wave and laplace equations. Classification of second order linear equations
B.Sc Pass Course PCM/MATH HONS	BPMEV204	Environmental Science	2018-19	The course will prepare the students toward various national level entrance exams of general awareness such as Indian civil services and Indian forest services etc. (such as laws for environmental protection, conservation of biodiversity)
B.Sc Pass Course PCM	BPMTP301	Thermal Physics	2018-19	Thermodynamics is the branch of physics in which students learnt about low temperature production. liquification of gases, working of steam, heat engines. Student are able to work in gas industries, thermal power plants, hydropower plants.
B.Sc Pass Course PCM/CBZ	BPMCO302	Conductance, Electro Chemistry & Functional Group Organic Chemistry- II	2018-19	Training in concepts, mechanism of functional group chemistry in the field of synthesis of drugs , different organic compounds.

(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

B.Sc Pass Course PCM/CBZ	BPMPR306	Conductance, Electro Chemistry & Functional Group Organic Chemistry- II Lab	2018-19	Training in Systematic Qualitative Organic Analysis of Organic Compounds, monofunctional group and preparation of one derivative are useful in pharmaceutical industry and biotech industry.
B.Sc Pass Course PCM	BPMRA303	Real Analysis	2018-19	Deep and critical analysis of Real numbers, its properties , principles and various named theorem like Bolzano weitrass theorem, nested interval theorem and mean value theorems
B.Sc Pass Course PCM	BPMVC304	Vector Calculus	2018-19	Quantitative Analysis of scalar point function and vector point function along with the utility of gradient and curl. Knowledge of various integrals- line integral, surface integrals and volume integrals. Also Greens theorem and Gauss divergence theorem
B.Sc Pass Course PCM	BPMMF304	Mathematical Finance	2018-19	Lays significance on the finance aspect of mathematics like risk aversion, arbitrage, inflations etc. Also gives a deep understanding of asset return and maintainance, two find method, and pricing models.
B.Sc Pass Course PCM	BPMEM401	Electricity and Megnetism	2018-19	The electricity and magnetism part of this programe provides many careers prospectives manufacturing and technology-based roles. Whether we're talking about renewable or non-renewable energy, there are plenty of careers in electricity and magnetism within the energy sector.
B.Sc Pass Course PCM	BPMTS402	Transition Metal & Coordination Chemistry, States of Matter and Chemical Kinetics	2018-19	Training in the chemical and magnetic properties of transition metal and coordination compounds is important for working of various industries and research institute.
B.Sc Pass Course PCM	BPMPR406	Transition Metal & Coordination Chemistry, States of Matter and Chemical Kinetics Lab	2018-19	Training in qualitative semimicro analysis of mixtures containing 2 anions and 2 cations.
B.Sc Pass Course PCM	BPMAG403	Algebra	2018-19	Providing insight on pure mathematical aspects of Group theory, Ring theory and Number theory including named theorems- Lagranges' theorem, Euler theorem, Fermat little theorem, euclidean algorithm etc.
B.Sc Pass Course PCM/CBZ	BPMPC404	Pharmaceutical Chemistry	2018-19	fundamental course of pharmaceutical chemistry provide opportunity in academic , research, medicine and industrial fields. also involving training of synthesis of different pharmaceutical drugs and medicines
B.Sc Pass Course PCM/CBZ	BPMGM404	Green Methods in Chemistry	2018-19	develop skill to conversant with applications of green chemistry to organic synthesis. Students will be prepared for taking up entry level jobs in the chemical industry. They also will have the option of studying further in the area.
B.Sc Pass Course PCM/CBZ	BPMCI404	Chemoinformatics	2018-19	develop skills in Molecular Modelling and Structure elucidationRecognize, apply, compare and predict chemical structures, properties, and reactivity and; solve chemistry related problems in computatinal area.
B.Sc Pass Course PCM	BPMSS501	Solid State Physics	2018-19	Training student study the crystal structure of materials , mechanism transistors and require using X-ray crystallography, neutron diffraction, and electron diffraction which provide student to get employment as Silicon Design Engineer, Technical assistant in labs.

B.Sc Pass Course PCM	BPMMP501	Medical Physics	2018-19	Provide qualitative knowledge regarding how ionising radiation interacts with matter, how it affects living organisms and how it is used as a therapeutic technique which involve student in therapeutic technique assistant.
B.Sc Pass Course PCM	BPMMP505	Discipline Specific Electives (Physics) Lab : Medical Physics Lab	2018-19	We train student how to use CT Scan, ECG, Laser techniques, sphygmomanmeter that provide student technical support in hospital, work as demonstrator and medical sales executive etc.
B.Sc Pass Course PCM	BPMAP501	Atmospheric Physics	2018-19	Here we student get a qualitative knowledge of stellar evolution, including red giants, supernovas, neutron stars, pulsars, white dwarfs and black holes, using evidence and presently accepted theories which help student to work in weather forecasting.
B.Sc Pass Course PCM	BPMMP505	Discipline Specific Electives (Physics) Lab: Atmospheric Physics LAB	2018-19	Students are able to work in weather stations, offices, or laboratories. Occasionally, they do have to do some fieldwork, which means working outdoors to examine the weather.
B.Sc Pass Course PCM	BPMMP506	Organometallics, Bioinorganic Chemistry, Polynuclear Hydrocarbons and UV, IR Spectroscopy	2018-19	Training in synthesis of organometilic compounds, spectroscopy technique NMR, IR , UV makes the student employable in Medicinal Chemistry and Chemical industry
B.Sc Pass Course PCM	BPMMP506	Discipline Specific Electives (Chemistry) Lab: Organometallics, Bioinorganic Chemistry, Polynuclear Hydrocarbons and UV, IR Spectroscopy Lab	2018-19	Training in synthesis of inorganic complexes and quanlitative analysis of organic functional group using spectroscopy is important in chemical industry
B.Sc Pass Course PCM	BPMMP502	Molecular Modelling& Drug Design	2018-19	training the students to conformational analysis of compounds, Compare the shapes of the molecules Build and minimize organic compounds make them employable in computational drug design scientist assistant.
B.Sc Pass Course PCM	BPMMP506	Discipline Specific Electives (Chemistry) Lab: Molecular Modelling& Drug Design Lab	2018-19	training students to identify basic components of computer and programming as applied to computer assisted design and modelling of molecules and Predicting protein structures by 'Threading', Molecular docking which make them employable in computational research area and industries to synthesised new compounds.
B.Sc Pass Course PCM	BPMIM502	Instrumental Methods of Analysis	2018-19	Training in different analytical spectroscopy, chromatography techniques, identify the experimental requirements and compare/analyze the data/results and provide employability in industries of chemical synthesis.
B.Sc Pass Course PCM	BPMMP506	Discipline Specific Electives (Chemistry) Lab: Instrumental Methods of Analysis Lab	2018-19	develop practical skills in field of determination of ions , separation and detection of carbohydrate make employable in chemical industries and phamaceutical industries.

(Prof. D.K. Mathur)
2018-19
Registrar
Jaipur National University
Jaipur

B.Sc Pass Course PCM	BPMLP503	Linear Programming	2018-19	Skill enhancement for tabular calculation of real life maxima minima problems. utility of optimization in programming. the concept of duality is used in various computer programming. the transportation and assignment problem bears relevance to various industrial diploma.
B.Sc Pass Course PCM	BPMMC503	Mechanics	2018-19	Foundation course for academic, research jobs and technical jobs involving study the behavior of various mechanical instruments.
B.Sc Pass Course PCM	BPMQM601	Quantum Mechanics and Application	2018-19	Student get the idea about the nature and behavior of matter, provide quantum computational knowledge energy on the atomic and subatomic level an essential knowledge for the jobs in sectors requiring large scale behavior, get jobs in Quantum software programmer.
B.Sc Pass Course PCM	BPMPR605	Discipline Specific Electives (Physics) Lab: Quantum Mechanics and Application Lab	2018-19	Student able to relate theoretical and practical idea in Zeeman effect, there by showing the hyperfine structure, tunneling effect which helps student in getting lab technician jobs.
B.Sc Pass Course PCM	BPMQC602	Quantum Chemistry, Spectroscopy & Photochemistry	2018-19	Training in the basic concepts of spectroscopy(NMR, Mass), chemiluminescence/ Fluorescence/ Phosphorescence which is basic in many estimation and detection techniques in industries
B.Sc Pass Course PCM	BPMPR606	Discipline Specific Electives (Chemistry) Lab: Quantum Chemistry, Spectroscopy & Photochemistry Lab	2018-19	Training in spectroscopic and calorimetry practical skills are applied in identification, estimation and detection of organic compounds in industries and laboratory
B.Sc Pass Course PCM	BPMRC602	Research Methodology for Chemistry	2018-19	Student will develop the skill of research methodology like: types of research, literature review and research method for critically analyzing and writing research report.
B.Sc Pass Course PCM	BPMNM603	Numerical Method	2018-19	Training in basic concepts of numerical data solution by various estimating method like Regular falsi Runge kutta, Simpsons method.
B.Sc Pass Course PCM	BPMP5603	Probability and Statistics	2018-19	A relevant course useful for data analyst and share brokerage. the theme of the subject involves various calculation methods for prediction of profit and losses.
B.Sc Pass Course PCM	BPMEC604	Electrical Circuits and Network Skills	2018-19	Here the student get trained in design the circuits that serve as the foundation for these products, they may modify existing designs or create new designs because circuit technology is constantly changing, which help in getting various government job Circuit Designer Engineer, Electrical operator, government sector job.
B.Sc Pass Course PCM	BPMRE604	Computational Physics Skills	2018-19	Training in various crystal structure like atomic structure, crystal structure in form of computational design engineering and also provide detail study to real time theoretical and experimental techniques which help student to get employment in computational design operator.
B.Sc Pass Course PCM	BPMCP604	Renewable Energy and Energy harvesting	2018-19	We train our student in the mechanism of water energy, solar energy and wind energy, also explain about cheap, environment friendly energy which help them in getting involving turbine operation.

B.Sc Pass Course CBZ	BBZPD-101	Plant Diversity	2018-19	Training students about the identification and characterization of different types of plant on the basis of their morphological, reproduction and pattern of life cycle which will helpful in self employment in plant nurseries and agriculture.
B.Sc Pass Course CBZ	BBZAH-102	Atomic Structure, Bonding, General Organic Chemistry & Aliphatic Hydrocarbons	2018-19	Train and develop skill to identification and synthesis of new compound by applying the concept of chemical bond formation and atomic structure of compounds, organic synthesis provides employability in different chemical industries and research.
B.Sc Pass Course CBZ	BBZAD -103	Animal Diversity	2018-19	Training the students in identification and characterization in various taxa which enables them competitive exams and makes them employable in zoological parks. Training in characteristics and classification of Arthropods and insect vectors will fetch jobs in public health sector.
B.Sc Pass Course CBZ	BBZES204	Environmental Studies	2018-19	The course will prepare the students toward various national level entrance exams of general awareness such as Indian civil services and Indian forest services etc. (such as laws for environmental protection, Indian patent laws and Intellectual/Industrial property rights, conservation of biodiversity)
B.Sc Pass Course CBZ	BBZPR -105	Practical Botany Plant diversity	2018-19	Skill development in simple staining and differential staining, permanent slides, museum specimens
B.Sc Pass Course CBZ	BBZPR-106	LAB Atomic Structure, Bonding, General Organic Chemistry & Aliphatic Hydrocarbons	2018-19	Training in analytical technique like Thin layer chromatography and detection of alkali content in water sample is important in pharmaceutical/Textiles/Dye synthesis industries for check the purity of organic compounds and monitoring the reactions.
B.Sc Pass Course CBZ	BBZPR -107	Practical Zoology Animal Diversity	2018-19	Demonstration of museum specimen and permanent slides to characterize and identify animals from various taxa makes them employable at zoological parks. Skill development in differentiation and identification of poisonous and non- poisonous snakes.
B.Sc Pass Course CBZ	BBZPT-201	Plant Ecology & Taxonomy	2018-19	Training in study of soil composition on the basis of organic and inorganic components (carbonates, chlorides, nitrates, sulphates and organic matters) present in the soil and their relation to plant life and different plant adaptations in relation to light, temperature, water and salinity makes the student employable in various soil testing labs in agriculture sector
B.Sc Pass Course CBZ	BBZCF-202	Chemical Energetics, Equilibria & Functional Group Organic Chemistry-I	2018-19	Training in functional group chemistry is important for synthesis of drugs and different organic compounds.
B.Sc Pass Course CBZ	BBZCS-104	Professionals Communication Skills	2018-19	Training students to speak and write with propriety and effectiveness and argue in a positive manner for group discussion and personal interview
B.Sc Pass Course CBZ	BBZPR -205	Practical Botany Plant Ecology and Taxonomy	2018-19	Training in estimation of different inorganic constituents like carbonates, chlorides, nitrates, sulphates and organic matters present in the soil and other physico-chemical-biology parameters of plant growth makes the student employable in various labs in agriculture sector

B.Sc Pass Course CBZ	BBZPR-206	Chemical Energetics, Equilibria & Functional Organic Chemistry Lab	2018-19	Training in purification of organic compound by crystallization, determination of melting and boiling points and synthesis is helpful in pharmaceutical industries, chemical industries etc
B.Sc Pass Course CBZ	BBZZP-207	Practical Zoology Comparative Anatomy and Developmental Biology	2018-19	Skill development in window making and acquire knowledge about the various developmental stages of chick which makes them employable in research labs
B.Sc Pass Course CBZ	BBZAE- 301	Plant Anatomy & Embryology	2018-19	Training in pollination, syngamy, double fertilization, endosperm formation and polyembryony which helps them to get the employment in nursery and as palynologist and research scientist.
B.Sc Pass Course CBZ	BBZCE-302	Conductance, Electro Chemistry & Functional Group Organic Chemistry- II	2018-19	Training in concepts, mechanism of functional group chemistry in the field of synthesis of drugs, different organic compounds.
B.Sc Pass Course CBZ	BBZPB- 303	Physiology & Biochemistry	2018-19	Prepare the students toward various national level entrance exams such as Indian civil services, SSC etc.
B.Sc Pass Course CBZ	BBZPR- 305	Practical Botany Plant Anatomy and Embryology	2018-19	Training in calculating the percentage of pollen germination and can dissection the embryo/endosperm from developing seeds which helps them to get the employment in nursery and as palynologist and research scientist.
B.Sc Pass Course CBZ	BBZPR-306	Lab Solutions, Phase Equilibrium, Conductance, Electrochemistry & Functional Group Organic Chemistry- II	2018-19	Training in Systematic Qualitative Organic Analysis of Organic Compounds, monofunctional group (-COOH, phenolic, aldehyde, ketonic, amide, nitro & amines) and preparation of one derivative are useful in pharmaceutical industry and biotech industry.
B.Sc Pass Course CBZ	BBZPR- 307	Practical Zoology Physiology and Biochemistry	2018-19	Training in experimental analysis/estimation of carbohydrates and proteins in the given sample is important for employability in various analytical labs
B.Sc Pass Course CBZ	BBZPM -401	Plant Physiology & Metabolism	2018-19	Training students in basic concept of transpiration, mineral nutrition, osmotic potential as well as enzyme action on plant metabolism is important for execution of agricultural business ideas.
B.Sc Pass Course CBZ	BBZTS-402	Transition Metal & Coordination Chemistry, States of Matter and Chemical Kinetics	2018-19	Training in the chemical and magnetic properties of transition metal and coordination compounds is important for working of various industries and research institute.
B.Sc Pass Course CBZ	BBZGE -403	Genetics & Evolutionary Biology	2018-19	Students develop skills which enhance their knowledge about fossils and makes them employable to further take up Paleontology as a career option.
B.Sc Pass Course CBZ	BBZPR-405/ (PR/Bot -405 in BOS)	Practical Botany Plant Physiology and Metabolism	2018-19	Training in chromatography technique for separation of various biological compounds, hill's reaction, catalase and peroxidase activity and osmotic potential

(Prof. D.K. Verma)
 Registrar
 Jaipur National University
 Jaipur

B.Sc Pass Course CBZ	BBZPR-406/ (PR/Chem-406 in BOS)	Lab Transition Metal & Coordination Chemistry, States of Matter & Chemical Kinetics	2018-19	trained to Qualitative semimicro analysis of mixtures containing 2 anions and 2 cations. Emphasis should be given to the understanding of the chemistry of different reactions provide job area in research institute as researcher, chemist in government and non government laboratory.
B.Sc Pass Course CBZ	BBZPR-407/ (PR/Zoo-407 in BOS)	Practical Zoology Genetics & Evolutionary Biology	2018-19	Development of skill to study a idiogram and identify whether the human karotype is normal or abnormal.
B.Sc Pass Course CBZ	BBZCM-501	Cell & Molecular Biology	2018-19	Training in handling of biological samples (Cells/ tissues), differentiate between different types of cells/ tissues and training in principle, construction and application of different types of microscopic techniques
B.Sc Pass Course CBZ	BBZOS-502	Organometallics, Bioinorganic Chemistry, Polynuclear Hydrocarbons and UV, IR Spectroscopy	2018-19	Training in synthesis of organometilic compounds, spectroscopy technique NMR, IR , UV makes the student employable in Medicinal Chemistry and Chemical industry
B.Sc Pass Course CBZ	BBZIM-503	Immunology	2018-19	Provides the theoretically as well as technical know-how of the antigen-antibody interaction, production and application of monoclonal antibodies, type of Vaccines and their mechanism of action; which will pave the path for students in fetching jobs of technical sales executives/specialists in Pharmaceutical companies or companies involved in the production of Biologicals.
B.Sc Pass Course CBZ	BBZBB-501	Economic Botany & Biotechnology	2018-19	Provide technical skills of plant tissue culture and genetic engineering to culture/ micropropagate economically important plants on large scale which bears directly employblity in agriculture, crop improvement, secondary metabolite production in government/ non-government organisation or startup companies.
B.Sc Pass Course CBZ	BBZQP-602	Quantum Chemistry, Spectroscopy & Photo Chemistry	2018-19	Training in the basic concepts of spectroscopy(NMR,Mass), chemiluminiscence/ Fluorescence/ Phosphorescence which is basic in many estimation and detection techniques in industries
B.Sc Pass Course CBZ	BBZAZ-603	Applied Zoology	2018-19	Students can Initiate their own start-up of fish farming and transportation/poultry farming, Animal husbandry etc. Training the students about characterics and classification Parasitic protozoans(Entamoeba histolytica, Plasmodium vivax and Trypanosoma gambiense) and mosquitoes (Anopheles, Culex, Aedes) will fetch a job in public health sector.
B.Sc Pass Course CBZ	BBZAT-501	Analytical Techniques in Plant Sciences	2018-19	Training in principle, construction, working and application of spectrophotometry, microscopy and chromatography.
B.Sc Pass Course CBZ	BBZIC-502 	Instrumental method of chemical analysis	2018-19  (Prof. D K Mathur)	Training in different analytical spectroscopy, chromatography techniques, identify the experimental requirements and compare/analyze the data/results and provide employblity in industries of chemical synthesis.
B.Sc Pass Course CBZ	BBZAB-503	Aquatic Biology	2018-19  Registrar Jaipur National University Jaipur	Marine biologists, Can involved in developing designated marine reserves and creating artificial reefs/wrecks in order to encourage wildlife into an area Practical fieldwork skills

B.Sc Pass Course CBZ	BBZBI-601	Bioinformatics	2018-19	Training for phylogenetic tree construction and analysis of makes the student employable for knowledge processing organization and research industries.
B.Sc Pass Course CBZ	BBZMD-502	Molecular Modelling & Drug Design	2018-19	training students to identify basic components of computer and programming as applied to computer assisted design and modelling of molecules and Predicting protein structures by 'Threading', Molecular docking which make them employable in computational research area and industries to synthesised new compounds.
B.Sc Pass Course CBZ	BBZRB-503	Reproductive Biology	2018-19	Conduct clinical research and lab work and learn how to strengthen the processes that allow the body to function and fight disease. may lead to advancements in livestock breeding and world food production, fetal monitoring, in vitro fertilization practices or the development of contraceptives.
B.Sc Pass Course CBZ	BBZRM-601	Research Methodology	2018-19	Student will develop the skill of research methodology like: types of research, literature review and research method for critically analyzing and writing research report.
B.Sc Pass Course CBZ	BBZRC-602	Research Methodology for Chemistry	2018-19	students should be able develop skills to construct a rational research proposal to generate fruitful output in terms of publications, literature review and patents in the field of chemical sciences.
B.Sc Pass Course CBZ	BBZID-603	Insect, Vector and Diseases	2018-19	Provides basic information of pests and vectors, their surveillance techniques and procedures to use available tools and most appropriate methods at local level to manage them in a time framework with systematic actions students pursuing Pest Management as their career. Understand the effective way of insect pest management strategy.
B.Sc Pass Course CBZ	BBZPR-505	Practical Botany Cell and Molecular Biology	2018-19	skill development in differentiation of plant and animal cell, types of tissue and types of cell division through temporary mounts and permanent slides.
B.Sc Pass Course CBZ	BBZPR-506	Lab Organometallics, Bioinorganic Chemistry, Polynuclear Hydrocarbons and UV, IR Spectroscopy	2018-19	Training in synthesis of inorganic complexes and quantitative analysis of organic functional group using spectroscopy is important in chemical industry
B.Sc Pass Course CBZ	BBZPR-507	Zoology Practical Immunology	2018-19	Students learn to identify the blood groups from the given blood sample using ABO Blood grouping kit.
B.Sc Pass Course CBZ	BBZPR-505	Analytical Techniques in Plant Sciences Lab	2018-19	Training in different techniques like Thin layer chromatography, paper chromatography and column chromatography for separation of different compounds which is important in pharmaceutical/Textiles/Dye synthesis industries for check the purity of organic compounds.
B.Sc Pass Course CBZ	BBZPR-506	Instrumental method of chemical analysis Lab	2018-19	develop practical skills in field of determination of ions, separation and detection of carbohydrate make employable in chemical industries and pharmaceutical industries.
B.Sc Pass Course CBZ	BBZPR-507	Aquatic Biology Lab	2018-19	Develop practical field work skills Employ scientific methodologies such as experimentation and data analysis in the area of aquatic biology.

2018-19
(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

B.Sc Pass Course CBZ	BBZPR-605	Bioinformatics Lab	2018-19	Skill enhancement in developing and handling databases using computational tools to predict protein structures applicable in various IT sectors and pharmacy industries.
B.Sc Pass Course CBZ	BBZPR-506	Molecular Modelling & Drug Design Lab	2018-19	training the students to conformational analysis of compounds, Compare the shapes of the molecules Build and minimize organic compounds make them employable in computational drug design scientist assistant.
B.Sc Pass Course CBZ	BBZPR-605	Research Methodology Lab	2018-19	Student will develop the skill of independent thinking for critically analyzing and writing research report.
B.Sc Pass Course CBZ	BBZPR-505	Botany Practical: Economic Botany and Biotechnology	2018-19	facilitate up-skilling the capacity in pest/vector management among extension professionals in local bodies as well as commercial pest management professionals in industrial and urban areas
B.Sc Pass Course CBZ		Lab Quantum Chemistry, Spectroscopy & Photochemistry	2018-19	training students in micropropagation, polymerase chain reaction, AGE and PAGE techniques and differentiation between anther, endosperm and embryo culture of economically important plants
B.Sc Pass Course CBZ	BBZPR-607	Practical Zoology Applied Zoology	2018-19	Training in spectroscopic and calorimetry practical skills are applied in identification, estimation and detection of organic compounds in industries and laboratory
B.Sc Pass Course CBZ	BBZIP-604	Intellectual Property Rights*	2018-19	Skill development in start-up of silkworm rearing/bee-keeping/fish farm/prawn culture/poultry farm etc.
B.Sc Pass Course CBZ	BBZMB-304	Medicinal Botany *	2018-19	Training students about the concept of IPR like patent, copyright, trademark will make them innovators in the field of agriculture and other technologies
B.Sc Pass Course CBZ	BBZPC-404	Pharmaceutical Chemistry*	2018-19	Skill development in nutritional and medicinal properties of important plants those are used in day-to-day daily life which helps to built an idea for directly employability in agriculture. Conservation and propagation of Medicinally important mechanisms (Grafting, budding, cutting and layering) for employment in the nursery, industry, pharmacy.
B.Sc Pass Course CBZ	BBZPH-504	Public Health and hygiene	2018-19	Training in the synthesis of different pharmaceutical drugs and medicines.
B.Sc Pass Course CBZ	BBZNG-304	Nursery and Gardening	2018-19	students can work as a project assistant in public health projects funded by government or non-government organizations. They also develop skill to frame a public health plan during any epidemic or spread infectious diseases.
B.Sc Pass Course CBZ	BBZAC-404	Basic Analytical Chemistry	2018-19	Training students in techniques of Vegetative propagation like air-layering, cutting, rooting, planting, Hardening will helpful in self employment in plant nurseries, horticulture, agriculture and in research work.
B.Sc Pass Course CBZ	BBZAP-504	Apiculture	2018-19	Train the students in analysis of soil, water and food products by different analytical techniques chromatography and complexometric titration help them to get job as a analyst in pollution controlled board
B.Sc Pass Course CBZ	BBZMC-304	Mushroom Culture Technology	2018-19	Skill development in adopting beekeeping professionally

B.Sc Pass Course CBZ	BBZCI-404	Chemoinformatics	2018-19	Skill enhancement in manual work like: culture techniques, spawn techniques, sterilization, artificial environment control, harvesting, packaging and storage for establishing mushroom cultivation unit/ cottage/ small scale industry
B.Sc Pass Course CBZ	BBZAF-504	Aquarium Fish Keeping	2018-19	develop skills in Molecular Modelling and Structure elucidation, Recognize, apply, compare and predict chemical structures, properties, and reactivity and; solve chemistry related problems in computational area.
B.Sc Pass Course CBZ	BBZGC-604	Green Methods in Chemistry	2018-19	Skill enhancement in ornamental fish breeding.
B.Sc Pass Course CBZ	BBZMD-604	Medical Diagnostics	2018-19	develop skill to conversant with applications of green chemistry to organic synthesis. Students will be prepared for taking up entry level jobs in the chemical industry. They also will have the option of studying further in the area.
B.Sc Pass Course CBZ	BCHIP-105	Inorganic I: Atomic Structure & Chemical Bonding-I Lab	2019-20	Training students in techniques of blood and urine estimation which enable them to work as medical diagnostic and research officer in medical laboratories.
B.Sc Pass Course CBZ	Zoo -106	Cell biology and Genetics	2016-17	training in principle, components, optical path and application of different types of spectroscopic, microscopic, radioactivity measuring instruments centrifugation, electrophoresis, conductometry, potentiometry and chromatographic techniques which id required in research, industries and medical field.
B.Sc Pass Course CBZ	Bot -203	Pteridophyta, Gymnosperms and Palaeobotany	2016-17	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc Pass Course CBZ	Bot -204	Morphology and anatomy of Angiosperms	2016-17	Training in causes of malnutritions and relation of nutrition to various diseases will make the students employable as qualified health worker
B.Sc Pass Course PCM/CBZ	Chem -301	Chemistry I: Physico-Inorganic Chemistry-I	2016-17	Training on MEGA and Phylip for Phylogenetic tree construction and analysis makes the student employable for KPO (Knowledge Processing Organizations) and research industries
B.Sc Pass Course CBZ	Bot-303	Angiosperm Taxonomy	2016-17	Skill development in visualizing nucleic acid and protein structures helps in locating target sites and inferring underlying mechanism of action.
B.Sc Pass Course CBZ	Zoo-405	Developmental biology	2016-17	Downstream processing, broth processing, effluent treatment, aerobic and anaerobic slug treatment process, fermentation economics useful in biotech based production industries.
B.Sc Pass Course PCM/CBZ	Chem -501	Chemistry I: Physico Inorganic Chemistry-V	2016-17	Skill enhancement in drug manufacturing process and phases of clinical trials of pharmaceutical products makes the individual employable in Pharmaceutical companies
B.Sc Pass Course CBZ	Bot -603	Ecology	2016-17	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc Pass Course PCM	BPMDG304	Differential Geometry	2018-19	Training in causes of malnutritions and relation of nutrition to various diseases will make the students employable as qualified health worker

B.Sc Pass Course PCM	BPMRL503	Ring Theory and Linear Algebra-I	2018-19	Downstream processing, broth processing, effluent treatment, aerobic and anaerobic slug treatment process, fermentation economics useful in biotech based production industries.
B.Sc Pass Course PCM	BPMED504	Entrepreneurship Development	2018-19	Skill development in visualizing nucleic acid and protein structures helps in locating target sites and inferring underlying mechanism of action.
B.Sc Pass Course PCM	BPMIP504	Intellectual Property Rights (IPR)	2018-19	Training on MEGA and Phylip for Phylogenetic tree construction and analysis makes the student employable for KPO (Knowledge Processing Organizations) and research industries
B.Sc Pass Course PCM	BPMBC504	Business Skills for Chemist	2018-19	Training the students in steps in planning, Organizing, staffing and directing and controlling as an entrepreneur.
B.Sc Pass Course PCM	BPMPR505	Solid State Physics Lab	2018-19	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc Pass Course PCM	BPMRL603	Ring Theory and Linear Algebra-II	2018-19	training in principle, components, optical path and application of different types of spectroscopic, microscopic, radioactivity measuring instruments centrifugation, electrophoresis, conductometry, potentiometry and chromatographic techniques which is required in research, industries and medical field.
B.Sc Pass Course PCM	BPMPR605	Element of Modern Physics Lab	2018-19	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc Pass Course MATH HONS	BMHGT203	Graph Theory	2018-19	Training in causes of malnutritions and relation of nutrition to various diseases will make the students employable as qualified health worker
B.Sc Pass Course MATH HONS	BMHLS305	Logics and set	2018-19	Training on MEGA and Phylip for Phylogenetic tree construction and analysis makes the student employable for KPO (Knowledge Processing Organizations) and research industries
B.Sc Pass Course MATH HONS	BMHIS304	Information Security	2018-19	Skill development in visualizing nucleic acid and protein structures helps in locating target sites and inferring underlying mechanism of action.
B.Sc Pass Course MATH HONS	BMHMS403	Metric Spaces and Complex Analysis I	2018-19	Downstream processing, broth processing, effluent treatment, aerobic and anaerobic slug treatment process, fermentation economics useful in biotech based production industries.
B.Sc Pass Course MATH HONS	BMHRL501	Ring Theory and Linear Algebra I	2018-19	Skill enhancement in drug manufacturing process and phases of clinical trials of pharmaceutical products makes the individual employable in Pharmaceutical companies
B.Sc Pass Course MATH HONS	BMHIM504	Industrial mathematics	2018-19	Training in preventive measures for various Communicable diseases, Non-communicable diseases, nutrition-related diseases, Environment related health Hazards will make the student employable as training health worker
B.Sc Pass Course MATH HONS	BMHFE505	Finite Element Methods	2018-19	Training in causes of malnutritions and relation of nutrition to various diseases will make the students employable as qualified health worker
B.Sc Pass Course MATH HONS	BMHEC505	Econometrics	2018-19	Downstream processing, broth processing, effluent treatment, aerobic and anaerobic slug treatment process, fermentation economics useful in biotech based production industries.

JAIPUR NATIONAL UNIVERSITY

Jagatpura, Jaipur

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
B.Sc. (Hons.) Agriculture	BAG111	Introductory Agriculture and Principles of Agronomy	2016-17	Students will learn the different cultural practices of agronomical crops, consultancy services provided to farmers related soil fertility and productivity, business of crop production and plant protection, students learn about forest management practices and forest tree products for medicinal uses, students learn about farm tools and implements, students develop nursery and preparation of seed beds of crops, students provide consultancy services related soil and water losses from runoff plots.
B.Sc. (Hons.) Agriculture	BAG112	Principles of Genetics	2016-17	Students will learn the characteristics of plants, conventional and non conventional Genetics /Breeding which enhance practical knowledge and help to hybridize seed production of food grain commodities and vegetables. DNA and its structure, function, types, mode of replication and repair. RNA and its structure, function and its types, transcription, translation, genetic code and protein synthesis Numerical chromosomal aberrations (polyploidy) and evolution of different crop species like cotton, wheat, tobacco and brassicas. Mutation - characteristics, classification and induction. Test of goodness of fit of genetic ratio. Study of different types of gene interaction and modifications of typical dihybrid F ₂ ratio. Study and detection of linkage in F ₂ and test cross progeny.
B.Sc. (Hons.) Agriculture	BAG113	Introduction to Soil Science	2016-17	Students learn how to identify soils, classification of soils and soil analysis in lab and establish own soil testing laboratory. Also study about problem soils – acid, salt affected and calcareous soils, characteristics, reclamation – mechanical, chemical and biological methods also learn about Irrigation water – quality of irrigation water and its appraisal, Indian standards for water quality, use of saline water for agriculture and collection and processing of soil sample, determination of bulk density and particle density, Soil moisture determination, Soil moisture constants – Field capacity, permanent wilting point, Water holding capacity Infiltration rate, Soil texture and mechanical analysis, Soil temperature, Soil analysis for CEC, pH, EC, soluble cations & anions.
B.Sc. (Hons.) Agriculture	BAG114	Dimensions of Agricultural Extension	2016-17	Students learn to different Extension programme of different agricultural activities related to village .Agricultural Development Programmes with reference to year of start, objectives & salient features- Institution Village Linkage Programme (IVLP), National Agricultural Technology Project (NATP), ATMA, ATIC, KVK & NAIP. Poverty Alleviation Programmes- Integrated Rural Development Programme (IRDP), Swarna Jayanti Gram Swarajgar Yojana (SGSY), National Rural employment act (NREGA). Reorganized Extension System (T & V System) – Concept & Methodology. Organizing PRA techniques in a village to identify the agricultural problems.

B.Sc. (Hons.) Agriculture	BAG115	Agricultural Microbiology	2016-17	Students learn to different microbial experiment related to agricultural, beneficial microorganism in agriculture, biofertilizers – rhizobium, mycorrhiza, azolla, microbial insecticides, microbial agents for control of plant diseases, microbes in composting, microbiology of water, marine water, fresh water, potable water, food microbiology, microbial spoilage and food preservation, biodegradation of pesticides, biogas production, microbiology laboratory which help to create employability in bio fertilizer in industry.
B.Sc. (Hons.) Agriculture	BAG116	Introduction to Computer Applications	2016-17	Students learn to different introduction to computer applications programme, study of computer components, booting of computer and its shut down, practicing WINDOWS operating system, use of different computer hardware and software, also use of windows explorer, control panel, accessories, running application under MS windows, MS word, power point slide creation, printing and other inbuilt additional function, data management, graphs & chart, macros, goal seek pivot table, financial functions and other inbuilt additional function also study about data analysis using inbuilt tool packs, correlation & regression, internet browsing, browsing a web page and creating of E-Mail ID which help to create employability in computer and new agri techno based industry.
B.Sc. (Hons.) Agriculture	BAG118	Comprehensive and Communication Skills in English	2016-17	Students learn to different comprehensive and communication skills and personality development also learn about letter and application writing, personal/business correspondence, preparation of curriculum vitae and job applications, precis writing, spoken english practice by using audiovisual aids, oral presentation of reports which help to increase personality and working skill.
B.Sc. (Hons.) Agriculture	BAG121	Agricultural Meteorology	2016-17	Students learn to identify the weather and climate in relationship with agricultural crops, on the basis of climatological factors the future information can be forecast and study about use of weather data for irrigation scheduling, pesticide sprays, fertilizer application, basics of weather forecasting, agro-meteorological observatory – its site selection, installation and exposure of instruments, weather data recording, measurement of total solar radiation, short wave and long wave radiation, albedo and sunshine duration, maximum and minimum air temperature, soil temperature, dew point temperature, determination of vapor pressure, relative humidity, atmospheric pressure, wind speed and wind direction, measurement of rain, open pan evaporation and evapotranspiration, processing, tabulation and presentation of weather data which help to students employability in weather forecasting department and related lab work.

 (Prof. D K Mathur)
 Registrar
 Jaipur National University
 Jaipur

B.Sc. (Hons.) Agriculture	BAG122	Principles of Plant Breeding	2016-17	Students study about desired change in the characteristics of genotype, plant with the help of breeding, new high yielding varieties can be developed, this has a lot of scope in seed industry, different breeding methods of their development, Inbred line, different hybrids, synthetic, composite, multiline, clone, etc. polyploidy in relation to plant breeding and mutation breeding –types, role and methods of mutation breeding also study about use of biotechnology in plant breeding and procedure for release of new variety, emasculation and hybridization techniques which is help to create employability in agro seed based industry.
B.Sc. (Hons.) Agriculture	BAG123	Plant Pathogens and Principles of Plant Pathology	2016-17	Students learn to study the morphology of different plant pathogens and management of diseases caused by them plant disease forecasting - remote sensing application of biotechnology in plant disease management - development of disease resistant transgenic plants through gene cloning, integrated plant disease management (IPDM), plant pathology laboratory preparation of culture media for fungi and bacteria, preparation of fungicides – Bordeaux mixture, Bordeaux paste methods of application of fungicides – seed, soil and foliar which is create employability in agro pesticide industry
B.Sc. (Hons.) Agriculture	BAG125	Principles of Agricultural Economics	2016-17	Students learn to costs and prices agricultural crops, basic concepts of goods, service, utility, value, price, wealth & welfare economics and demand supply national income–concepts & measurement taxes and canons of taxation which is help to student understand market and market based industry.
B.Sc. (Hons.) Agriculture	BAG126	Fundamentals of Soil and Water Conservation Engineering	2016-17	Study of different methods and soil conservation pressurized irrigation methods- sprinkler and drip determination of fertilizers doses, uniformity coefficient and capacity of a sprinkler irrigation system, sprinkler and drip irrigation systems watershed management which help to create employability in drip and sprinkler based industry and self employability in farm production.
B.Sc. (Hons.) Agriculture	BAG128	Soil Chemistry, Soil Fertility and Nutrient Management	2016-17	Students learn to identify nutrient deficiency symptoms and its management and soil testing in lab. overcome deficiencies and toxicities rapid tissue tests, Soil test based fertilizer recommendations to crops instruments and their calibration and applications, estimation of available N, P, K, S, Zn and Fe in soil, estimation of N, P and K in plants these help to create employability in nutrient analysis in lab also fertilizer based industry.
B.Sc. (Hons.) Agriculture	BAG231	Field Crops-I (Kharif)	2016-17	Students learn to agricultural practices of field crops, seed and sowing, intercultural operations, fertilizer, water and weed management, plant protection, nursery preparation, seed bed preparation, calculations on seed rate, fertilizer application, yield calculations, harvesting and yield estimation these help to self employability in crop production and related startups.

Handwritten signature
 (Prof. D.K. Mathur)
 Registrar
 Jaipur National University
 Jaipur

B.Sc. (Hons.) Agriculture	BAG232	Weed Management	2016-17	Students learn to different control measures of weed management, weed prevention, control and eradication, methods of weed control- physical, cultural, chemical and biological methods, integrated weed management, herbicides- advantages and limitation of herbicide usage, weed management, aquatic weeds and their management, computation of herbicide doses, herbicide application equipment and calibration, phytotoxicity symptoms of herbicides, economics of weed control practice which is help to create employability in herbicide industry.
B.Sc. (Hons.) Agriculture	BAG233	Introductory Nematology	2016-17	Students will learn about morphology of nematodes and management of diseases caused by them, nematode diseases of crop plants of economic importance in state, nematode management, soil and plant samples, extraction of nematodes from soil and roots, killing and fixing of nematodes, nematicides and their uses which is increase employability in research field and pesticide industry.
B.Sc. (Hons.) Agriculture	BAG234	Statistics	2016-17	Students learn to different statistics calculations related to agriculture also study about estimation of regression lines, t & S.N.D. test for single mean and difference between two means, paired t-test, test of significance of correlation and regression coefficients, chi-square test for goodness of fit & test of independence in 2x2 contingency table and m x n contingency table which help to increase employability in research field, research data analysis and statistics department.
B.Sc. (Hons.) Agriculture	BAG236	Production Technology of Fruits and Plantation Crops	2016-17	The study of this course students learn different production technique of fruits and plantation crops, package of practices for the cultivation of major fruits, plant propagation methods, by seeds, cuttings (soft wood, hard wood and semi-hardwood), budding and grafting, layering (simple layering, Air layering, etc.), layout and planting systems, methods of pruning and training of important fruit crops, micro irrigation methods for establishment of orchard, preparation of growth regulator solutions for propagation, application of growth regulators for improving fruit set, fruit size and quality which is help to increase employability in fruit based and PGR industry and self employability in fruit production.
B.Sc. (Hons.) Agriculture	BAG237	Production Economics and Farm Management	2016-17	By the study of this course students develop managerial skill in respect of successful organization and operation of farms and get job in public as well as in private sector, factor product relationship, also study about determination of optimum input and output, factor relationship, product relationship, types of enterprise relationships, organizations of farm business systems of farming preparation of farm plans and budgets, economics analysis of different crop and livestock enterprises.
B.Sc. (Hons.) Agriculture	BAG238	Farm Power and Machinery	2016-17	Students learn to different farm machinery and their application tractor driving, daily and periodic maintenance of tractor, tractor drawn mould board plough and disk plough, cultivators, harrows and hoes, calibration of seed cum ferti- drill, estimation of tractor operational cost which help to employability in agro based machinery industry.

(Prof. D K Mahapatra)
Registrar
Jaipur National University
Jaipur

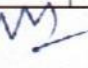

B.Sc. (Hons.) Agriculture	BAG239	Manures And Fertilizers	2016-17	Students learn to prepare different organic manures and compost, biofertilizer inoculation and fertilizers recommendation to farmers on the basis of soil and plant analysis. Determination of organic carbon and microbial biomass C, N and P. Total nitrogen and phosphorus in manures / composts – Ammoniacal and nitrate nitrogen – Water soluble P ₂ O ₅ , potassium, calcium, sulphur and zinc contents of fertilizers, Adulteration in fertilizer.
B.Sc. (Hons.) Agriculture	BAG241	Field Crops- II (Rabi)	2016-17	Students learn to different cultural practices of rabi crops intercultural operations, fertilizer, water and weed management, plant protection measures, seed bed preparation fertilizer experiments on rabi crops, identification of weeds herbicides judging sugarcane maturity and quality tests which help to self employability in crop production and crop based industry.
B.Sc. (Hons.) Agriculture	BAG242	Water Management	2016-17	Students learn to different water management system determination of infiltration rate measurement of irrigation water using different devices, irrigation water quality and its management, water management, agricultural drainage which is help to increase farm production and self employability.
B.Sc. (Hons.) Agriculture	BAG243	Soil survey, Land Use Planning and Remote Sensing	2016-17	Students learn to banchmark survey of different areas with using different soil survey methods and remote sensing techniques and also study about methods of soil survey and mapping, land use planning, aerial photography, aerial and satellite sensor imaginary, image processing and interpretations, interpretation of topographic map and delineation of physiographic boundaries based, preparation of the soil survey report, interpretation of remote sensing information which is creat employability in soil survey and related industry.
B.Sc. (Hons.) Agriculture	BAG244	Insect Ecology and Integrated Pest Management including Beneficial Insects	2016-17	Student learn relationship between insect and envirnment also study about important insecticides- botanicals, chlorinated hydrocarbons, organophosphates, carbamates, synthetic pyrethroids and novel Insecticides, chitin synthesis inhibitors, rodenticides, acaricides and fumigants, hormones and pheromones, repellents, antifeedants, attractants, gamma radiation and genetic control, pest surveillance through light traps, pheromone traps and field incidence, techniques for the estimation of insect population, IPM practices-mechanical, physical and cultural methods identification and application of parasites and predators, neem based products chemical control- Insecticides and their formulations, plant protection equipments, calibration of spray equipments, calculation of doses/concentrations of insecticides, poison bait preparation for rodent control, safe handling of pesticides, rearing technique for honeybees, rearing technique for silkworm, rearing technique for lac insect these topics help to increase employability in pesticide industry and silk and lac industry.

 (Prof. D K Mahapatra)
 Registrar
 Jaipur National University
 Jaipur

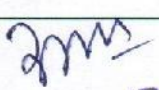

B.Sc. (Hons.) Agriculture	BAG245	Production Technology of Vegetables and Flowers	2016-17	The study of this course students learn different production technic of Vegetables and Flowers crops vegetable gardening floriculture. landscape gardening ornamental gardening Package of practices for rose, jasmine, chrysanthemum, marigold and gladiolus. protected cultivation kitchen garden vegetable nurseries Layout of lawns Potting, repotting and maintenance of house plants Training and pruning styles and types of gardens.
B.Sc. (Hons.) Agriculture	BAG246	Agricultural Finance and Co-operation	2016-17	The study of agricultural finance and enhances is the ability and knowledge of finance its need , sources of inances three R ' S of credit, methods of re payment , financing institutions , cooperatives. This has good scop for employment in finance sector.
B.Sc. (Hons.) Agriculture	BAG247	Crop Physiology	2016-17	Students learn to different activities related to the plants – foliar nutrition – hydroponics, plant growth regulators, commercial application of plant growth regulator in agriculture and horticulture and hormonal regulation of fruit ripening, seed viability and vigour tests, effect of ethylene on regulation of stomata breaking seed dormancy, chemical method, mechanical method, post harvest physiology which help to promote self employability, and PGR based and post harvest industry.
B.Sc. (Hons.) Agriculture	BAG248	Entrepreneurship Development and Communication Skills	2016-17	The study of this course students learn communication skills entrepreneurship development incubation and commercialization of ideas and innovations, government schemes and incentives for promotion of entrepreneurship, export and import policies, contract farming and joint ventures, public- privatepartnerships which is help to improve working skill and startups.
B.Sc. (Hons.) Agriculture	BAG351	Practical Crop Production - 1(Kharif crops)	2016-17	Students learn to different cultural practices of kharif crops also study about crop planning, seed treatment, nursery raising, sowing, nutrient management, water management, weed management and management of insect pests and diseases of crops, harvesting, threshing, drying, winnowing, storage and marketing of produce, preparation of balance sheet including cost of cultivation, net returns these help to students increase self emplobility and farm production.
B.Sc. (Hons.) Agriculture	BAG352	Rainfed Farming	2016-17	Students learn to farming on the basis of rainfed condition moisture index and aridity index, crops and cropping systems for drylands in situ moisture conservation soil mulching seed treatment with chemicals, methods of fertilizer application model water shed agro-forestry, grass legume forage and alley cropping systems, watershed management practices which is increase to self employment and increase dry land farm production and other related agro forest industry.

 (Prof. D K Mathur)
 Registrar
 Jaipur National University
 Jaipur

B.Sc. (Hons.) Agriculture	BAG353	Principles of Plant Biotechnology	2016-17	Study the modern scientific method to multiply the plants in laboratory in large quantities nutritional requirements of in vitro cultures micropropagation, anther culture, pollen culture, ovule culture, embryo culture, test tube fertilization, endosperm culture, synthetic seed production technology, applications in crop improvements, genetic engineering gene transfer technique plant regeneration, synthetic seed production plant tissue culture laboratory these topics help to increase employability in laboratory related work and synthetic seed and plant development based industry.
B.Sc. (Hons.) Agriculture	BAG354	Crop and stored grain pests and their management	2016-17	Student will learn to identify grain pests and their management, management of insect pests, preventive and curative methods for control of stored grain pests which is help to increase employability in pesticide industry and warehouse based work.
B.Sc. (Hons.) Agriculture	BAG355	Breeding of Field and Horticultural Crops	2016-17	The study of breeding of several field & horticulture crops use full in developing new variety by using different methods disease and pest resistance and quality (physical, chemical, nutritional and marketing) improvement, conventional and non-conventional breeding methods, important varieties heterosis and inbreeding which help to develop employability in new variety released and seed based industry.
B.Sc. (Hons.) Agriculture	BAG356	Agricultural Marketing, trade and Prices	2016-17	This course provides knowledge in area of market, classification, producers surplus, functions of marketing, marketing channels, Efficiency, role of govt. in marketing, international trade etc. This knowledge will be helpful in getting job in the field of agriculture marketing.
B.Sc. (Hons.) Agriculture	BAG357	Protected cultivation and Post harvest Technology	2016-17	Students learn to growing of plants in green house glass house and poly house etc Green house technology Green houses equipments post harvest engineering Silos; Grain storage structures and requirements of good storage structure.
B.Sc. (Hons.) Agriculture	BAG358	Diseases of Field Crops and their management	2016-17	Students will learn to identify different diseases of field crops and their management, economic importance, disease cycle, management of diseases, study of symptoms, etiology, host-parasite relationship and control measures of diseases. This knowledge will be helpful in getting job in the field of pesticide industry.
B.Sc. (Hons.) Agriculture	BAG359	Production technology of Spices, Aromatic and Medicinal crops	2016-17	Students take up self employment in spices, medicinal and aromatic plant cultivation and herbal drug formulation pharmaceutical industry, propagation techniques of spices, aromatic and medicinal crops, processing and curing of spices, cost of cultivation of spices, nurseries. This knowledge will be helpful in develop employability in the field of pharmaceutical industry and these crop based industry.

 (Prof. D K Mathur)
 Registrar
 Jaipur National University
 Jaipur

B.Sc. (Hons.) Agriculture	BAG361	Practical Crop Production –II (Rabi)	2016-17	Students take up self employment in crop planting, raising field crops in multiple cropping systems, field preparation, seed treatment, nursery raising sowing, fertilizer application, water management, weed management, intercultural operation, management of insect, pest and diseases of crop, harvesting, threshing, drying, winnowing, storage and marketing of produce, preparation of balance sheet including cost of cultivation, net return. This knowledge will be helpful in getting job in nursery based work farm work.
B.Sc. (Hons.) Agriculture	BAG362	Farming Systems, Sustainable Agriculture and Organic Farming	2016-17	Students learn to different farming system related to sustainable agriculture, also study about land degradation and conservation, Organic farming, organic manures, vermicomposting, green manuring, recycling of organic residues, biofertilizers, soil amendments, integrated diseases and pest management preparation of integrated farming system model for wetlands, preparation of integrated farming system model for drylands, preparation of enriched farm yard manure; preparation of vermicompost. This knowledge will be helpful in getting job in organic farm and manure based industry and self employability in organic farming.
B.Sc. (Hons.) Agriculture	BAG363	Principles of Seed Technology	2016-17	The scholars study about various test of seeds and classes of seed production. This has lot of employment opportunity in seed industry and technology, seed demand forecasting and planning of certified, foundation and breeder seed production, seed multiplication, maintenance and multiplication of pre-release and newly released varieties in self and cross pollinated crops, seed production- foundation and certified seed production of maize, bajra, sorghum (hybrids, synthetics and composites), rice, cotton, tomato and hybrids: chillies and cucurbits (varieties and hybrids), state seed testing laboratories; duties and powers of seed inspectors, offences and penalties, seed treatment, seed marketing marketing structure, marketing organization which is help to increase employability in seed based industry.
B.Sc. (Hons.) Agriculture	BAG364	Extension Methodologies for Transfer of Agricultural Technology	2016-17	Students learn to different extension programme of different agricultural activities related to village, extension programme extension teaching methods, method and result demonstrations, small group discussion techniques – Lecture, Panel, Workshop, Syndicate group, Brain Storming, Seminar, Conference and Buzz group, Mass contact Methods- Campaign, Exhibition, Kisan Mela, Radio & Television -Meaning, Importance, steps. This knowledge will be helpful in getting job in different project which release by government and private sector.

 (Prof. D K Mathur)
 Registrar
 Jaipur National University
 Jaipur

B.Sc. (Hons.) Agriculture	BAG365	Livestock Production and Management	2016-17	Students learn important exotic and Indian breeds of cattle, buffalo, sheep, goat and swine and also study about milk secretion, milking of animal and factor affecting milk yield and composition, meat production, disease control measures, sanitation and care preservation and marketing of eggs housing and management of poultry. This knowledge will be helpful to creat self emplobility in poultry, animal production and milk and milk based product industry.
B.Sc. (Hons.) Agriculture	BAG366	Environmental Science**	2016-17	Students learn from the polution aspects from agriculture industrial ,hazards wasts also learn the activities of enviromental act,disaster management, forest conservation oil nuclear hazards and industrial wastes, estimation of chlorophyll, estimation of ascorbic acid (Vitamin C), estimation of pesticide contamination in agro-ecosystem bio-chemical oxygen demand (BOD) determination of heavy metals in sewage and sludge, total dissolved solids (TDS) chemical oxygen demand (COD). This knowledge will be helpful in getting jon in lab realted work and disaster management work.
B.Sc. (Hons.) Agriculture	BAG367	Post harvest management and value addition of fruits and vegetables	2016-17	This course creat self emplyoment in post-harvest handling of fruits and vegetables, processing of fruits and vegetables also study about methods of storage – pre-cooling, pre-storage treatments, low temperature storage, controlled atmospheric storage, hypobaric storage, irradiation and low cost storage structuresPreparation of jams, jellies, marmalades, candies, crystallized and glazed fruits, preserves, chutneys, pickles, ketchup, sauce, puree, syrups, juices, squashes and cordials construction of zero energy cool chambers for on farm storage, preparation of chutneys, pickles, sauces and ketchup. This knowledge will be helpful in creat employbility in post harvest product making industry.
B.Sc. (Hons.) Agriculture	BAG368	Diseases of Horticultural Crops and their management	2016-17	Students learn to different desease of horticultural crops and their management also study about control measures of diseases of citrus, mango, grapevine, pomegranate, papaya, guava, ber, potato, tomatoto, chilli, brinjal, bhindi, pea, onion. This knowledge will be helpful in develop employbility in pesticide industry.
B.Sc. (Hons.) Agriculture	BAG369	Fundamentals of Agri. Business Management	2016-17	Study about the agro based industery their management agribusiness, agricultural policy, agribusiness management, capital management, financial management of agribusiness, financial statements, balance sheet, profit and loss statement, analysis of financial statements, agro-based industries, marketing management, preparation of project reports dairying, poultry, fisheries and agro-industries etc, project appraisal techniques: case study of agro-based industries, retail trade commodity trading, agribusiness finance limited of input markets: seed, fertilizers, pesticides. This knowledge will be helpful in getting job in marketing and related industry.

(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

B.Sc. (Hons.) Agriculture	BAGEHA471	Bio-control agents and Bio-pesticides	2016-17	Students learn about the entomology and also study about using the bio pesticides and bio control agents to substitute chemical pesticides and reduce the toxicity mass production of NPV, Bt and metarrhizium anisopliae natural enemies, techniques of biological control production and multiplication of biocontrol IPM, biological control. This knowledge will be helpful in developed employability in biocontrol based industry .
B.Sc. (Hons.) Agriculture	BAGEHA472	Vermi-composting and Organic farming	2016-17	Students learn to different method of vermi -culture and organic farming vermitechnology, agriculture waste and organic recycling of nutrients preparation of vermicompost, biofertilizers, determination of organic carbon, N, P and K content of soils under organic farming. This knowledge will be helpful in getting job related to lab work and developed self employability in biofertilizer and vermicompost manufacture based industry.
B.Sc. (Hons.) Agriculture	BAGEHA473	Tissue culture and Micro-propagation techniques	2016-17	Students learn to different tissue culture and micropropagation technique, self employability in setting up of commercial micro propagation unit - lab and hardening unit design, equipment, lab wares, biosafety measures and waste disposal, legislative requirement and govt. incentive, techniques in micro propagation, marketing and supply chain management, media preparation explant preparation, preparation of synthetic seeds. This knowledge will be helpful in developed employability in making tissue culture plant and synthetic seed development
B.Sc. (Hons.) Agriculture	BAGEHA475	Nursery Management of Horticultural Crops	2016-17	Nursery establishment of horticultural crops and self employment of propagation material and equipment and also study about layout of nurseries and management vegetable nursery, multiplication of plants by cutting, layering, grafting, budding and in vitro propagation PGRs in plant propagation grafting in horticultural crops, use of plant growth regulators in propagation, potting, repotting or lifting of saplings (packaging). This knowledge will be helpful in self employability in nursery development.
B.Sc. (Hons.) Agriculture	BAGEHA476	Commercial Vegetable Production	2016-17	The study of this course students learn to commercial cultivation of different vegetables with advance technic on commercial scale, storage techniques of vegetable crops, net house practice of emasculation seed production in root crops preparation of nursery bed which is help to increase self employability in different vegetable production techniques.
B.Sc. (Hons.) Agriculture	BAGEHA478	Plant Growth regulators in Agriculture	2016-17	Students learn to application of PGR in agriculture also study about plant growth regulators, flower and fruit drop and their control measures, plant hormone in seed, fruit and grain formation, weed control and plant hormones. This knowledge will be helpful in developed self employability in PGR used in agro crop and PGR based industry.

(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

B.Sc. (Hons.) Agriculture	BAGESS471	Marketing Management	2016-17	The study of marketing management provides thorough knowledge of the area, marketing management, new product development, product mix, branding, packaging and labeling, pricing policies, strategies and pricing methods, performance analysis of regulated market and marketing societies, price spread and marketing efficiency analysis, . Which helps students in getting job, self employment, in public as well as private sector.
B.Sc. (Hons.) Agriculture	BAGESS472	Project Formulation, Evaluation and Monitoring	2016-17	Students get specialization in formulation and evaluation of projects, reports, agriculture projects formulation, appraisal, implementation, monitoring and evaluation and also study about project feasibility project appraisal techniques, discounted and undiscounted techniques, compounding, payback period, annual return on investment, proceeds per unit of outlay, NPW, B-C ratio, IPR, profitability index, sensitivity analysis, project monitoring and evaluation: Ex-ante evaluation, mid course evaluation and ex- post evaluation, numerical exercises on techniques of project appraisals, which has employment opportunities in the area of project management.
B.Sc. (Hons.) Agriculture	BAGESS473	Natural Resource Economics and Management	2016-17	Students learn to the natural resources use in economic way aand apply the same management practice on farm, natural resource economics, natural resources management and conservation, issues in natural resources and management, important issues in economics and management of land, water and forest resource and the environment, natural resources administration and policy formulations, optimum harvest of forestry,fishery,environmental impact assessment. This knowledge will be helpful in develop employability in pesticide industry.This knowledge will be helpful in getting job in marketing and agricultrre based industry.
B.Sc. (Hons.) Agriculture	BAGESS475	Govt. Policies and Priogrammes on Agriculture	2016-17	Study of this course creat self emplobility in different government polices and programmes applicable in agriculture sector, development programmes for agriculture, public-private partnership, agriculture related enterprise, MNREGA etc.
B.Sc. (Hons.) Agriculture	BAGESS477	Dairy Cattle Production	2016-17	After pursuing courses in this field students will be able to work with farm, zoo and lab animals anywhere in India and in abroad. Dairy sector also offers large self employment opportunities. students can also do teaching jobs in universities or colleges. Students can become professionals in this field including poultry, livestock, dairy and farmers. Most common career in animal husbandry is animal technician, animal caretaker, breeding supervisor and livestock farm manager. breeds of cattle and buffalo dairy farm, clean milk production milking machine and its operation, pregnancy diagnosis, artificial insemination hay and silage making

 (Prof. D K Mathur)
 Registrar
 Jaipur National University
 Jaipur

B.Sc. (Hons.) Agriculture	BAGESS478	Poultry Production and Management	2016-17	Students learn this course food and food industries. Food industry will always need bright, ambitious, educated employees to help them produce it. A poultry hand is likely to be involved in a wide range of tasks, working under limited supervision. The tasks may include: handling and identifying chickens, hatchery maintenance, operating machinery and equipment. Which is help to creat emplobility in food industry and related other food based industry.
B.Sc. (Hons.) Agriculture	BAG481	Orientation	2016-17	It will provide an opportunity to the students to
B.Sc. (Hons.) Agriculture	BAG482	Research Station/KVK/ including village attachment and <i>In-situ</i> interaction of farmers, students and research station scientists	2016-17	
B.Sc. (Hons.) Agriculture	BAG483	Industrial Attachment*/Skill Development/Experiential Learning Courses	2016-17	
B.Sc. (Hons.) Agriculture	BAG484	Educational Tour	2016-17	
B.Sc. (Hons.) Agriculture	BAG485	Project Report Preparation and Evaluation	2016-17	
B.Sc. (Hons.) Horticulture	BHT 111	Elementary Statistics and Computer Applications	2019-20	Students learn to different Introduction to Computer Applications programme which is used in agriculture. Student also learn about Tests of Significance, experimental designs, MS Excel-Concept of electronic spreadsheet, creating, editing and saving of spreadsheet DOS and Windows, MS Word- Features of word processing Computer application graphical representation, histogram, frequency polygon, frequency curve, bar chart, simple, multiple, component and percentage bar charts, pie chart basic language, visual basic, programming techniques, MS Office, Excel, power point which help of student in agriculture based industry work.
B.Sc. (Hons.) Horticulture	BHT 112	Fundamentals of Soil Science	2019-20	Student learn how to identify soils, classification of soils and soil analysis in lab and stablsh own soil testing laboratoury. Students practcally learn about soil reaction-pH, soil acidity and alkalinity soil organic matter soil pollution determination of soil pH and electrical conductivity, cation exchange capacity of soil which help in selection of crop for particular soil type. Student also study of soil map, determination of soil colour, estimation of organic matter content of soil which help of student to modified soil structure for crop sowing.

(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

B.Sc. (Hons.) Horticulture	BHT 113	Economics and Marketing	2019-20	Students are acquainted about fundamentals of economics and marketing , projects , prepration of reports , swot analysis etc. this increases their basic knowledge and understanding. Student learn about marketing process,preparation of project reports, Insurance, SWOT analysis, agricultural products study of SWC, CWC and STC commodities which is help to undrestand agricltre market and there work.
B.Sc. (Hons.) Horticulture	BHT 116	Fundamentals of Horticulture	2019-20	Students practically learn commercial nursery establishment/ Development of fruit orchard/self-employment kitchen garden which is help to students as a self employer. Students learn about floriculture irrigation methods, preparation and application of growth regulators rejuvenation, market chain management, layout of nutrition garden, preparation of nursery beds weed management, fertility management which is help in increase quality and quantity of production.
B.Sc. (Hons.) Horticulture	BHT 117	Principles of Landscape Architecture	2019-20	Practically cropping knowledge of ornamental crops which help to students employ as a gardner. Providing knowledge in practicaly in field for landscaping which help to emplobility as landscaper in different government and private industrial sites. Practicaly developed different types of garden which help to employer as architect landscaper.
B.Sc. (Hons.) Horticulture	BHT 119	Introductory Microbiology	2019-20	Students learn to different microbial expriment related to agricultural, this course involves the study of microorganisms with particular emphasis on the biology of bacteria, viruses, fungi and protozoan parasites which help to prevent to crops by insect -pest. Students Practicaly learn about organic and inorganic matter,plant growth promoting microorganisms and mushrooms culturing and production techniques Industrially important microorganisms in large scale production and common microbial fermentations.
B.Sc. (Hons.) Horticulture	BHT 120	Communication Skills and Personality Development	2019-20	Students learn to different comprehensive and communication skills and personality development, public speaking, group discussion,report writing, letter writing (different types of letters), spoken english, conversations of everyday life which is help in improve there personality and working ability.
B.Sc. (Hons.) Horticulture	BHT 121	Tropical and Subtropical Fruits	2019-20	The students learn to different production technic of tropical fruits cultivation with important varities. Students learn about use of plastics, manure and fertilizer application including bio-fertilizer in fruit crops, preparation and application of growth regulators, seed production latex extraction in qualitive and maximum fruit production.
B.Sc. (Hons.) Horticulture	BHT 122	Tropical and Subtropical Vegetables	2019-20	The students learn to different commercial vegetable crops nursery establishment, production of tropical and subtropical vegetables in open condition as well as in green house whichis increase self-employment.
B.Sc. (Hons.) Horticulture	BHT 123	Principles of Plant Breeding	2019-20	Students study about disired change in the chracterstics of genotype plant, with the help of this new high yielding varieties can be develop this has lot of scop in seed industry which gives employability.

B.Sc. (Hons.) Horticulture	BHT 124	Soil Fertility and Nutrient Management	2019-20	Students learn to identify nutrient deficiency symptoms and its management and soil testing in lab. Students also learn about soil test crop response and targeted yield analysis of soil for organic matter, available N,P,K and micronutrients gypsum requirement of saline and alkali soils, lime requirement of acid soils, estimation of organic carbon content in soil, determination of boron and chlorine content In soil, biofertilizer and aslo estimation of water soluble P ₂ O ₅ , Ca and S in SSP, lime and gypsum, estimation of Potassium which help to increase crop production.
B.Sc. (Hons.) Horticulture	BHT 125	Water Management in Horticultural Crops	2019-20	Students learn to different systems of water in horticultural crops water budgeting, layout of different irrigation systems, drip, sprinkler, layout of underground pipeline system, layout for different methods of irrigation and irrigation efficiency and water requirements of horticultural crops, irrigation planning and scheduling which is increase quality and quantity of horticulture crops.
B.Sc. (Hons.) Horticulture	BHT 126	Plant Propagation and Nursery Management	2019-20	Students will learn commercial nursery establishment, development of different type of fruit crop cuttings in commercial scale which increase self-employment . Student study about mist chamber, humidifiers, greenhouses, glasshouses, cold frames, hot beds, poly-houses, phytotrons nursery (tools and implements), use of growth regulators in seed, types and stages of seed germination plant growth regulators for seed germination and vegetative propagation, nutrient and plant protection applications during nursery.
B.Sc. (Hons.) Horticulture	BHT 127	Environmental Studies and Disaster Management	2019-20	Students learn to environmental studies and disaster management also study about In-situ and Ex- situ conservation of biodiversity , value education heat and cold waves, climatic change disaster management- river, forest, grassland, catchment etc. to document components of ecosystem which is help to understand enviornment and improve crop cultivating techniques and prevent enviornment.
B.Sc. (Hons.) Horticulture	BHT 128	Growth and Development of Horticultural Crops	2019-20	Students learn to different growth phases and plant growth regulators of horticultural crops plant bio-regulators- auxin, gibberellin, cytokinin, ethylene inhibitors and retardants also study about crop development and dynamics (Case studies of annual/perennial horticultural crops), pruning and training physiological basis of training and pruning-source post-harvest storage hormones and growth retardants, control of flower and fruit drop. Students also known as important physiological disorders and their remedial measures in fruits and vegetables, seed dormancy, seed germination and breaking seed dormancy with chemicals and growth regulators which help to better growth of plant.

 (Prof. D K Mathur)
 Registrar
 Jaipur National University
 Jaipur

B.Sc. (Hons.) Horticulture	BHTNC129	Physical and Health Education	2019-20	Students learn to different physical activities related to education, physical education exercise for good posture, physical fitness exercises athletic events – broad jump, high jump, triple jump, javelin throw, discuss throw, shot put, short and long distance running, training, coaching for major games and indoor games Yoga which help to active and healthy mind and body.
B.Sc. (Hons.) Horticulture	BHTNC130	Information and communication technology*	2019-20	Students wil learn communication skills and personality development Internet applications, web browsing, creation and operation of email account also study about WINDOWS and LINUX Video conferencing, computer fundamentals, hardware and software, Input and output devices which help to students for there project study and also improve there woring ability.
B.Sc. (Hons.) Horticulture	BHT 231	Fundamentals of Plant Pathology	2019-20	Students study the morphology of plant pathogens and principles of plant disease management and also identification and isolation of plant pathogens which help to controle differet disease with different method like Integrated plant disease management, commonly used fungicides, bactericides and nematocides.
B.Sc. (Hons.) Horticulture	BHT 233	Temperate Vegetable Crops	2019-20	Students practically learn commercial vegetable crops, nursery establishment, production of temeptrate vegetables in open condition as well as in green house which increase self-employment.
B.Sc. (Hons.) Horticulture	BHT 234	Nematode pests of horticultural crops and their Management	2019-20	Students study about the morphology of nematodes and management of diseases caused by them and they become ready as a pathologist.
B.Sc. (Hons.) Horticulture	BHT 235	Diseases of fruit, Plantation, Medicinal and Aromatic Crops	2019-20	Students will learn management of diseases of fruits plantation and arometic crop which is help to increase production of hortculure crops which help in self emplobility and as a pathologist.
B.Sc. (Hons.) Horticulture	BHT 236	Fundamentals of Food Technology	2019-20	To familiarize the students about the processing and preservation techniques of pulses, oilseeds, spices, fruits and vegetables, meat, fish, poultry, milk & milk products and emphasize the importance of food safety, food quality, food plant sanitation, food laws and regulations, food engineering and packaging in food industry which is help toin future as a food safety officer and self employer and startups.
B.Sc. (Hons.) Horticulture	BHT 237	Temperate Fruit Crops	2019-20	The students learn to different production technic of temprate fruit cultivation with chilling requirment post-harvest technology and marketing of different temprate vegetable and there nursery management, physiological and nutritional disorders and their correctionsand post-harvest handling which is incese production of vegetable and self employability.
B.Sc. (Hons.) Horticulture	BHT 238	Weed Management in Horticultural Crops	2019-20	The students learn to different methods of weed management in horticultural crop and concepts of weed prevention, control and eradication methods of weed control- physical, cultural, chemical and biological methods, integrated weed management, herbicides, economics of weed control practices which is help to control weeds and increase production of crops and self employment as a consultant.

B.Sc. (Hons.) Horticulture	BHT 239	Commercial Floriculture	2019-20	The students will learn about green house production of flower crops and landscaping, quality seed production, floral designers, also known as florists, use flowers, leaves and petals to create arrangements for occasions like weddings, holidays and funerals floral production managers and floral sales representatives.
B.Sc. (Hons.) Horticulture	BHT 240	Elementary Plant Biotechnology	2019-20	In this courses student are taught new molecular techniques for multiplication of plants. which are more efficient in respect of time and cost in comparison to traditional methods. This has vast scope for employment.
B.Sc. (Hons.) Horticulture	BHT 241	Soil, Water and Plant Analysis	2019-20	Students learn to basic principles of soil testing instruments and analysis of soil, plant and water which help to analysis soil sample.
B.Sc. (Hons.) Horticulture	BHT 242	Spices and Condiments	2019-20	Students take up self employment in spices, medicinal and aromatic plant cultivation and herbal drug formulation and develop employability in pharmaceutical industry.
B.Sc. (Hons.) Horticulture	BHT 243	Ornamental Horticulture	2019-20	Students will learn green house production of flower crops and landscaping, quality seed production design and establishment different type of garden like shade garden, sunken garden, roof garden, terrace garden, pebble garden, rockery, pools, waterfalls, fountains, bog garden, avenue planting and children garden which is help to develop career as landscaper and other related employability.
B.Sc. (Hons.) Horticulture	BHT 244	Plantation Crops	2019-20	The study of this course students learn different production technique of plantation crops production, export and import industrial importance principles and practices of seed, vegetative and micro- propagation, identification of species and varieties in coffee, harvesting, grading, pulping, fermenting, washing, drying and packing of coffee, seed berry collection, seed extraction, treatment and sowing of coffee, epicotyl, softwood, grafting and top working in cashew, preparation of cuttings and rooting of tea under specialized structure, training, centering, pruning, tipping and harvesting of tea which help to as a self employer and startup based on agri farming.
B.Sc. (Hons.) Horticulture	BHT 245	Breeding of Fruit and Plantation Crops	2019-20	In this course students are taught various breeding techniques of developing and improving the varieties of different fruits and plantation crops which help to career as a breeder and employability in seed industry.
B.Sc. (Hons.) Horticulture	BHT 246	Farm Power and Machinery	2019-20	Students learn to different farm machinery and their uses and electric motors primary tillage implements, Junior hoe, weeders, long handle weeders, crop harvesting equipments, grafting, pruning and training tools and equipment primary and secondary tillage implements, plant protection equipment which help to students employer in farm machinery industry.

Jaipur National University
Jaipur

B.Sc. (Hons.) Horticulture	BHT 247	Insect Pests of Fruit, Plantation, Medicinal & Aromatic Crops	2019-20	study the insects pests of fruits plantation and aromatic crops and their management and insecticide residue problems in fruit, plantation, medicinal and aromatic crops and their maximum residue limits and also learn about symptoms of damage, collection, identification, preservation, assessment of damage and population of important insect – pests affecting fruits, plantation, medicinal and aromatic crops in field and storage which is help to develop employability in pharma and other industry.
B.Sc. (Hons.) Horticulture	BHT 248	Precision Farming and Protected Cultivation	2019-20	Students learn to different protected conditions for ex. poly house, net house green house etc. and precision farming, green house technology, hydroponics, fertigation economics of protected cultivation which increase self employability and increase employability in related industry.
B.Sc. (Hons.) Horticulture	BHT 249	Dry land Horticulture	2019-20	Students learn to different water management system in dry land horticulture and production technology of dry land crops – Mango, Cashew, Jack, Sapota, Tamarind, Wood apple, Jamun, Guava, Carambola, Amla, Sitaphal, Fig, Ber, Karonda, drumstick and techniques and practices in orchards, mulches, integrated nutrient and water management, drip and pitcher irrigation which have employment potential, income generating agro based enterprises (Dairy, Poultry, Sericulture, Piggery, Sheep and Goat farming) crop protection, yield attributes and quality.

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
BABED	BABED101	Essential Language Skills-I +A274:B306	2016-17	Entrepreneurship/ Skill development
BABED	BABED102	Sociology-I (Introduction to Sociology)	2016-17	<ul style="list-style-type: none"> Sociological theories. Explain processes of socialization. Inter-dependence of social institution. linkages of Sociology with other Social Sciences (Social Worker, Good Teacher, Social Critic)
BABED	BABED103	Sociology-II (Indian Society)	2016-17	<ul style="list-style-type: none"> The pluralistic nature of society. Inequalities existing in the society. Need of sociological reasoning. Colonial view of Indian society and the growth of sociology in India. ((Family Counsellor, Community Service Worker, Guidance Counsellor)
BABED	BABED104	History-I (Ancient History of India- Early times to 185 BC)	2016-17	Paleolithic cultures- sequence and distribution; stone industries and other technological developments Mesolithic cultures- regional and chronological distribution; new developments in technology and economy; rock art. Understanding the regional and chronological distribution of the Neolithic and Chalcolithic cultures: subsistence, and patterns of exchange
BABED	BABED105	History-II (History of Rajasthan- Early Times to 1750 AD)	2016-17	A survey of the sources of the history of Rajasthan. Paleolithic and Mesolithic and Neolithic age in Rajasthan A brief survey of the main features of the society and culture in Rajasthan. (1200-1750AD). Meera and Dadu. Art and architecture-fort architecture, temples. Religion
BABED	BABED106	Political Science-I (Introduction to Political Science)	2016-17	Entrepreneurship/ Skill development
BABED	BABED107	Political Science-II (Introduction to Political Theory)	2016-17	Entrepreneurship/ Skill development
BABED	BABED108	English Literature -I (Poetry and Drama)	2016-17	Entrepreneurship/ Skill development
BABED	BABED109	English Literature -II (Prose and Fiction)	2016-17	Entrepreneurship/ Skill development
BABED	BABED110	Geography-I (Physical Geography)	2016-17	Entrepreneurship/ Skill development
BABED	BABED111	Geography-II (Geography of Rajasthan)	2016-17	Entrepreneurship/ Skill development
BABED	BABED112P	Geography-III (Practical)	2016-17	Entrepreneurship/ Skill development
BABED	BABED113	Economics -I (Micro Economics- Basics)	2016-17	Entrepreneurship/ Skill development

(Prof. D K Mathur)
 Registrar
 Jaipur National University
 Jaipur

BABED	BABED114	Economics –II (Micro Economics - Advanced)	2016-17	Entrepreneurship/ Skill development
BABED	BABED115	Psychology-I (Introduction to Psychology)	2016-17	Entrepreneurship/ Skill development
BABED	BABED116	Psychology-II (Human Development)	2016-17	Entrepreneurship/ Skill development
BABED	BABED117P	Psychology - III(Practical)	2016-17	Entrepreneurship/ Skill development
BABED	BABED118	Hindi Literature-I (हिंदी भाषा का उद्भव एवं विकास)	2016-17	Entrepreneurship/ Skill development
BABED	BABED119	Hindi Literature-II (भारतीय काव्यशास्त्र)	2016-17	Entrepreneurship/ Skill development
BABED	BABED120	Drawing and Painting –I(Fundamental of Visual Art and Indian Folk Art)	2016-17	Entrepreneurship/ Skill development
BABED	BABED121P	Drawing and Painting-II (Practical- Rendering)	2016-17	Entrepreneurship/ Skill development
BABED	BABED122P	Drawing and Painting -III (Practical- Still Life)	2016-17	Entrepreneurship/ Skill development
BABED	BABED123	Home Science-I (Physiology / Applied Life Science)	2016-17	Family housing needs- Protective, economic and social. Factors effecting selection and purchase of site for house building- legal aspects, location, physical features, soil conditions, cost, service. Arrangement of rooms and kitchen. Design- Decoration and structural. Colour- properties, classification and colour schemes. Furniture- types, styles and arrangement. Lighting - types, styles and arrangement. Flower arrangement- types, styles and arrangement Accessories - types, styles and arrangement.
BABED	BABED124	Home Science-II (Family Resource Management & Housing)	2016-17	<ul style="list-style-type: none"> • Digestive System – Structure and functions of different parts of alimentary canal. • Digestive glands – their location and secretion. • Structure and function of Sex glands and organs including hormones • Menstrual Cycle • Physiology of pregnancy, parturition, lactation and menopause • Muscular-Skeletal System • Types of muscles, functions • Skeletal System- formation of bone and teeth
BABED	BABED125P	Home Science-III (Practical)	2016-17	Entrepreneurship/ Skill development
BABED	BABED126	Urdu Literature –I	2016-17	Entrepreneurship/ Skill development
BABED	BABED127	Urdu Literature –II	2016-17	Entrepreneurship/ Skill development

B.Sc. BED	BSCBED405	Botany-I (Plant Physiology-I)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSCBED406	Botany –II (Plant Physiology-II)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSCBED407P	Botany-III (Practical)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSCBED408	Zoology –I (Bio-Chemistry and Immunology)	2016-17	• Detection of protein, carbohydrate and lipid in the animal tissue/ food samples. • Identification of different kind of mono-di and polysaccharides in the given food samples
B.Sc. BED	BSCBED409	Zoology –II (Structure and Function of Chordates)	2016-17	Adaptive Radiation, Dentition.
B.Sc. BED	BSBED410P	Zoology-III (Practical)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSCBED411	Mathematics –I(Real Analysis)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSCBED412	Mathematics –II (Optimization Techniques)	2016-17	mathematical formulation of A L.P.P, Optimization simplex algorithm, Applications of Linear Programming, solution of problem with finite number of stages.
B.Sc. BED	BSCBED413P	Mathematics-III(Project)	2016-17	Prepare a power point presentation of linear transformations, Prepare a file for linear programming and its applications.

B.Sc. BED	BSCBED414	Physics –I (Thermodynamics and Statistical Physics)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSCBED415	Physics –II (Elementary of Quantum Mechanics)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSCBED416P	Physics –III (Practical)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSCBED417	Assessment for Learning	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSBED501	Environmental Education	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSBED502	Chemistry –I (Physico-inorganic Chemistry)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSBED503	Chemistry-II (Physico-organic Chemistry)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSBED504P	Chemistry (Practical)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSBED505	Botany-I (Cell Biology and Immunology)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSBED506	Botany –II (Genetics and Plant Breeding)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSBED507P	Botany (Practical)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSBED508	Zoology –I (Micro Biology and Bio Technology)	2016-17	a. Size, Shapes and Patterns of Arrangement. b. Structural Organization: Slime Layer (Capsule), Cell envelopes: cytoplasmic membrane (inner membrane). Cell wall (outer membrane) of Gram-negative and Gram-positive bacteria, Recombinant DNA technology; hybridomas and their applications, PCR. DNA finger printing. DNA foot printing. RFLP, RAPD and AFLP, Human genome project. Genomics and proteomics
B.Sc. BED 	BSBED509	Zoology –II (Applied Zoology and Ethnology)	2016-17	Unit – I- Different culture methods Principles and practices of the following : 1. Vermiculture. 2. Sericulture (including Ericulture). 3. Lac culture 4. Apiculture 5. Prawn culture 6. Poultry keeping 7. Pisciculture
B.Sc. BED	BSBED510P	Zoology (Practical)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSBED511	Mathematics -I(Vector Calculus and Linear Algebra)	2016-17	Velocity, Acceleration, Displacement, Work done by force, Rank and Nullity of linear transformation. Mode of Transaction
B.Sc. BED	BSBED512	Mathematics –II (Mechanics)	2016-17	Entrepreneurship/ Skill development
B.Sc. BED	BSBED513P	Mathematics –(Project)	2016-17	Prepare a project for velocity and centre of gravity.
B.Sc. BED	BSBED514	Physics –I (Mathematical Physics)	2016-17	Entrepreneurship/ Skill development

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
B.Sc.Nursing	BN-405	Environmental Science (EVS)	2016-17	THIS SUBJECT KNOWLEDGE HELP THE PERSON TO SURVIVE AND BATTLE WITH POLLUTION IN EVERY AREA. CLIMATE CHANGES AND ITS IMPACT ON HEALTH AIR POLLUTION AND ITS IMPACT ON HEALTH HEAT WAVES AND ITS IMPACT ON HEALTH
BHMCT	BHMCT 306E	Environmental Management	2019-20	Knowledge about wines, beer, aperitifs and other alcoholic beverages
BHMCT	HKM- 604	Accommodation Management	2019-20	Flower Arrangements, Window Treatment, Care & Cleaning of Soft Furnishings
BHMCT	HKM- 654	Accommodation Management	2019-20	Maintaining various housekeeping formats & Files Flower arrangement
BHMCT	MIS- 655	Hotel Information System	2019-20	
BHMCT	BHMCT 704	Hospitality Marketing-I	2019-20	Calculation of Yield Management Ratios, Preparation of Sales Letters, Brochures, Promotional Letters
BHMCT	BHMCT 706	Research Methodology	2019-20	Maintaining various housekeeping formats & Files Flower arrangement
DIIMCT	BHMCT 804	Hospitality Marketing-II	2019-20	layout and design of Kitchen Stores Management
BHMCT	BHMCT 806	Entrepreneurship Management	2019-20	Developing entrepreneurial skills, Preparation of project report & business plan
B.Sc. H&HA	BHHA-18E	Environmental Management	2019-20	
B.Sc. H&HA	BHHA-24E	Strategic Management	2019-20	Interior decoration, stain removal, Care and maintenance of Floor
B.Sc. H&HA	BHHA-27	Food & Beverage Operation-III	2019-20	Planning & Operations of F&B outlets, Banquets and buffets
B.Sc. H&HA	BHHA-29	Food & Beverage Control	2019-20	F&B Operational Control, INVENTORY CONTROL , MATERIAL MANAGEMENT
B.Sc. H&HA	BHHA-30	Hospitality Marketing	2019-20	Marketing of hospitality products & services
B.Sc. H&HA	BHHA-31E	Business Finance	2019-20	Marketing of hospitality products & services
B.Sc. H&HA	BHHA-31E	Entrepreneurship Management	2019-20	Developing entrepreneurial skills, Preparation of project report & business plan
B.Sc. H&HA	BHHA-27 P	Food & Beverage Operation-III	2019-20	Planning & Organising catering in Functions, Buffet Setup
B.Sc. H&HA	BHHA-33P	Hotel Information System	2019-20	Planning & Organising catering in Functions, Buffet Setup

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
B.Tech Biotechnology	PCC-BT.503	Bionanotechnology	2018-19	Students will learn about designing of biopolymers, polymer control drug delivery and drug targeting and delivery. This course will help to get jobs in biotech and pharma industries.
B.Tech Biotechnology	PEC-BT.505.2	Perl for Biologist	2018-19	This course will teach students about perl as programming language that help in development of computational biology program in proteomics and genomics. This will help the students to get employment as biological data analyst in research laboratories.
B.Tech Biotechnology	PEC-BT.505.3	JAVA for Biologist	2018-19	This course will teach students about perl as programming language that help in development of computational biology program. This will help the students to get employment in bioinformatics and biological data analysis.
B.Tech Biotechnology	LC-BT.508.2	Perl for Biologist Lab	2018-19	This language will help students to quickly develop scripts (short programs) for scanning or transforming large amounts of data such as processing and manipulation of long sequences of DNA and proteins. This will help the students to get employment as bioinformatics scientist or as biological data analyst.
B.Tech Biotechnology	LC-BT.508.3	JAVA for Biologist Lab	2018-19	Students will learn BioJava as a mature open-source project that provides a framework for processing of biological data. This course will teach students powerful analysis and statistical routines, tools for manipulating sequences and 3D structures. This will help the students to get employment as Programming Biologist.
B.Tech Biotechnology	PEC-BT.605.3	Molecular Farming	2018-19	This course will teach students about the technology for recombinant protein production, biopharmaceuticals and edible vaccines and downstream processing of plant derived recombinant therapeutic proteins. This will help the students to get employment in agricultural sectors, pharmaceutical firms and manufacturing industries, scale up engineer in fermentation industries or as senior process designer in biotech or pharma industries.
B.Tech Biotechnology	PCC-BT.703	Animal cell and plant tissue culture	2018-19	This course will teach students about basic requirements for setting up a tissue culture laboratory, production of haploid plants and development of salt and drought resistance plants. Students will get employment opportunity as Ph.D scholar, senior research fellow in university or as a senior laboratory technician in a biotech industry.
B.Tech Biotechnology	PEC-BT.705.1	Medical Biotechnology	2018-19	Students will learn about molecular basis of complex human diseases and their diagnosis. This course will help the students to get jobs in medical coding and healthcare related companies.
B.Tech Biotechnology	PEC-BT.705.2	System Biology	2018-19	Students will learn about computational and mathematical analysis and modelling of complex biological system. This course will help the students to get jobs research centers as data analyst.

(Prof. D K Mathur)
Registrar
Jaipur National University

B.Tech Biotechnology	PEC-BT.705.3	Metabolic Engineering	2018-19	Students will learn about different network motif, transcription and translation levels and designing of strains for industrial level. This course will help the students to get jobs in R & D laboratories and in fermentation industry.
B.Tech Chemical Engineering	PCC- CH304	Material & Energy Balance	2019-20	Ability to solve material and energy balance problems and apply this knowledge to process flow sheeting in any chemical process industries viz., petroleum industry, petrochemical industry.
B.Tech Chemical Engineering	PCC-CH309	Material & Energy Balance (Lab)	2019-20	Ability to solve material and energy balance problems involving recycle, bypass and purge, with chemical reaction and energy balance using enthalpy changes and solve energy balance involving chemical reactions in various chemical industries viz., petroleum industry, petrochemical industry.
B.Tech Chemical Engineering	PCC-CH401	Mechanical Operation	2019-20	This course gives employability by using the size reduction equipment and analysis the sieving performances using different sieve as well as application of sedimentation like cement industries, mining and other chemical process industries.
B.Tech Chemical Engineering	PCC-CH403	Industrial Pollution Abatement	2019-20	This course gives the employability in the field of Central Pollution Control Board, State pollution control board, irrigation department and various R & D Sections by apply the water treatment method, abatement of atmospheric dispersion of air pollutants and solid waste.
B.Tech Chemical Engineering	PCC-CH407	Mechanical Operation Lab	2019-20	This course gives employability by using the size reduction equipment and analysis the sieving performances using different sieve as well as application of sedimentation like cement industries, mining and other chemical process industries.
B.Tech Chemical Engineering	PCC-CH409	Industrial Pollution Abatement Lab	2019-20	This course gives the employability in the field of Central Pollution Control Board, State pollution control board, irrigation department and various R & D Sections by apply the water treatment method, abatement of atmospheric dispersion of air pollutants and solid waste.
B.Tech Chemical Engineering	PCC-CH603	Inorganic Chemical Technology	2019-20	Through this course, student will get the employability in the process industries like; chloro-alkali, fertilizers, soaps and detergents, sugar manufacture, petroleum, paper and fermentation etc. by applying various unit operation and unit processes.
B.Tech Chemical Engineering	ESC-CH504	Optimization of Chemical Process	2019-20	This course will employable by using fundamentals of design algorithms and applying a mathematical translation of the verbal formulation of an optimization problem in process industries.
B.Tech Chemical Engineering	PEC-CH605.1	Process Utility & Industrial Safety	2019-20	This course employable for every process industries by using various risk assesment methodss in industries and hazard analysis using HAZOP.
B.Tech Chemical Engineering	PEC-CH605.2	Energy Management	2019-20	This course provides the employability in the every process industries like food, chemical, manufacturing by applying energy coservation techniques, energy audits.
B.Tech Chemical Engineering	PEC-CH605.3 	Pharmaceutical Technology	2019-20 	This course employable for various Pharmaceutical Industries like Cadila, Glaxo etc; by applying fundamental principles of pharmaceutical metrology and professional role in the healthcare system.
B.Tech Chemical Engineering	PCC-CH609	Chemical Technology Lab	2019-20 	Through this course, student will get the employability in the process industries like; chloro-alkali, fertilizers, soaps and detergents, sugar manufacture, petroleum, paper and fermentation etc. by applying various unit operation and unit processes.

B.Tech Chemical Engineering	ESC-CH610	Optimization Techniques Lab	2019-20	This course will employable in every process industries by using fundamentals of design algorithms and applying a To design algorithms, the respective use of which will lead reliably to find and approximate solution.
B.Tech Chemical Engineering	PCC-CH702	Process Plant Design & Economics	2019-20	This course gives the employability to measure profitability on investments. Perform breakeven analysis and optimum design of a process. It helps to calculate different costs involved in a process plant.
B.Tech Chemical Engineering	PEC-CH705.1	Process Integration	2019-20	Course create process integration with regard to energy efficiency, waste minimization and an efficient use of raw materials in process industries.
B.Tech Chemical Engineering	PEC-CH705.2	Material Science & Engineering	2019-20	Materials engineering is so broad that positions are available across many manufacturing and industrial sectors. Employers range from global corporations to small specialist research laboratories, which work with a variety of materials including ceramics, fibre, electronic equipments, glass, polymer, rubber, textiles etc.
B.Tech Chemical Engineering	PEC-CH705.3	Fuel Cell Technology	2019-20	Employment opportunities will open up in businesses that develop, manufacture, operate, and maintain the fuel cell systems. Jobs will also become available in businesses that produce and deliver the hydrogen and other fuels used by these systems
B.Tech. Computer Science Engineering Hons. In Cyber Security	PCC-CS115	Introduction to Cyber Security	2019-20	Allow to gain employability skill to Learn Cyber Security Basics
B.Tech. Computer Science Engineering Hons. In Cyber Security	PCC-CS213	Introduction to Information Security & Internet based Attacks	2019-20	Allow to gain employability skill to Learn Information Security & Internet based Attacks
B.Tech. Computer Science Engineering Hons. In Cyber Security	BCSIH206	Introduction to Information Security & Internet based Attacks	2019-20	1. Students learn to about information and its security. 2. Types of Security Attacks. 3. Students get the knowledge about how to prevent internet based attacks.
B.Tech. Computer Science Engineering Hons. In Cyber Security	BCSNS306	Network Security	2019-20	1. Students learn the cryptography concepts for the secure communication with different networks. 2. Knowledge of different security attacks system can encounter in networks.
B.Tech. Computer Science Engineering Hons. In Cyber Security	BCSMH409	Mobile Hacking and Malwares	2019-20	Students learn to about Mobile hacking and malwares. 2. Types of Mobile hacking 3. Knowledge about mobile malwares.
B.Tech. Computer Science Engineering Hons. In Cyber Security	BCSRE508	Software Reverse Engineering and Cyber Forensics	2019-20	1. Students learn the cryptography concepts for the secure communication with different networks. 2. Knowledge of working procedure of Cyber Forensics.
B.Tech. Computer Science Engineering Hons. In Cyber Security	BCSIS609	Information Security Management System	2019-20 (Prof. D K Mathur) Registrar Jaipur National University	1. Students learn to implement IP security for better and secure networks. 2. Students get the knowledge of system security to make the system secure while working on different networks. 3. Students learn the cryptography concepts for the secure communication with different networks. 4. Knowledge of different security attacks system can encounter in networks.

B.Tech. Computer Science Engineering Hons. In Cyber Security	ESC-EC310	Data Structures & Algorithms Laboratory	2017-18	The course is designed to develop skills to design and analyze simple linear and non linear data structures. It strengthen the ability to the students to identify and apply the suitable data structure for the given real world problem.
B.Tech. Computer Science Engineering Hons. In Cyber Security	ESC-EC410	Object Oriented Programming Laboratory	2017-18	Students are getting their hands on practice by doing the program based on C++ supporting object oriented programming , advanced features of C++ specifically stream I/O, templates and operator overloading.
B.Tech Electronic and Communication	PCC-EC501	Electromagnetic Waves	2019-20	Understand characteristics and wave propagation on high frequency transmission lines . Characterize uniform plane wave. Calculate reflection and transmission of waves at media interface Analyze wave propagation on metallic waveguides in modal form. Understand principle of radiation and radiation characteristics of an antenna
B.Tech Electronic and Communication	HSMC-EC506	Entrepreneurship Development	2019-20	Have the ability to discern distinct entrepreneurial traits.Know the parameters to assess opportunities and constraints for new business ideas.Understand the systematic process to select and screen a business idea.Design strategies for successful implementation of ideas. <u>Write a business plan.</u>
B.Tech Electronic and Communication	PCC-EC507	Electromagnetic Waves Lab	2019-20	Students will be able to do the hands on practice in the field of telecommunication , which is one of the demanding filed in Electronics.
B.Tech Electronic and Communication	PCC-EC603	Probability Theory and Stochastic Processes/ Random Variables and Stochastic Process	2017-18	At the end of this course students will demonstrate the ability to understand representation of random signals. Investigate characteristics of random processes. Make use of theorems related to random signals. To understand propagation of random signals in LTI systems.
B.Tech Electronic and Communication	PEC-EC604.3	Introduction to MEMS	2019-20	Students will explain MEMS Technology, Present, Future and Challenges.Students will be able to explain micro sensors, micro-actuators, their types and applications.Students will be able to explain about fabrication processes for producing micro-sensors and actuators. They will also be able to apply Reliability, and <u>Failure Analysis Testing</u>
B.Tech Electronic and Communication	OEC-EC605.1	Marketing for Engineers	2019-20	students can get the information about the principles of marketing, recent market ternds,maketing statergies and sentimental support to the market .They can also get knowledge about the entrepreneurship
B.Tech Electronic and Communication	HSMC-EC606	Professional Ethics & Disaster Management	2019-20	To appreciate the importance and values and ethics in implementing the technology and ensure sustainable development, happiness and prosperity. To understand the co-existence with nature and to be aware of potential natural and manmade disasters.
B.Tech Electronic and Communication	PCC-EC610	Minor Project Lab-II/Minor Project-III,Minor Project-IV	2017-18 2007-08	Provides the skills to apply the knowledge to implement and design the analog / digital systems.
B.Tech Electronic and Communication	PEC-EC 704.1	Introduction to Embedded Systems	2017-18	students will able to Understand the concept of Timer, Interrupt, I/O Port interfacing with Embedded system board. Design interfacing of the systems with other data handling / processing systems

(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

B.Tech Electronic and Communication	PCC-EC705.3	High Speed Electronics	2019-20	Understand the properties and fundamental limitations of high speed electronic systems in terms of the underlying physical principles. Quantitatively model and analyse high speed electronic systems and interconnects in both the digital and analogue domain. Simulate the behaviour of high speed electronic systems using software tools. Conduct basic test procedures for high speed signals and systems
B.Tech Electronic and Communication	OEC-EC706.2	Wind and Solar Energy Systems	2019-20	students are able to acquire different domains Maintain constant speed wind power plants. Maintain variable speed wind power plants.. Maintain concentrated solar power (CSP) and solar photovoltaic (PV) wind power plants. Check the grid compatibility of the power from wind and solar power plants. Resolve the grid integration issues of wind and solar power plants
B.Tech Electronic and Communication	PCC-EC801	Industrial Project	2017-18	Students will be able to apply their quick learning to provide the solution for routine problems in the form of an ideal working model using the different hardware and software combinations.
B.Tech Electronic and Communication	PCC-EC802	Comprehensive Viva-Voice	2017-18	students get the chance to improve his communication skills and Able to face the
B.Tech Electrical Engineering	PCC-EE710	Professional Practices-IV Lab	2017-18	Knowledge about industrial peripheral concepts.
B.Tech in Mechanical Engineering	MC ME 311	Environmental Science	2019-20	Teaches about the environment and ecology .
B.Tech in Mechanical Engineering	PCC ME 411	Internal Combustion Engine Lab	2019-20	To develop an intuitive understanding of thermodynamics by emphasizing the physics and physical arguments.
B.Tech in Mechanical Engineering	PCC ME 505.1	Computer Aided Machine Drawing	2019-20	Tells about drawing which can be drawn with the help of computer
B.Tech in Mechanical Engineering	PCC ME 505.2	Composite Materials Technology	2019-20	Tells about the materials which can be manufactured with the help of composites.
B.Tech in Mechanical Engineering	OEC -ME 506.1	Entrepreneurship	2019-20	Tells about various start ups which can make a person an entrepreneur.
B.Tech in Mechanical Engineering	OEC-ME 506.2	Professional Ethics & Disaster Management	2019-20	Teaches about the ethics and disaster management
B.Tech in Mechanical Engineering	PCC ME 509	Measurement and Metrology Lab	2019-20	teaches about the
B.Tech in Mechanical Engineering	PCC ME 510	Computer Aided Machine Drawing Lab	2019-20	Tells about drawing which can be drawn with the help of computer
B.Tech in Mechanical Engineering	PCC ME 606.2	Non Destructive Evaluation & Testing	2017-18	Students will be getting the latest knowledge of manufacturing processes
B.Tech in Mechanical Engineering	PCC ME 610	Mini Project	2019-20	Teaches about the projects of students the way of completion
B.Tech in Mechanical Engineering	PEC ME 704.2	Manufacturing Automation	2019-20	It provides The knowledge of automation in manufacturing
B.Tech in Mechanical Engineering	PEC ME 705.2	Project management	2019-20	It tells about projects and their management
B.Tech in Mechanical Engineering	OEC ME 706.1	Operation Techniques	2019-20	Apply the knowledge of Optimization Techniques
B.Tech in Mechanical Engineering	OEC ME 706.2	Total Quality Management	2019-20	It gives knowledge about quality management

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
Bachelor of Computer Applications	BCA-603	Graphics & Multimedia	2016-17	1. Students learn the concepts of computer graphics to design an application having advanced animation and
Bachelor of Computer Applications	BCA-652	Graphics & Multimedia Lab	2016-17	
Master of Computer Applications	MCA- 402	Advanced Java Programming	2016-17	1. Learning the concept of Java Student can integrate modern language features such as lambda expressions and streams in JDK 8. 2. Students learn the advance concepts for developing the business applications using them. 3. Learn to implement the different back end connectivity drivers for application design and development.
Master of Computer Applications	MCA-451	Advanced Java Programming	2016-17	1. Students learn the advance concepts for developing the business applications using them. 2. Learn to implement the different back end connectivity drivers for application design and development. 3. Knowledge of web based applications design and development using server programming. 4. Students learn the development of remote application that can have the client/server architecture.
Master of Computer Applications	MCA-505.3	Cloud Computing	2016-17	1. The knowledge of virtual machines to access the different programs on same machine using the cloud computing. 2. The knowledge of virtual machines to access the different programs on different machines using the cloud computing. 3. Cloud computing add a new dimension the developers have the ability to build, deploy, and manage applications quickly which scale to unlock the full capabilities of the cloud.
Master of Computer Applications	MCA-552.2	Data Warehousing and Data Mining Lab	2016-17	1. Students get the knowledge of data warehousing concepts which they can implement with the software development in organization. 2. Learn to implement different data mining techniques to be implemented while developing the applications in software industry. 3. Advance technological concepts help them to fine tuning the applications to perform better as per the client requirements. 4. Students can perform the role of data scientist. The data scientist's role is to decipher large volumes of data and carry out further analysis to find trends in the data and gain a deeper insight

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
Bachelor of Design - Fashion Design	BDFD-101	Basic of Fashion	2016-17	Global & Indian fashion Industry and role of merchandisers in the fashion industry. fashion theory and marketing of fashion goods.
Bachelor of Design - Fashion Design	BDFD-102	Sustainable Design (Environmental Studies)	2016-17	Develop the intellectual flexibility necessary to view environmental questions from multiple perspectives.
Bachelor of Design - Fashion Design	BDFD-103	Communication Skills	2016-17	Communication in different way and in different perspective
Bachelor of Design - Fashion Design	BDFDP-104	Basic Of Design	2016-17	Use different mediums and tools that are required for communicating design idea or blueprint of design that will encourage students to think, explore and create
Bachelor of Design - Fashion Design	BDFDP-105	Visualization & Representation-I	2016-17	Development of calculated ideas and creative patterns with using shapes like circle and ellipse. Improving how space develops from point, to line to area to volume , knowledge about isometric views of manmade objects. also improving drawings of Drawings for Cube, Cuboids, Cylinder, cone, Prism, Pyramid and variations
Bachelor of Design - Fashion Design	BDFDP- 106	Material Exploration-I	2016-17	To develop their skills in different areas: drawing, model-building, , and knowledge of materials applied to a design project.
Bachelor of Design - Fashion Design	BDFDP- 107	Computer Application	2016-17	Understanding Spread Sheet, on power point Excel like Work sheet, Basic database, MS Excel (Home), MS Excel (Insert), MS Excel (Page Layout)
Bachelor of Design - Fashion Design	BDFD-201	Introduction to textile	2016-17	Raw materials for textiles- woven, knitted, dyed and printed, properties of fabrics, Fabrics analysis
Bachelor of Design - Fashion Design	BDFD-202	Fabric Study (Woven)	2016-17	The construction of different fabrics
Bachelor of Design - Fashion Design	BDFD-203	Western Art Appreciation	2016-17	The construction of different fabrics
Bachelor of Design - Fashion Design	BDFDP-204	Visualization & Representation	2016-17	Visualize the object and represent it on the paper
Bachelor of Design - Fashion Design	BDFD-205	Material Exploration-II	2016-17	Focus on selecting materials in the first phase of design and developing the project until the end with the help of scaled models
Bachelor of Design - Fashion Design	BDFD-301	History of Western Costume	2016-17	The construction of different fabrics
Bachelor of Design - Fashion Design	BDFDP-304	Construction Techniques	2016-17	Learn about various sewing equipment that are essential in a sewing room. Gain an insight of various sewing machines available in the market, their functioning & common problems faced while usage. Get knowledge of basic stitches that a seamstress can employ in garment construction
Bachelor of Design - Fashion Design	BDFDP-307	Fabric Construction	2016-17	Process of making the fabric
Bachelor of Design - Fashion Design	BDFDP-504	Surface Ornamentation	2016-17	Embroideries, dyeing & printing and other surface ornamentation part.
Diploma in Fashion Design	DFD-101	Theory of Textile	2016-17	Raw materials for textiles- woven, knitted, dyed and printed, properties of fabrics, Fabrics analysis
Diploma in Fashion Design	DFD-102	History of fashion	2016-17	Global & Indian fashion Industry and role of merchandisers in the fashion industry. fashion theory and marketing of fashion goods.

Diploma in Fashion Design	DFD-103	Communication skills and personality Development	2016-17	Critical and innovative thinking. Display competence in oral, written, and visual communication.
Diploma in Fashion Design	DFDP-104	Fashion Model Drawing & Illustration	2016-17	Fashion model drawing, sketch/drawing, lines, shading & block figure techniques.
Diploma in Fashion Design	DFDP-105	Pattern Making & Construction-I	2016-17	To acquire basic understanding & skills of garment construction, enabling them to use various tools and techniques for design developments, integrating design skills with the help of sewing machine applications.
Diploma in Fashion Design	DFDP-106	Elements/Principle of design and Fashion	2016-17	Develops a relationship between fashion industry & students through which he/she is able to work in fashion industry & express his view, thought through the sketch.
Diploma in Fashion Design	DFD-201	Merchandising & Production Methods	2016-17	Types of garment manufacturing units and work flow in garment industry. Costing of garments – knits and woven. (knowledge concern areas - material costs, estimation vs actual costing).
Diploma in Fashion Design	DFD-202	Fashion Illustration	2016-17	Fashion model drawing develops the concept of visualization, communication through the medium of sketch/drawing based on the lines, shading & block figure techniques
Diploma in Fashion Design	DFDP-203	Draping	2016-17	Experiment with fabric, darts, tucks, and other design elements, fabric folds etc
Diploma in Fashion Design	DFDP-204	Design Collection & Portfolio	2016-17	Design Collection-Theme board, colour palette, story board etc. from a design inspiration
Diploma in Fashion Design	DFDP-205	Digital Design	2016-17	Corel Draw/Illustrator/Indesign: designing, editing, vector images, portfolio setting, applied art and advertisement.
Diploma in Fashion Design	DFDP-206	n making & Construc	2016-17	Gain ability to use pattern making for creating new garments designs
Diploma in Fashion Design	DFDP-207	urface Ornamentatio	2016-17	Embroideries, dyeing & printing and other surface ornamentation part.
Diploma in Fashion Design	DFD-101	Basic Of Fashion	2017-18	Create a relationship between fashion industry & students through which he/she is able to work in fashion industry & express his view, thought through the sketch
Diploma in Fashion Design	DFD-102	COMMUNICATION SKIL	2017-18	Critical and innovative thinking. Display competence in oral, written, and visual communication.
Diploma in Fashion Design	DFDP-104	Fashion Illustration -	2017-18	Fashion model drawing develops the concept of visualization, communication through the medium of sketch/drawing based on the lines, shading & block figure techniques
Diploma in Fashion Design	DFDP- 106	Basic of Design	2017-18	Develops a relationship between fashion industry & students through which he/she is able to work in fashion industry & express his view, thought through the sketch.
Diploma in Fashion Design	DFDP- 107	Material exploration	2017-18	To develop their skills in different areas: drawing, model-building, , and knowledge of materials applied to a design project.
Diploma in Fashion Design	DFDP-202	Textile Science	2017-18	To learn the terminology used in fabric processes and be able to explain what happens in the making of fabrics To understand how you go about analysing a fabric to find out how it is made and what it is made from.
Diploma in Fashion Design	DFDP-204	Fashion Illustration	2017-18	Overview, how fashion model drawing play an important role in fashion industry

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
Bachelor of Pharmacy	BP101T	Human Anatomy and Physiology I-Theory	2017-18	1. Understanding terminology, structure, function, and interdependence of systems within the human body. 2. To understand the coordinated working pattern of different organs of each system.
Bachelor of Pharmacy	BP102T	Pharmaceutical Analysis I – Theory	2017-18	1. Developing the fundamentals of analytical chemistry. 2. Understanding the principles of volumetric and electro chemical analysis and carryout various volumetric and electrochemical titrations.
Bachelor of Pharmacy	BP103T	Pharmaceutics I – Theory	2017-18	1. Understanding the fundamental knowledge on the preparatory pharmacy of various dosage forms. 2. Understanding the professional way of handling the prescription and preparation of various conventional dosage forms.
Bachelor of Pharmacy	BP104T	Pharmaceutical Inorganic Chemistry –Theory	2017-18	1. Knowing sources of impurities and methods to determine the impurities in inorganic drugs and pharmaceuticals. 2. Understanding the medicinal and pharmaceutical importance of inorganic compounds.
Bachelor of Pharmacy	BP105T	Communication skills – Theory *	2017-18	1. Understanding the behavioral needs for a Pharmacist to function effectively in the areas of pharmaceutical operation. 2. Communication building for effective management of the team.
Bachelor of Pharmacy	BP106RBT	Remedial Biology-Theory	2017-18	1. Learning the classification and salient features of five kingdoms of life. 2. Understanding the basic components of anatomy & physiology of plant.
Bachelor of Pharmacy	BP106RMT	Remedial Mathematics-Theory	2017-18	1. Applying mathematical concepts and principles in carrying computations for Pharmaceutical Sciences like in forming ledger in pharmacy stores. 2. Understanding the role of calculations during research in pharmacy.
Bachelor of Pharmacy	BP107P	Human Anatomy and Physiology –Practical	2017-18	1. Understanding terminology, structure, function, and interdependence of systems within the human body. 2. To understand the coordinated working pattern of different organs of each system.
Bachelor of Pharmacy	BP108P	Pharmaceutical Analysis I – Practical	2017-18	1. Developing the fundamentals of analytical chemistry. 2. Understanding the principles of volumetric and electro chemical analysis and carryout various volumetric and electrochemical titrations.

 Jaipur

Bachelor of Pharmacy	BP805ET	Pharmacovigilance	2017-18	<ol style="list-style-type: none"> 1. International standards for classification of diseases and drugs. 2. To understand adverse drug reaction reporting systems and communication in pharmacovigilance. 3. To understand methods to generate safety data during pre clinical, clinical and post approval phases of drugs' life cycle. 4. To understand drug safety evaluation in paediatrics, geriatrics, pregnancy and lactation.
Bachelor of Pharmacy	BP806ET	Quality Control and Standardization of Herbals	2017-18	<ol style="list-style-type: none"> 1. To learn about the various methods and guidelines for evaluation and standardization of herbs and herbal drugs. 2. To know the regulatory approval process and their registration in Indian and international markets.
Bachelor of Pharmacy	BP807ET	Computer Aided Drug Design	2017-18	<ol style="list-style-type: none"> 1. To learn rational drug design process and various techniques used in rational drug design process. 2. To understand Design and discovery of lead molecules.
Bachelor of Pharmacy	BP808ET	Cell and Molecular Biology	2017-18	<ol style="list-style-type: none"> 1. To summarize cell and molecular biology history. 2. To summarize cellular functioning and composition. 3. To understand the chemical foundations of cell biology, DNA properties of cell biology, and protein structure and function.
Bachelor of Pharmacy	BP809ET	Cosmetic Science	2017-18	<ol style="list-style-type: none"> 1. To learn the classification of cosmetic and cosmeceutical products and the their formulations. 2. To understand the evolution of cosmeceuticals from cosmetics, cosmetics as quasi and OTC drugs.
Bachelor of Pharmacy	BP810ET	Experimental Pharmacology	2017-18	<ol style="list-style-type: none"> 1. To understand the applications of various commonly used laboratory animals. 2. To demonstrate the various screening methods used in preclinical research.
Bachelor of Pharmacy	BP811ET	Advanced Instrumentation Techniques	2017-18	<ol style="list-style-type: none"> 1. To understand the advanced instruments used and its applications in drug analysis 2. To understand the chromatographic separation and analysis of drugs, calibration of various analytical instruments 3. To know analysis of drugs using various analytical instruments.
Bachelor of Pharmacy	BP812ET	Dietary Supplements and Nutraceuticals	2017-18	<ol style="list-style-type: none"> 1. Understand the need of supplements by the different group of people to maintain healthy life. 2. Understand the outcome of deficiencies in dietary supplements.
Bachelor of Pharmacy	BP813PW	Project Work	2017-18	<ol style="list-style-type: none"> 1. To carry out the project work on any topic related to pharmaceutical sciences. 2. To undergo literature survey on topic, observations, and statistical analysis of the collected data.
Diploma in Pharmacy	DPHAM101	Pharmaceutics-I, Theory	2017-18	<ol style="list-style-type: none"> 1. Understanding different dosage form and their classification, manufacturing process and uses. 2. Learning the packing of pharmaceuticals and their size reduction, size separation, mixing, drying, filtration, extraction, distillation and sterilization processes.

Diploma in Pharmacy	DPHAM102	Pharmaceutical Chemistry-I, Theory	2017-18	<p>1. Understanding the concepts of Acid and basis, Antioxidants, Gastrointestinal agents, Topical agents, Dental products, Inhalants, Respiratory stimulants, Expectorants and Emetics, Antidotes, Inorganic official compounds, Major intraand extracellular electrolytes.</p> <p>2. Understanding the radiopharmaceutical and contrast media, Quality control of drugs and pharmaceuticals and Identification tests and Limit tests used to detect impurities in pharmaceutical substance as per Indian Pharmacopoeia.</p>
Diploma in Pharmacy	DPHAM103	Pharmacognosy, Theory	2017-18	<p>1. Understanding the cultivation and utilization aspects of drugs.</p> <p>2. Understanding the techniques of extraction, identification, separation of natural compounds and their identification through morphological characters, physical and chemical tests.</p>
Diploma in Pharmacy	DPHAM104	Biochemistry & Clinical Pathology, Theory	2017-18	<p>1. Understanding of the basics of biochemistry, sources, chemical structures, metabolism and biological functions of biomolecules</p> <p>2. Evaluation of clinical diagnoses, detection and diagnosis of unsuspected disease, study of the cause, nature, development of disease and clinical significance.</p>
Diploma in Pharmacy	DPHAM105	Human Anatomy & Physiology, Theory	2017-18	<p>1. Recognizing the anatomical structures and explain the physiological functions of body systems (Respiratory, Cardiovascular, Digestive, Urinary system including all sense organs).</p> <p>2. Understanding the characteristics, components and functions of the central, peripheral, autonomic nervous system, cell, tissues, blood and different endocrine hormones.</p>
Diploma in Pharmacy	DPHAM106	Health Education & Community Pharmacy, Theory	2017-18	<p>1. Understanding the concepts of health, nutritional values, first aids and family plannings.</p> <p>2. Understanding the basic principles of diagnosis and management of several communicable and non-communicable diseases.</p>
Diploma in Pharmacy	DPHAM101P	Pharmaceuticals-I, Practical	2017-18	<p>1. Preparing the different dosage forms like aromatic waters, solutions, spritis, tinctures, extracts, creams, capsules and tablets.</p> <p>2. Packaging and labeling of different dosage forms like aromatic waters, solutions, spritis, tinctures, extracts, creams, capsules and tablets</p>
Diploma in Pharmacy	DPHAM106P	Pharmaceutical Chemistry-I, Practical	2017-18	<p>1. Identifying various inorganic compounds and pharmaceuticals, 2. Applying limit test for various heavy metals and assay of inorganic pharmaceuticals either by acid base titrations, redox titrations, precipitation titrations or complexometric titrations.</p>
Diploma in Pharmacy	DPHAM107P	Pharmacognosy, Practical	2017-18	<p>1. Identifying various drugs by morphological characters, perform their physical and chemical tests and do their gross anatomical studies.</p>
Diploma in Pharmacy	DPHAM108P	Biochemistry & Clinical Pathology, Practical	2017-18	<p>1. Understanding methods for detection and identification of proteins, carbohydrates, lipids and analysis of various normal and abnormal constituents of blood and urine.</p>

Diploma in Pharmacy	DPHAM109P	Human Anatomy & Physiology, Practical	2017-18	1. Understanding body physiological systems, examining blood films for various blood counts 2. Analysing various parameters of body system, determining blood clotting time, erythrocyte sedimentation rate and haemoglobin value.
Diploma in Pharmacy	DPHAM201	Pharmaceutics-II, Theory	2017-18	1. Knowing about compounding and dispensing of pharmaceutical formulations. 2. Learning about the dispensing pharmacy and dispensed medications of solid, liquid, semisolid, dental, cosmetic and sterile dosage forms.
Diploma in Pharmacy	DPHAM202	Pharmaceutical Chemistry-II, Theory	2017-18	1. Understanding the chemical structures and nomenclature of medicinal drugs. 2. Learning the storage and distribution of medications in pharmacies open to the public and hospital pharmacies.
Diploma in Pharmacy	DPHAM203	Pharmacology & Toxicology, Theory	2017-18	1. Understanding the mechanism, therapeutic application and adverse effects of various classes of drugs. 2. Understanding the side effects or unintentional actions of the drug and toxicity of drugs.
Diploma in Pharmacy	DPHAM204	Pharmaceutical Jurisprudence, Theory	2017-18	1. Understanding the pharmaceutical legislation, various Acts and Rules amended for the wellbeing of pharmacy profession, about Principles, Professional and Pharmaceutical Code and Ethics.
Diploma in Pharmacy	DPHAM205	Drug Store and Business Management, Theory	2017-18	1. Understanding on integration of different managerial functions, managing up 2. Learning about different problems in starting a business or organization and strategies to increase the promotion and salesmanship in running organization.
Diploma in Pharmacy	DPHAM206	Hospital & Clinical Pharmacy, Theory	2017-18	1. Understanding about various function of hospital and hospital pharmacy, various in-patient and out-patients services, manufacturing within hospital. 2. Learning about the various diseases their causative agents, diseases cycle, laboratory protocols for detection and methods of control and prevention of diseases.
Diploma in Pharmacy	DPHAM207P	Pharmaceutics-II, Practical	2017-18	1. Compounding and dispensing of various pharmaceutical formulations like mixtures, emulsions, lotions liniments etc. 2. Understanding various dosage forms, their formulation design, their packaging, labeling.
Diploma in Pharmacy	DPHAM208P	Pharmaceutical Chemistry-II, Practical	2017-18	1. Preparing organic compounds and do elemental and functional group analysis by the help of various detection tests. 2. Identifying certain groups of drugs like barbiturates, sulfonamides, phenothiazines etc. included in I.P with the help of official tests.
Diploma in Pharmacy	DPHAM209P	Pharmacology & Toxicology, Practical	2017-18	1. Understanding the practical knowledge in the effects of drugs using animals in computer based softwares.
Diploma in Pharmacy	DPHAM210P	Hospital & Clinical Pharmacy, Practical	2017-18	1. Preparing transfusion fluids, evaluation of surgical materials, and handling of data processing equipments.
Doctor of Pharmacy	PHAMD101	Human Anatomy and Physiology, Theory	2017-18	1. Understanding the terminology, structure, function, and interdependence of systems within the human body. 2. Understanding the coordinated working pattern of different organs of each system.

Doctor of Pharmacy	PHAMD102	Pharmaceutics, Theory	2017-18	<ol style="list-style-type: none"> 1. Understand the formulation aspects of different dosage forms 2. Performing different pharmaceutical calculation involved in formulation; 3. Formulate different types of dosage forms.
Doctor of Pharmacy	PHAMD103	Medicinal Biochemistry, Theory	2017-18	<ol style="list-style-type: none"> 1. Understanding the catalytic activity of enzymes and importance of isoenzymes in diagnosis of diseases; 2. Knowing the metabolic process of biomolecules in health and illness (metabolic disorders) 3. Understanding the genetic organization of mammalian genome; protein synthesis; replication; mutation and repair mechanism.
Doctor of Pharmacy	PHAMD104	Pharmaceutical Organic Chemistry, Theory	2017-18	<ol style="list-style-type: none"> 1. Understanding the IUPAC/Common system of nomenclature of simple organic compounds belonging to different classes of organic compounds. 2. Understanding the methods of preparation, test for purity, principle involved in the assay, important medicinal uses of some important organic compounds
Doctor of Pharmacy	PHAMD105	Pharmaceutical Inorganic Chemistry, Theory	2017-18	<ol style="list-style-type: none"> 1. Understanding the principles and procedures of analysis of drugs and also regarding the application of inorganic pharmaceuticals. 2. Knowing the analysis of the inorganic pharmaceuticals their applications.
Doctor of Pharmacy	PHDRB106E	Remedial Biology, Theory	2017-18	<ol style="list-style-type: none"> 1. Understanding the classification and salient features of five kingdoms of life. 2. Understanding the basic components of anatomy & physiology of plant.
Doctor of Pharmacy	PHDRM107E	Remedial Mathematics, Theory	2017-18	<ol style="list-style-type: none"> 1. Knowing Trigonometry, Analytical geometry, Matrices, Determinant, Integration, Differential equation, Laplace transform and their applications. 2. Solving the problems of different types by applying theory.
Doctor of Pharmacy	PHAMD107P	Human Anatomy and Physiology, Practical	2017-18	<ol style="list-style-type: none"> 1. Understanding body physiological systems, examining blood films for various blood counts 2. Analysing various parameters of body system, determining blood clotting time, erythrocyte sedimentation rate and haemoglobin value.
Doctor of Pharmacy	PHAMD108P	Pharmaceutics, Practical	2017-18	<ol style="list-style-type: none"> 1. Preparing the different dosage forms like aromatic waters, solutions, spritis, tinctures, extracts, creams, capsules and tablets. 2. Packaging and labeling of different dosage forms like aromatic waters, solutions, spritis, tinctures, extracts, creams, capsules and tablets
Doctor of Pharmacy	PHAMD109P	Medicinal Biochemistry, Practical	2017-18	<ol style="list-style-type: none"> 1. Performing experiments related to qualitative analysis of normal and abnormal constituents of urine, estimation of serum parameters. 2. Studying of factors affecting Enzyme activity.
Doctor of Pharmacy	PHAMD110P	Pharmaceutical Organic Chemistry, Practical	2017-18	<ol style="list-style-type: none"> 1. To understand mechanisms and orientation of reactions. 2. To learn the identification of organic compound.
Doctor of Pharmacy	PHAMD111P	Pharmaceutical Inorganic Chemistry, Practical	2017-18	<ol style="list-style-type: none"> 1. Performing the limit tests of various inorganic ions. 2. Performing the identification tests, tests for purity and assays.

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
Bachelor of Physiotherapy	BPTHA101	Human Anatomy-I	2016-17	Student can enrol into MSc. Anatomy & can further can pursue career in Department of Anatomy
Bachelor of Physiotherapy	BPTHA201	Human Anatomy-II	2017-18	Student can enrol into MSc. Anatomy & can further can pursue career in Department of Anatomy
Bachelor of Physiotherapy	BPTHP102	Human Physiology-I	2016-17	Student can enrol into MSc. Anatomy & can further can pursue career in Department of Physiology
Bachelor of Physiotherapy	BPTHP202	Human Physiology-II	2017-18	Student can enrol into MSc. Anatomy & can further can pursue career in Department of Physiology
Bachelor of Physiotherapy	BPTBC103	Biochemistry	2016-17	Student can enrol into MSc. Anatomy & can further can pursue career in Department of Biochemistry
Bachelor of Physiotherapy	BPTCB505	Community Based Rehabilitation	2017-18	In this the student learn about the prospects of working at the community level & healthcare system at the rural level which gives him knowledge to carry out healthcare services at the primary level.
Bachelor of Physiotherapy	BPTSH602	Physiotherapy in Surgery & Hand	2017-18	This enables the student to treat & comprehensively rehabilitate the patients suffering from post-surgical ailments & general hand conditions.
Bachelor of Physiotherapy	BPTBE603	Bioengineering	2019-20	This enables the student to have a comprehensive knowledge about prosthetic, orthotics & other assistive devices being used in rehabilitation & most importantly when & whom to advice the appropriate device.
Bachelor of Physiotherapy	BPTMG604	Physiotherapy in Medicine & Geriatric Conditions	2019-20	The student learns to treat different medical ailments that include In-Patient, out-patient & care of geriatric population
Bachelor of Physiotherapy	BPTSF605	Physiotherapy In Sports Fitness And Allied Therapeutics	2019-20	The student learns to treat athletes on-field & off-field. This opens a huge prospect of Sports Physiotherapy which is of much requirement & need in the field of Sports
Bachelor of Physiotherapy	BPTOC701	Physiotherapy in Orthopedic Conditions-I	2017-18	The student learns to treat different musculoskeletal conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient
Bachelor of Physiotherapy	BPTOC801	Physiotherapy in Orthopedic Conditions-II	2017-18	The student learns to treat different musculoskeletal conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient
Bachelor of Physiotherapy	BPTNC702	Physiotherapy in Neurological Conditions-I	2017-18	The student learns to treat different neurological conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient
Bachelor of Physiotherapy	BPTNC802	Physiotherapy in Neurological Conditions-II	2017-18	The student learns to treat different neurological conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient
Bachelor of Physiotherapy	BPTOC 703	Physiotherapy In Obstetrics, Gynecology & Pediatrics	2017-18	The student learns to treat pre-natal, ante-natal & post-natal conditions & pre & post operative rehabilitation that also include physiotherapy for In-Patient & out-patient. A comprehensive rehabilitation of ailments related to children
Bachelor of Physiotherapy	BPTBR705	Research Methodology And Biostatistics	2017-18	The students learn about performance of research, performing statistical tests, writing research papers for the scientific development of the institute & fraternity

(Prof. D K Mathur)
Registrar
Jaipur National University
Jaipur

Bachelor of Physiotherapy	MPTRM102	Research Methodology And Biostatistics	2017-18	The students learn about performance of research, performing statistical tests, writing research papers for the scientific development of the institute & fraternity
Bachelor of Physiotherapy	BPTCC803P	Physiotherapy in Cardiorespiratory Conditions	2017-18	The student learns to treat different cardiorespiratory conditions & operative rehabilitation that also include physiotherapy for In-Patient, out-patient & ICU's.
Bachelor of Physiotherapy	BPTEA804P	Eclectic Approaches in Physiotherapy	2017-18	The student learns to treat different approaches pertaining to efficient clinical practice & advanced techniques in rehabilitation for faster recovery of the patient.
Master of Physiotherapy	MPTNP401	Rehabilitation in Physiotherapy Conditions (Orthopedics & Sports) –II	2017-18	The student learns to treat different musculoskeletal conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient. The student also learns to treat athletes on-field & off-field. This opens a huge prospect of Sports Physiotherapy which is of much requirement & need in the field of Sports
Master of Physiotherapy	MPTNP 401	Rehabilitation in Physiotherapy Conditions (Orthopedics & Manual Therapy) –II	2017-18	The student learns to treat different musculoskeletal conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient. The student also learns to have comprehensive skills in Manual therapy & efficient treatment of patients
Master of Physiotherapy	MPTNP302	Rehabilitation in Physiotherapy Conditions (Neurology & Psychosomatic Disorders) –I	2017-18	The student learns to treat different neurological conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient
Master of Physiotherapy	MPTNP401	Rehabilitation in Physiotherapy Conditions (Neurology & Psychosomatic Disorders) –II	2017-18	The student learns to treat different neurological conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient
Master of Physiotherapy	MPT OS 401	Rehabilitation in Physiotherapy Conditions (Orthopedics & Sports) –II	2019-20	The student learns to treat different musculoskeletal conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient. The student also learns to treat athletes on-field & off-field. This opens a huge prospect of Sports Physiotherapy which is of much requirement & need in the field of Sports
Master of Physiotherapy	MPT OM 302	Rehabilitation in Physiotherapy Conditions (Orthopedics & Manual Therapy) –I	2018-19	The student learns to treat different musculoskeletal conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient. The student also learns to have comprehensive skills in Manual therapy & efficient treatment of patients
Master of Physiotherapy	MPT OM 401	Rehabilitation in Physiotherapy Conditions (Orthopedics & Manual Therapy) –II	2019-20	The student learns to treat different musculoskeletal conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient. The student also learns to have comprehensive skills in Manual therapy & efficient treatment of patients
Master of Physiotherapy	MPT NP 302	Rehabilitation in Physiotherapy Conditions (Neurology & Psychosomatic Disorders) –I	2018-19	The student learns to treat different neurological conditions, injuries & operative rehabilitation that also include physiotherapy for In-Patient & out-patient

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
LLB	LLB803 PI	Private International Law	2017-18	Student will be able to : set out the conditions under which a court is competent to hear an action (the question of jurisdiction), determine by what law the rights of the parties are to be ascertained (the question of choice of law), specify the circumstances in which the foreign judgment can be recognised and enforced by action in England (the question of recognition and enforcement of foreign judgments, demonstrate the knowledge and understanding of the social, economic, moral and ethical context of conflict of laws, demonstrate an understanding of solutions to legal challenges arising from conflict of laws.
BBLLB	BBLLB 605 CPV	Crimes, Penology and Victims	2016-17	The objective of this paper is to make students know as to why people commit crime, what treatment should be given to criminals and how the punishment for a particular type of crime is decided. As the criminal justice system has now focused attention towards various kinds of the victims, it becomes imperative to make students read and understand the relationship amongst criminals, victims and the punishments.
LLM	LLM(1) BL 201 LI	LAW OF INSURANCE	2016-17	Student will be able to: Know the general principles of laws of Insurance viz- The Life Insurance Corporation Act, 1956, Marine Insurance Act, 1906, Motor Vehicle Insurance and Public Liability Insurance Act, 1991. Know the fundamental principles of insurance law that govern the business viz- duty of utmost good faith, the duty of disclosure, double insurance, contribution, subrogation and reinsurance. Know the practical application of the fundamental principles while purchasing a policy and realization of the benefits of policy. Examine the provisions of insurance law and dispute resolution mechanisms for resolution of insurance disputes, and insurance litigation.
LLM	LLM(1) BL 203 SCT	SPECIFIC CONTRACT – E CONTRACT	2016-17	students would be able to- Trace the evolution of law of contract with the passage of times and the role of equity in law, understand the differences between the law of torts and the law of contract in terms of liabilities, understand the essentials of a valid contract, know the contractual obligations arising out of breach of contract, distinguish the enforceable and unenforceable contracts, safeguard the interests of parties while drafting the terms of a contract, understand the role of a contract in growth of commercial activities

(Prof. D K Mathur)
Registrar

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
Diploma in Pharmacy	DPHAM101	Pharmaceutics-I, Theory	2017-18	1. Understanding different dosage form and their classification, manufacturing process and uses. 2. Learning the packing of pharmaceuticals and their size reduction, size separation, mixing, drying, filtration, extraction, distillation and sterilization processes.
Diploma in Pharmacy	DPHAM102	Pharmaceutical Chemistry-I, Theory	2017-18	1. Understanding the concepts of Acid and basis, Antioxidants, Gastrointestinal agents, Topical agents, Dental products, Inhalants, Respiratory stimulants, Expectorants and Emetics, Antidotes, Inorganic official compounds, Major intraand extracellular electrolytes. 2. Understanding the radiopharmaceutical and contrast media, Quality control of drugs and pharmaceuticals and Identification tests and Limit tests used to detect impurities in pharmaceutical substance as per Indian Pharmacopoeia.
Diploma in Pharmacy	DPHAM103	Pharmacognosy, Theory	2017-18	1. Understanding the cultivation and utilization aspects of drugs. 2. Understanding the techniques of extraction, identification, separation of natural compounds and their identification through morphological characters, physical and chemical tests.
Diploma in Pharmacy	DPHAM104	Biochemistry & Clinical Pathology, Theory	2017-18	1. Understanding of the basics of biochemistry, sources, chemical structures, metabolism and biological functions of biomolecules 2. Evaluation of clinical diagnoses, detection and diagnosis of unsuspected disease, study of the cause, nature, development of disease and clinical significance.
Diploma in Pharmacy	DPHAM105	Human Anatomy & Physiology, Theory	2017-18	1. Recognizing the anatomical structures and explain the physiological functions of body systems (Respiratory, Cardiovascular, Digestive, Urinary system including all sense organs). 2. Understanding the characteristics, components and functions of the central, peripheral, autonomic nervous system, cell, tissues, blood and different endocrine hormones.
Diploma in Pharmacy	DPHAM106	Health Education & Community Pharmacy, Theory	2017-18	1. Understanding the concepts of health, nutritional values, first aids and family plannings. 2. Understanding the basic principles of diagnosis and management of several communicable and non-communicable diseases.
Diploma in Pharmacy	DPHAM101P	Pharmaceutics-I, Practi	2017-18	1. Preparing the different dosage forms like aromatic waters, solutions, spritis, tinctures, extracts, creams, capsules and tablets. 2. Packaging and labeling of different dosage forms like aromatic waters, solutions, spritis, tinctures, extracts, creams, capsules and tablets

(Prof. D K Mathur)
Registrar

Jaipur

Diploma in Pharmacy	DPHAM106P	Pharmaceutical Chemistry-I, Practical	2017-18	1. Identifying various inorganic compounds and pharmaceuticals, 2. Applying limit test for various heavy metals and assay of inorganic pharmaceuticals either by acid base titrations, redox titrations, precipitation titrations or complexometric titrations.
Diploma in Pharmacy	DPHAM107P	Pharmacognosy, Practical	2017-18	1. Identifying various drugs by morphological characters, perform their physical and chemical tests and do their gross anatomical studies.
Diploma in Pharmacy	DPHAM108P	Biochemistry & Clinical Pathology, Practical	2017-18	1. Understanding methods for detection and identification of proteins, carbohydrates, lipids and analysis of various normal and abnormal constituents of blood and urine.
Diploma in Pharmacy	DPHAM109P	Human Anatomy & Physiology, Practical	2017-18	1. Understanding body physiological systems, examining blood films for various blood counts 2. Analysing various parameters of body system, determining blood clotting time, erythrocyte sedimentation rate and haemoglobin value.
Diploma in Pharmacy	DPHAM201	Pharmaceutics-II, Theory	2017-18	1. Knowing about compounding and dispensing of pharmaceutical formulations. 2. Learning about the dispensing pharmacy and dispensed medications of solid, liquid, semisolid, dental, cosmetic and sterile dosage forms.
Diploma in Pharmacy	DPHAM202	Pharmaceutical Chemistry-II, Theory	2017-18	1. Understanding the chemical structures and nomenclature of medicinal drugs. 2. Learning the storage and distribution of medications in pharmacies open to the public and hospital pharmacies.
Diploma in Pharmacy	DPHAM203	Pharmacology & Toxicology, Theory	2017-18	1. Understanding the mechanism, therapeutic application and adverse effects of various classes of drugs. 2. Understanding the side effects or unintentional actions of the drug and toxicity of drugs.
Diploma in Pharmacy	DPHAM204	Pharmaceutical Jurisprudence, Theory	2017-18	1. Understanding the pharmaceutical legislation, various Acts and Rules amended for the wellbeing of pharmacy profession, about Principles, Professional and Pharmaceutical Code and Ethics.
Diploma in Pharmacy	DPHAM205	Drug Store and Business Management, Theory	2017-18	1. Understanding on integration of different managerial functions, managing up 2. Learning about different problems in starting a business or organization and strategies to increase the promotion and salesmanship in running organization.
Diploma in Pharmacy	DPHAM206	Hospital & Clinical Pharmacy, Theory	2017-18	1. Understanding about various function of hospital and hospital pharmacy, various in-patient and out-patients services, manufacturing within hospital. 2. Learning about the various diseases their causative agents, diseases cycle, laboratory protocols for detection and methods of control and prevention of diseases.
Diploma in Pharmacy	DPHAM207P	Pharmaceutics-II, Practical	2017-18	1. Compounding and dispensing of various pharmaceutical formulations like mixtures, emulsions, lotions liniments etc. 2. Understanding various dosage forms, their formulation design, their packaging, labeling.
Diploma in Pharmacy	DPHAM208P	Pharmaceutical Chemistry-II, Practical	2017-18	1. Preparing organic compounds and do elemental and functional group analysis by the help of various detection tests. 2. Identifying certain groups of drugs like barbiturates, sulfonamides, phenothiazines etc. included in I.P with the help of official tests.

Diploma in Pharmacy	DPHAM209P	Pharmacology & Toxicology, Practical	2017-18	1. Understanding the practical knowledge in the effects of drugs using animals in computer based softwares.
Diploma in Pharmacy	DPHAM210P	Hospital & Clinical Pharmacy, Practical	2017-18	1. Preparing transfusion fluids, evaluation of surgical materials, and handling of data processing equipments.
Diploma in Videography	BJEV 2 404	Event Management	2019-20	Creating an Event : Conceptualization and Planning (The Nature of Planning, Project Planning, Planning the Setting, Location and Site, The Operations Plan,
Diploma in Videography	BJEV2 501	Media and Society	2019-20	Analysis & features on Education, women empowerment, politics, Parliamentary affairs, impact of media
Diploma in Fashion Design	DFD-101	Theory of Textile	2016-17	Raw materials for textiles- woven, knitted, dyed and printed, properties of fabrics, Fabrics analysis
Diploma in Fashion Design	DFD-102	History of fashion	2016-17	Global & Indian fashion Industry and role of merchandisers in the fashion industry. fashion theory and marketing of fashion goods.
Diploma in Fashion Design	DFD-103	Communication skills and personality Development	2016-17	Critical and innovative thinking. Display competence in oral, written, and visual communication.
Diploma in Fashion Design	DFDP-104	Fashion Model Drawing & Illustration	2016-17	Fashion model drawing, sketch/drawing, lines, shading & block figure techniques.
Diploma in Fashion Design	DFDP-105	Pattern Making & Construction-I	2016-17	To acquire basic understanding & skills of garment construction, enabling them to use various tools and techniques for design developments, integrating design skills with the help of sewing machine applications.
Diploma in Fashion Design	DFDP-106	Elements/Principle of design and Fashion	2016-17	Develops a relationship between fashion industry & students through which he/she is able to work in fashion industry & express his view, thought through the sketch.
Diploma in Fashion Design	DFD-201	Merchandising & Production Methods	2016-17	Types of garment manufacturing units and work flow in garment industry. Costing of garments – knits and woven. (knowledge concern areas - material costs, estimation vs actual costing).
Diploma in Fashion Design	DFD-202	Fashion Illustration	2016-17	Fashion model drawing develops the concept of visualization, communication through the medium of sketch/drawing based on the lines, shading & block figure techniques
Diploma in Fashion Design	DFDP-203	Draping	2016-17	Experiment with fabric, darts, tucks, and other design elements, fabric folds etc
Diploma in Fashion Design	DFDP-204	Design Collection & Portfolio	2016-17	Design Collection-Theme board, colour palette, story board etc. from a design inspiration
Diploma in Fashion Design	DFDP-205	Digital Design	2016-17	Corel Draw/Illustrator/Indesign: designing, editing, vector images, portfolio setting, applied art and advertisement.
Diploma in Fashion Design	DFDP-206	Pattern making & Construction	2016-17	Gain ability to use pattern making for creating new garments designs
Diploma in Fashion Design	DFDP-207	Surface Ornamentation	2016-17	Embroideries, dyeing & printing and other surface ornamentation part.
Diploma in Fashion Design	DFD-101	Basic Of Fashion	2017-18	Create a relationship between fashion industry & students through which he/she is able to work in fashion industry & express his view, thought through the sketch
Diploma in Fashion Design	DFD-102	COMMUNICATION SKILL	2017-18	Critical and innovative thinking. Display competence in oral, written, and visual communication.

Diploma in Fashion Design	DFDP-104	Fashion Illustration -	2017-18	Fashion model drawing develops the concept of visualization, communication through the medium of sketch/drawing based on the lines, shading & block figure techniques
Diploma in Fashion Design	DFDP- 106	Basic of Design	2017-18	Develops a relationship between fashion industry & students through which he/she is able to work in fashion industry & express his view, thought through the sketch.
Diploma in Fashion Design	DFDP- 107	Material exploration	2017-18	To develop their skills in different areas: drawing, model-building, , and knowledge of materials applied to a design project.
Diploma in Fashion Design	DFDP-202	Textile Science	2017-18	To learn the terminology used in fabric processes and be able to explain what happens in the making of fabrics To understand how you go about analysing a fabric to find out how it is made and what it is made from.
Diploma in Fashion Design	DFDP-204	Fashion Illustration	2017-18	Overview, how fashion model drawing play an important role in fashion industry
DIPLOMA (EE)	1DCB5	Applied Mechanics	2017-18	Applied mechanics is a branch of the physical sciences and the practical application of mechanics. ... Within the practical sciences, applied mechanics is useful in formulating new ideas and theories, discovering and interpreting phenomena, and developing experimental and computational tools.
DIPLOMA (EE)	1DCB06	Communication & Personality Development Lab	2017-18	To groom the over all personality and make the student more confident to express himself/herself in public and confidently face interviews.
DIPLOMA (EE)	1DCB9	Engineering Drawing-I	2017-18	Practical on design of basic engineering components.
DIPLOMA (EE)	1DCB10	Workshop Practice-I	2017-18	TO make the students able to understand different tool & equipment for work shop practice and enable them to acquire skills for the preparation of different Carpentry/fitting/welding models.
DIPLOMA (EE)	1DCB11	Electrical & Electronics Lab-I	2017-18	Understanding Basic Electrical Engg components
DIPLOMA (EE)	2DCB1	English	2017-18	To improve the communication skills.
DIPLOMA (EE)	2DCB5	Basic Elements of Electrical & Electronics-II	2017-18	To understand the application part of the concepts studied and realisation of complicated circuits.
DIPLOMA (EE)	2DCB6	Computer & IT Fundamentals	2017-18	To have a basic understanding of programming in order to meet the demands of software industries.
DIPLOMA (EE)	2DCB7	Computer Programming Lab	2017-18	To get a hands on practice of coding.
DIPLOMA (EE)	2DCB10	Engineering Drawing-II	2017-18	Practical on design of different machine components.
DIPLOMA (EE)	2DCB11	Workshop Practice-II	2017-18	Practical on design of different machine components.
DIPLOMA (EE)	2DCB12	Electrical & Electronics Lab-II	2017-18	To recognise and understand the working of electrical and electronic componesnts and equipment.
DIPLOMA IN CE	DCE-301	trength Of Materials	2017-18	Its basic subject for civil engineering as it acts as a base for all further structural subjects of Civil like structural analysis and structural design.
DIPLOMA IN CE	DCE-302	Fluid Mechanics-I	2017-18	Fluid mechanics is the branch of classical physics and mathematics concerned with the response of matter that continuously deforms (flows) when subjected to a stress
DIPLOMA IN CE	DCE-303	Building Technology	2017-18	Planning of building for space with max comfort and economy
DIPLOMA IN CE	DCE-304	Surveying-I	2017-18	To find Earth basics idea and survey based on geographical condition
DIPLOMA IN CE	DCE-305	Concrete Technology	2017-18	Analysis of Structure of earth for economic design

DIPLOMA IN CE	DCE-306	CONSTRUCTION MATERIALS AND EQUIPMENTS	2017-18	Civil engineering materials are key components to the design and maintenance of civil structures. Most of these structures are large in scale such as bridges, buildings, and dams
DIPLOMA IN CE	DCE-307	Material Testing-I Lab	2017-18	To knowledge about some of the properties of most imp materials and experiments
DIPLOMA IN CE	DCE-308	Fluid Mechanics-I Lab	2017-18	Fluid mechanics is the branch of classical physics and mathematics concerned with the response of matter that continuously deforms (flows) when subjected to a stress
DIPLOMA IN CE	DCE-309	Surveying-I Lab	2017-18	To find Earth basics idea and survey based on geographical condition
DIPLOMA IN CE	DCE-401	Strength Of Materials-	2017-18	Its basic subject for civil engineering as it acts as a base for all further structural subjects of Civil like structural analysis and structural design.
DIPLOMA IN CE	DCE-402	Fluid Mechanics-II	2017-18	Fluid mechanics is the branch of classical physics and mathematics concerned with the response of matter that continuously deforms (flows) when subjected to a stress
DIPLOMA IN CE	DCE-403	Water Supply & Sanitat	2017-18	sanitary engineer to develop plans and mathematical designs. Its not provide only for drinking purposes but also for domestic use and the improvement in the construction of public water-supplies for small rural towns and villages.
DIPLOMA IN CE	DCE-404	Transportation Engg.	2017-18	To provide the economical and efficient transportation service that meets societal needs while maintaining compatibility with environmental, energy, and safety goals
DIPLOMA IN CE	DCE-405	Soil Mechanics	2017-18	Geotechnical Engineering is an important science used to determine the soil characteristics that are essentially required for the design of structures
DIPLOMA IN CE	DCE-406	Surveying-II	2017-18	To find Earth basics idea and survey based on geographical condition
DIPLOMA IN CE	DCE-407	Material Testing-I Lab	2017-18	To knowledge about some of the properties of most imp materials and experiments
DIPLOMA IN CE	DCE-408	Fluid Mechanics-II Lab	2017-18	Fluid mechanics is the branch of classical physics and mathematics concerned with the response of matter that continuously deforms (flows) when subjected to a stress
DIPLOMA IN CE	DCE-409	ad Material Testing L	2017-18	To knowledge about some of the properties of most imp materials and experiments
DIPLOMA IN CE	DCE-410	Surveying-II Lab	2017-18	To find Earth basics idea and survey based on geographical condition
DIPLOMA IN CE	DCE-411	Soil Mechanics Lab	2017-18	Geotechnical Engineering is an important science used to determine the soil characteristics that are essentially required for the design of structures
DIPLOMA IN CE	DCE-501	Theory Of Structures-	2017-18	Theory formation in structural analysis is the classification of the essential properties of technical artefacts or artefact classes reflected in theoretical models
DIPLOMA IN CE	DCE-502	sign Of Steel Structur	2017-18	To provide the knowledge about design steel structural elements according to IS Code.
DIPLOMA IN CE	DCE-503	ign Of R.C.C. Structur	2017-18	To knowledge and skills to design reinforced concrete structural elements including beams, one way slabs and columns
DIPLOMA IN CE	DCE-504	Irrigation Engineering	2017-18	To study of flow of water at atmospheric pressure
DIPLOMA IN CE	DCE-505	Estimating & Costing	2017-18	To study of flow of water at atmospheric pressure
DIPLOMA IN CE	DCE-506	vironment Engineeri	2017-18	sanitary engineer to develop plans and mathematical designs. Its not provide only for drinking purposes but also for domestic use and the improvement in the construction of public water-supplies for small rural towns and villages.

DIPLOMA IN CE	DCE-601	Theory Of Structures-	2017-18	Theory formation in structural analysis is the classification of the essential properties of technical artefacts or artefact classes reflected in theoretical models
DIPLOMA IN CE	DCE-602	Design Of Steel Structures	2017-18	To provide the knowledge about design steel structural elements according to IS Code.
DIPLOMA IN CE	DCE-603	Design Of R.C.C. Structures	2017-18	To knowledge and skills to design reinforced concrete structural elements including beams, one way slabs and columns
DIPLOMA IN CE	DCE-604	Construction Management &	2017-18	To knowledge and skills to design reinforced concrete structural elements including beams, one way slabs and columns
DIPLOMA IN CE	DCE-605	EARTHQUAKE RESISTANT STRUCTURE	2017-18	To knowledge and skills to design reinforced concrete structural elements including beams, one way slabs and columns
DIPLOMA IN CE	DCE-607	Building Drawing Lab	2017-18	To knowledge and skills to design reinforced concrete structural elements including beams, one way slabs and columns
DIPLOMA IN CE	DCE-608	Computer Aided Drawing	2017-18	To knowledge and skills to design reinforced concrete structural elements including beams, one way slabs and columns
DIPLOMA IN CE	DCE-609	Design Of Steel Structures	2017-18	To provide the knowledge about design steel structural elements according to IS Code.
DIPLOMA IN CE	DCE-610	Design Of R.C.C. Structures	2017-18	To knowledge and skills to design reinforced concrete structural elements including beams, one way slabs and columns
DIPLOMA IN CE	DCE-611	Project	2017-18	To knowledge and skills to design reinforced concrete structural elements including beams, one way slabs and columns

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
M. Sc. Clinical Nutrition	MCNAN101	ADVANCED NUTRITION I	2019-20	The course content provides skills related to the determination of nutritional needs of the individuals and groups across the lifespan. This course also helps the students to determine the role of homeostasis of various metabolic processes like energy metabolism, water balance, electrolyte balance etc. in maintaining nutritional status and health of the individual and groups.
M. Sc. Clinical Nutrition	MCNAN102	ADVANCED NUTRITION II	2019-20	This course will help to build-up concepts regarding assessing nutritional requirement and recommended allowances of the nutrients for individuals and groups. So students will get the skill to determine how nutrients effect biochemical processes and signal transduction pathways, and how this can lead to development of nutritionally related diseases.
M. Sc. Clinical Nutrition	MCNGB103	GENERAL BIOCHEMISTRY	2019-20	Skills related to analyzing the sample qualitatively for different nutrients like carbohydrates, protein and nucleic acids. Students will also able to estimate different components in urine and blood and their diagnostic significance for various health conditions.
M. Sc. Clinical Nutrition	MCNPR106P	GENERAL BIOCHEMISTRY PRACTICAL	2019-20	After completion of this course, students will able to understand the good experimental and quantitative skills encompassing preparation of laboratory reagents, conducting experiments, satisfactory analyses of data and interpretation of results.
M. Sc. Clinical Nutrition	MCNPR107P	HUMAN ANATOMY AND PHYSIOLOGY I PRACTICAL	2019-20	This course will enables the students to understand perform, analyse and report on experiments and observations in physiology and appropriate utilization of laboratory equipment, such as microscopes, dissection tools, general lab ware, physiology data acquisition systems, and virtual simulations.
M. Sc. Clinical Nutrition	MCNHN201	ADVANCES IN HUMAN NUTRITION	2019-20	This course enables students to adopt skills related to meal planning according to the requirement of different age groups which ensures their future as a Meal Planner for Family.
M. Sc. Clinical Nutrition	MCNFS202	FOOD SCIENCE AND FOOD PROCESSING	2019-20	This Course will provide skills related to processing of different food commodities including cereals, pulses, nuts, oilseeds, vegetables and fruits, Milk and Milk Products, Meat Fish Poultry and Egg. This course will also facilitates skills regarding identification of Food Safety Hazzaeds and their control.
M. Sc. Clinical Nutrition	MCNRM203	RESEARCH METHODOLOGY & BIOSTATISTICS	2019-20	Students will develop the skill of independent thinking for critically analyzing and writing research reports. Students will also able to assess the appropriateness of different kinds of research designs and methodology, for instance in terms of their appropriateness, transparency and quality. The course content provides skills related to the design and analysis of clinical trials, epidemiological data, interpreting, communicating the results of statistical analysis

M. Sc. Clinical Nutrition	MCNPR205P	FOOD ANALYSIS PRACTICAL	2019-20	The student will have a in hand experience about the principles, methods, and techniques of qualitative and quantitative physical, chemical and biochemical analyses of foods.
M. Sc. Clinical Nutrition	MCNPR206P	FOOD SCIENCE AND FOOD PROCESSING PRACTICAL	2019-20	After completion of this course, students will able to determine physical, chemical and nutritional analysis of commonly consumed raw and processed foods with or without additives.
M. Sc. Clinical Nutrition	MCNPR207P	HUMAN ANATOMY AND PHYSIOLOGY II PRACTICAL	2019-20	Through this course, students will able to develop vivid understanding of clinical examination of urine like physical examination, examination for abnormal constituent and Analysis of Saliva.
M. Sc. Clinical Nutrition	MCNCN301	COMMUNITY HEALTH AND NUTRIITON	2019-20	This course will help to build skills needed to deliver nutrition services and methods of accessing community nutrition resources and information. Students will also able to use current information technologies when communicating with individuals, groups and the public.
M. Sc. Clinical Nutrition	MCNIM302	INSTITUTIONAL FOOD MANAGEMENT	2019-20	This is basically entrepreneurship skill development course which enables students to set their own food service establishment. This corse will develop different skills which will be required while establishing food service management like manage the human resources within a food services organization or department, apply food services technology and operate industry equipment and adhere to regulations, standards and best practices of food service industry
M. Sc. Clinical Nutrition	MCNTN303	DIETETICS AND THERAPEUTIC NUTRITION	2019-20	This course will enables the students to assess the nutritional problems of community and effectively manage the nutritional needs of the community and utilize effective and appropriate communication skills in providing information, advice and professional opinion to individuals, groups and communities.
M. Sc. Clinical Nutrition	MCNFM304	FOOD MICROBIOLOGY AND FOOD SAFETY	2019-20	After completion of the course, students have the skills of performing different microbial techniques, detection of various bacterial growth on food products and different methods of food preservation. This course will facilitates skills regarding identification of Food Safety Hazzaeds and their control, indentification and prevention of potential source of contamination, application of food quality system and preparation of Food Safety Plan.
M. Sc. Clinical Nutrition	MCNPR305P	COMMUNITY HEALTH AND NUTRIITON PRACTICAL	2019-20	This course will enables students to plan and prepare low cost nutritious dishes / menus for vulnerable groups and develop skills in preparation of communication aids and planning nutrition education program for the community
M. Sc. Clinical Nutrition	MCNPR306P	DIETETICS AND THERAPEUTIC NUTRITION PRACTICAL	2019-20	After this course students have the ability to plan and prepare suitable therapeutic diets based on patient needs for various diseases/disorders, provide dietary counseling for prevention / treatment of various diseases / disorders and prepare special therapeutic / health foods.
M. Sc. Clinical Nutrition	MCNPR307P	FOOD MICROBIOLOGY AND FOOD SAFETY PRACTICAL	2019-20	Students will be able to utilize the techniques for identification of different pathogenic microbes and understand criteria for microbiological safety in various foods operations to avoid public health hazards due to food contamination

M. Sc. Clinical Nutrition	MCNHT101D	HOSPITAL TRAINING	2019-20	After completion of this Training Program, students will be prepare as competent and effective dietetic practitioners for entry-level positions in general dietetics. Students also able to emphasize professional practice that facilitates modification of personal food choices, food access and food systems
M. Sc. Clinical Nutrition	MCNDW102D	DESSERTATION	2019-20	After completion of dissertation work, students will able to perform research studies in the different field of nutrition as well as students will develop skills of good academic writing, analytical and cognitive abilities.
M.Sc. Chemistry	MCHTC-302	Analytical Chemistry	2019-20	Able to understand the important role of analytical principles to carry out an experiment in laboratory.
M.Sc. Chemistry	MCHTI304	Solid State Chemistry	2019-20	Students are able to know about material property and crystal stucture study.
M.Sc. Chemistry	MCHTC-401	Green and Sustainable Chemistry	2019-20	They learn about renewable feedstocks for the chemical industry, present and under development. They review the principles of catalysis, photochemistry and other interesting processes from the viewpoint of green chemistry.
M.Sc. Chemistry	MCHTI-402	Bioinorganic and Medicinal Chemistry	2019-20	They learn about metal in biological systems and synthesis of various medical compunds.
M.Sc. Chemistry	MCHTI-404	Nuclear and Radiation Chemistry	2019-20	Students learn about Nuclear reaction, reactor and nuclear energy and their uses and hazards.
M.Sc. Physics	MSCPY204	Computational Physics and Programming	2019-20	Trapezoidal rule, Simpson's 1/3 rule, Simpson's 3/8 rule, Runge-Kutta method, Monte-Carlo technique, programming language (C++) ,
M.Sc. Physics	MSCPY 402/A	Materials Synthesis and Characterization	2019-20	synthesis, Structure characterization methods, Sample Preparation techniques, Optical characterization techniques, TEM, SEM, STM, Magnetic characterization techniques
M.Sc. Physics	MSCPY 402/B	Atmospheric and Space Physics	2019-20	Ionosphere: Its structure and formation, Magnetosphere: Its Structure, Sun: Physical characteristics of sun, solar rotation, Galaxies, Dark matter, Dark energy, super massive Black holes.
M.Sc. Mathematics	MMAT 405T	Mathematical Statistics	2018-19	Provide case studies
M.Sc. Mathematics	MMAT-302T	Mechanics (NEW Course)	2019-20	Provide the platform to students for research area.
M.Sc. Mathematics	MMAT-404T	Difference Equations and Sampling Theory (New Course)	2019-20	Provide the platform to students for research area.
M.Sc. Bioinformatics	MBIT-305	Data Mining using Python (Introduced after 2019-20 BOS)	2019-20	This course will be helpful for the students in retrieving the data from different data bases using python language. This is required for handling large scale projects. The Big Data based companies recruit such students in their data analysis works.

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
Master of Philosophy	MPHSW 103	Social Work in Industry	2016-17	Conduct exercise on different role of social worker in industries / understand the labour and employees problems and its possible solutions as social work in industries, deals the problems of worker by organize various training programme and provide them safety /mediator between bottom level employers and top level management /It will help a good team leader/ manager and counsellors .
Master of Philosophy	MPHSW 104	Mental Health & Social work intervention	2017-18	Conduct advertisement workshop on mental health such as counseling, abnormal behaviour , Study, diagnosis and treatment /Discussion on creative ideas for counseling /Various case studies of abnormal behaviour and social system in order to better understand of human psychology / As counselor and psychiatric social worker in hospital and correctional field /work with client who are in stress and have abnormal behaviour
Master of Philosophy	MPHSW 105/305	Rural and Urban Community Development in India	2016-17	Workshop & discussions on Rural and Urban community , caste class conflicts , infrastructure, public relation, problems , institutions and groups dynamics, schemes and programme for Urban and Rural Development /Theory, exposure visits & debate exercises/It will help the students about the urban and rural development Public Relation/ work for Rural and urban areas development and project planning and implementation
Master of Philosophy	MPHS 103	Social Labour Welfare	2016-17	Conduct classes for programmes related to labour welfare and safety in any organisations, rules and regulations , its ethics / programmes and policies related to all level of employer in company, NGOs, funding agencies, factories and government institutions/ As Social worker , Welfare Officer and HR manager skills/ etc/ it will help in professional social worker in industries .
Master of Journalism & Mass Communication	MJ302	Event Management	2019-20	Creating an Event: Conceptualization and Planning
Master of Journalism & Mass Communication	MJEV2 304	PR and Advertising	2019-20	Media for Advertising
Master of Journalism & Mass Communication	MJ 402	Educational Communication	2019-20	Instructional Media concept, selection, use and variety, Elearning resources, elearning
Master of Journalism & Mass Communication	MJEV 2 403	Specialized Reporting and Current Issues	2019-20	Coverage of proceedings, financial transactions including

MBA Fashion Design	MBAFM-101	Business communication	2016-17	Analysis of project profitability by using different technique of capital budgeting
MBA Fashion Design	MBAFM-102	Business environment	2016-17	IFRS v/s GAAP implementation
MBA Fashion Design	MBAFM-103	Principles and practices of management	2016-17	Case Studies, Role play activity, Group Cohesion, Passion Project, Team work, Management Games
MBA Fashion Design	MBAFM-104	Organizational behavior	2016-17	Analysis of different types of ratio helps to identify problem areas and bring the attention of the management to such areas.
MBA Fashion Design	MBAFM-105	Introduction to global fashion industry	2016-17	Global & Indian fashion Industry and role of merchandisers in the fashion industry. fashion theory and marketing of fashion goods.
MBA Fashion Design	MBAFM-106	Fabric knowledge	2016-17	Raw materials for textiles- woven, knitted, dyed and printed, properties of fabrics, Fabrics analysis
MBA Fashion Design	MBAFM-107	Computer application in Fashion Management	2016-17	Latest Operating systems (OS) basic concepts of MS- DOS/ Windows (latest) or system management. Internet and Window Accessories
MBA Fashion Design	MBAFM-201	Research Methodology	2016-17	Basic fundamentals of research, sampling techniques and data collection methods data analysis-and hypothesis testing procedures and interpret research work
MBA Fashion Design	MBAFM-202	Management accounting-I	2016-17	Skits based on Retail Sales Techniques and Promotions
MBA Fashion Design	MBAFM-203	Marketing Management	2016-17	Students will select a company as per their specialise interest and they will work on a problem and provide suggestions to the company.
MBA Fashion Design	MBAFM-204	Operation and production Management	2016-17	Identify the elements of operations management and various transformation processes to enhance productivity and competitiveness
MBA Fashion Design	MBAFM-205	Human Resource Management	2016-17	To develop the understanding of the concept of human resource management and to understand its relevance in organizations.
MBA Fashion Design	MBAFMP-206	Design Process and Design Thinking	2016-17	Research and relate fashion design to a broader socio economic, historical, and environmental context. Articulate design ideas verbally, visually, and digitally.
MBA Fashion Design	MBAFM-207	Study of Garment Manufacturing process	2016-17	Types of garment manufacturing units and work flow in garment industry. Costing of garments – knits and woven. (knowledge concern areas - material costs, estimation vs actual costing).
MBA Fashion Design	MBAFM-301	Strategic Management	2016-17	Deal or No Deal(Mock Selling Activities),
MBA Fashion Design	MBAFM-302	Management accounting-II	2016-17	Develop a relationship between risk and return of the securities and the combination of debt and equity in the capital structure of the company to make effective financial decisions
MBA Fashion Design	MBAFM-303	Customer Relationship Management	2016-17	Programs and strategies that can be applied for enhancing customer relationship management in an organization

MBA Fashion Design	MBAFM-304	Fashion Forecasting	2016-17	Recognizing the patterns, cycles and dissemination of information, investigation will determine a framework to specifically apply creative and analytical skills in the trend forecasting process.
MBA Fashion Design	MBAFM-305	Product Development	2016-17	Helps in development of the product
MBA Fashion Design	MBAFM-306	Merchandising and production methods	2016-17	Types of garment manufacturing units and work flow in garment industry. Costing of garments – knits and woven.
MBA Fashion Design		Summer internship project	2016-17	Industry Internship/ Case Study / Merchandising
MBA Fashion Design	MBAFM-401	Entrepreneurship and Development	2016-17	Learn how to be an entrepreneurship
MBA Fashion Design	MBAFM-402	Visual Merchandising	2016-17	Visual aesthetics in business, Visual Merchandising – its evolution and its impact on Fashion business.
MBA Fashion Design	MBAFM-403	Project Management	2016-17	Analyzing sources of funds for rural development
MBA Fashion Design	MBAFM-404	Retail Management	2016-17	How retailer's differentiate their offering as an element in their corporate strategy
MBA Fashion Design	MBAFM-405	Advertising and Branding	2016-17	Analyse advertising and branding techniques and apply them to a variety of different issues
MBA Fashion Design		Summer internship project	2016-17	Internship Projects
MBA Fashion Design	MBAFM-302	Textile Science	2019-20	Analyze the social, cultural milieu and technological advancements as communicated by textiles
MBA Fashion Design	MBAFM-303	Elective - I Fashion Event Management	2019-20	Management techniques and strategies in the field of communication and brand image of the Fashion industry
MBA Fashion Design	MBAFM306	Export Merchandising	2019-20	Developing the expertise for appropriate selection of fabrics, trims and other materials keeping the design/style/market in perspective
MBA	MBAPM-403	Elective-II International Fashion	2019-20	Understanding & handling of clients, Getting best out of Global markets, Latest trend in quality control/Getting ready for final countdown
MBA Fashion Design	MFMRM-404	Elective-III B. Apparel Export Management	2019-20	Developing an understating towards export procedures & documentation. Imparting knowledge in the area of logistics. Enhancing benefits from exports by understanding foreign trade policy

Programme Name	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
M.Tech in Communication Signal Processing	MTCSP 3.2.2	Network Security and Cryptography	2019-20	Understand various Cryptographic Techniques Apply various public key cryptography techniques Understand the various Security Applications
M.Tech in Embedded system	MTES 3.1.2	Neural Networks & Fuzzy Logics	2019-20	Analyze the various feedback networks. Understand the concept of fuzziness involved in various systems and fuzzy set theory. Comprehend the fuzzy logic control and adaptive fuzzy logic and to design the fuzzy control using genetic algorithm. Analyze the application of fuzzy logic control to real time systems.
M.Tech in Control System Engineering	1MTCSE 1	Basic Control System	2016-17	It provides the desired response by controlling the output. The following figure shows the simple block diagram of a control system. Here, the control system is represented by a single block. Since, the output is controlled by varying input, the control system got this name.
M.Tech in Control System Engineering	1MTCSE 2	Systems Engineering	2016-17	systems engineering process involves the top-down development of a system's functional and physical requirements from a basic set of mission objectives. ... This should also include a set of documented interfaces to ensure compatibility of different parts of the system as they are developed
M.Tech in Control System Engineering	1MTCSE 3	Digital Control Systems	2016-17	It Provides control theory that uses digital computers to act as system controllers. Depending on the requirements, a digital control system can take the form of a microcontroller to an ASIC to a standard desktop computer.
M.Tech in Control System Engineering	1MTCSE 4.1	Real Time Instrumentation Techniques (Elective- I)	2016-17	It Provides knowledge and discussion on Real Time Instrumentation
M.Tech in Control System Engineering	1MTCSE 4.2	Power Electronics (E	2016-17	It Provides knowledge and discussion on Advance Power Electronics
M.Tech in Control System Engineering	1MTCSE 4.3	Linear System Theory (Elective- I)	2016-17	To analyze linear state-space systems in continuous- and discrete time (controllability, observability, reachability, stability. solve linear time-invariant state equations in continuous- and discrete time.
M.Tech in Control System Engineering	1MTCSE 4.4	Robot Dynamics & Control (Elective- I)	2016-17	To understand the robot dynamics, trajectory generation, motion planning, and nonlinear control, and develop real-time planning and control software modules for robotic systems.
M.Tech in Control System Engineering	1MTCSE 5	Writing Skills & Presentation-I	2016-17	Skill development
M.Tech in Control System Engineering	1MTCSE 6	Simulation Lab	2016-17	To understand and analyse the various case studies and simulation techniques
M.Tech in Control System Engineering	2MTCSE 1	Control Devices	2016-17	To understand and analyse the Control Devices
M.Tech in Control System Engineering	2MTCSE 2	Modern Control System	2016-17	To enable the students to synthesize linear controllers capable of satisfying a variety of stability and response criteria by using both classical and modern design techniques.
M.Tech in Control System Engineering	2MTCSE 3	Non-Linear And Adaptive Control	2016-17	To understand and analyse the Non-Linear And Adaptive Control

M.Tech in Control System Engineering	2MTCSE 4.1	Optimal And Robust Control (Elective- II)	2016-17	To understand and analyse the Optimal And Robust Control
M.Tech in Control System Engineering	2MTCSE1	Control Devices	2016-17	To enable the students to synthesize linear controllers capable of satisfying a variety of stability and response criteria by using both classical and modern design techniques.
M.Tech in Control System Engineering	2MTCSE2	Modern Control System	2016-17	To provide a knowledge of theory and design of multivariable linear time-invariant (LTI) control systems.
M.Tech in Control System Engineering	2MTCSE3	Non-Linear And Adaptive Control	2016-17	To know the common sources of measurement system variation and understand both Type A and Type B evaluations of measurement uncertainty
M.Tech in Control System Engineering	2MTCSE 4.2	Multi-Variable Control System (Elective- II)	2016-17	To provide a knowledge of theory and design of multivariable linear time-invariant (LTI) control systems.
M.Tech in Control System Engineering	2MTCSE 4.3	Measurement System & Error Analysis (Elective- II)	2016-17	To know the common sources of measurement system variation and understand both Type A and Type B evaluations of measurement uncertainty
M.Tech in Control System Engineering	2MTCSE 4.4	Power System Dynamics & Control (Elective- II)	2016-17	TO understand the concepts of synchronous machine modeling, reference frame transformation, automatic voltage regulation, power system stabilizer, transient stability for multimachine system, automatic generation control under deregulated environment.
M.Tech in Control System Engineering	2MTCSE 5	Writing Skills & Presentation-II	2016-17	Skill development
M.Tech in Control System Engineering	2MTCSE 6	Control System Lab	2016-17	To enable the students to synthesize linear controllers capable of satisfying a variety of stability and response criteria by using both classical and modern design techniques.
M.Tech in Control System Engineering	3MTCSE 1	Control Systems Design	2016-17	To enable the students to synthesize linear controllers capable of satisfying a variety of stability and response criteria by using both classical and modern design techniques.
M.Tech in Control System Engineering	3MTCSE 2.1	Drives and control (Elective- III)	2016-17	Find the interactive system block diagrams, reference designs and products you need to start designing the latest motor drive systems
M.Tech in Control System Engineering	2MTCSE5	Writing Skills & Presentation-II	2016-17	TO understand the concepts of synchronous machine modeling, reference frame transformation, automatic voltage regulation, power system stabilizer, transient stability for multimachine system, automatic generation control under deregulated environment.
M.Tech in Control System Engineering	2MTCSE6	Control System Lab	2016-17	To study about experiments on control system
M.Tech in Control System Engineering	3MTCSE1	Control Systems Design	2016-17	To know the common sources of measurement system variation and understand both Type A and Type B evaluations of measurement uncertainty
M.Tech in Control System Engineering	3MTCSE 2.2	Intelligent Control (Elective- III)	2016-17	To understand and design the fuzzy logic and artificial Neural Networks through case study or project based exercise. Analyze Genetic Algorithm system through case study and use and apply engineering tools to simulate various intelligent system.
M.Tech in Control System Engineering	3MTCSE 2.3	Digital Signal Processing (Elective- III)	2016-17	To identify the signals and systems (SO A), apply the principles of discrete-time signal analysis to perform various signal operations (SO A, E)
M.Tech in Control System Engineering	3MTCSE 2.4	Microprocessor Based Control System (Elective- III)	2016-17	To understand and analyse the Control Devices
M.Tech in Control System Engineering	3MTCSE3	Advance Control System Lab	2016-17	To understand and analyse the Control Devices in respect to recents trends developments

(Prof. D K Math) Registrar
Jodhpur National University
Jaipur

M.Tech in Computer Science Engineering	3MTCSE4	Dissertation Part -I	2016-17	Skill development
M.Tech in Computer Science Engineering	4MTCSE1	Dissertation Part-II	2016-17	Skill development
M.Tech Industrial and Production Engineering	1MTIPE2	Metal Forming	2017-18	Understand the different types of defects, causes and apply their remedial measures in metal forming processes.
M.Tech Industrial and Production Engineering	1MTIPE3	Metrology And Industrial Inspection	2017-18	Students can choose appropriate method and instruments for inspection of various gear elements and thread elements
M.Tech Industrial and Production Engineering	1MTIPE4	Industrial Engineering Systems	2017-18	Develop skills in students to draw upon the fundamental knowledge, skills, and tools of Industrial engineering to develop scale-appropriate system-based engineering solutions that satisfy constraints imposed by a global society.
M.Tech Industrial and Production Engineering	1MTIPE5	Total Quality Management	2017-18	Understand the use of use of several techniques and quality management tools
M.Tech Industrial and Production Engineering	1MTIPE6	Manufacturing Lab	2017-18	Understand and analyze the concept of yield criteria applicable to different material deformation processes.
M.Tech Industrial and Production Engineering	2MTIPE1	Advanced Optimization Techniques	2017-18	Unconstrained non linear optimization problems Constrained nonlinear optimization problems Artificial neural net work
M.Tech Industrial and Production Engineering	2MTIPE2	Advanced Computer Integrated Manufacturing System	2017-18	Analyze and Design appropriate automated assembly systems. Apply Computer aided process planning, MRP and CNC part programming
M.Tech Industrial and Production Engineering	2MTIPE3	Machine Tool Design	2017-18	Demonstrate the inter-relationship between cutting parameters and machining performance measures like power requirement, cutting time, tool life and surface finish Analyze economics of machining operations
M.Tech Industrial and Production Engineering	2MTIPE4	Supply Chain Management	2017-18	Understand the role of aggregate planning, inventory, IT and coordination in a supply chain
M.Tech Industrial and Production Engineering	2MTIPE5.1	Human Resource Development & Industrial Relations	2017-18	To have an understanding of the basic concepts, functions and processes of human resource development. To be able to shape ethical behaviour of employees through right policies.
M.Tech Industrial and Production Engineering	2MTIPE6	Cam Lab & Cad Lab	2017-18	Practicals based on designing of 3D CAD model and simulation. Working on CNC Lathe and CNC Milling machine.
M.TECH.(CSE)	3MTCSE3	Advance Control System Lab	2016-17	To identify the signals and systems (SO A), apply the principles of discrete-time signal analysis to perform various signal operations (SO A, E)
M.TECH.(CSE)	3MTCSE4	Dissertation Part -I	2016-17	Design of project, contents & layout of the report,presentation.
