It Integration and Reforms Procedures and Processes

The University is committed to maintain the highest standards of academic integrity in the assessment/examination procedures in accordance with the standards and principles established. The University follows Continuous Internal Evaluation where student is assessed through various components, which provides ample opportunity to the students to enhance their learning. As a part of the quality initiatives and improvement in the examination management, several reforms including IT integration have been introduced to make the system robust and transparent.

As per the program specific requirement, more flexibility has been introduced in teachers' assessment through concept note with emphasis on activity based learning (especially in human values and environmental science), case studies, field work and assessment through application based assignments etc. To inculcate problem solving approach, critical thinking ability among students, assessment through seminar, presentation has also been introduced.

Examination Cell is utilizing all modules provided in the system which include uploading of examinationscheme for all programs, uploading of examination schedule, generation of examination hall admit cards,uploading of internal and end term examination marks of students, and processing and generation of gradecards. There is automatic compilation of internal assessment and semester end examination marks for theaward of grades.

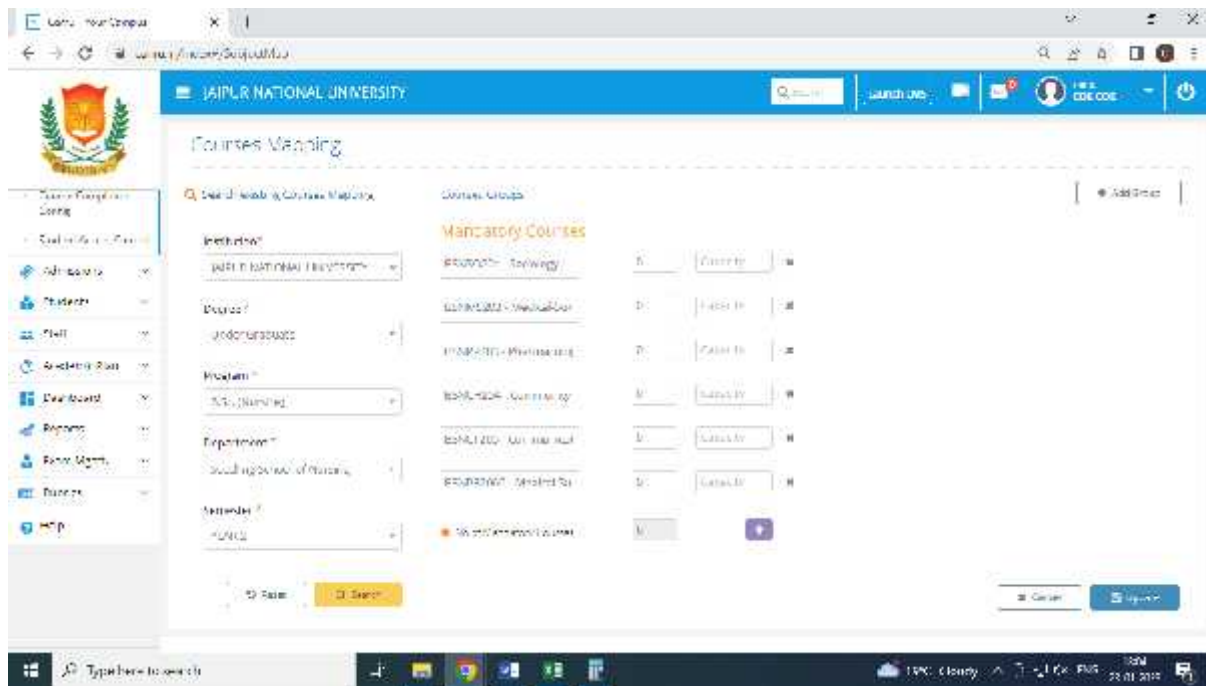

Generation of tabulation register (TR) on ERP has helped in saving time, and stationary.

The tabulation register provides all relevant data of results for future use also as large number of reports can be generated from the system. There is also a provision of application based issuance of provisional certificate and transcript to students. Students are given access to ERP to upload their data for online registration and submission of examination form, payment of examination fee, admit cards for end term examination. They can also view their internal assessment component and end term grades for all courses.

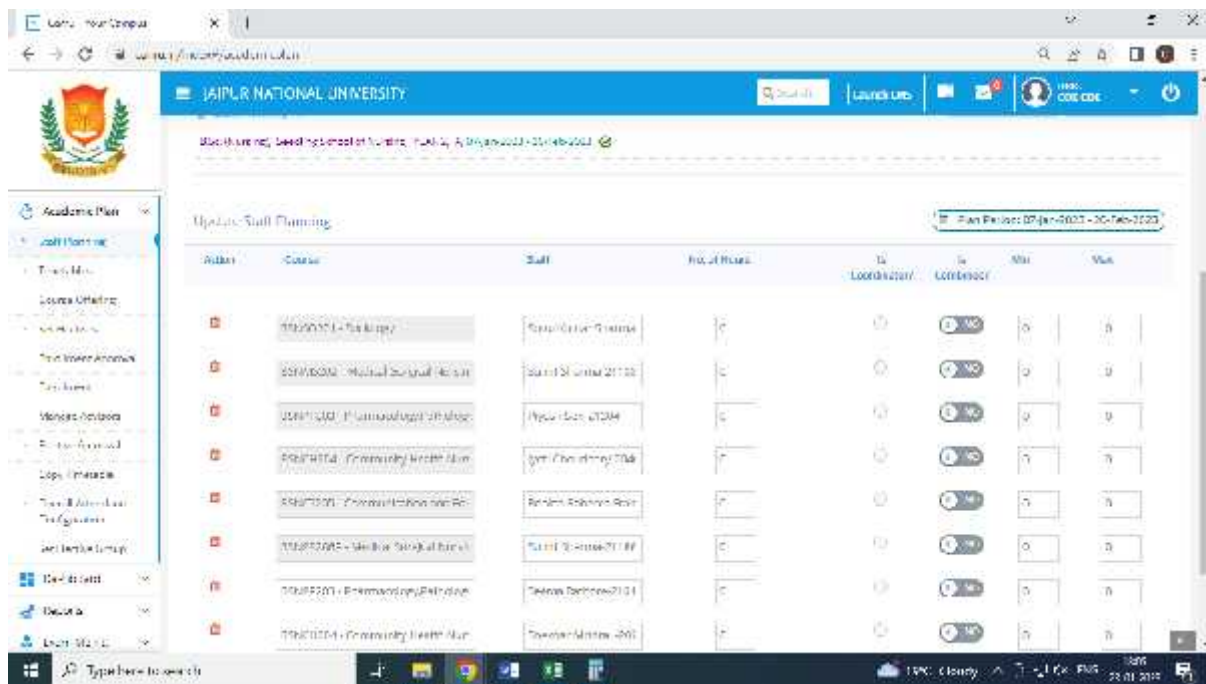

The faculty members have access to upload all component of continuous internal assessment and mid-term test marks. After freezing of these components same data are utilized by the examination cell to compile and process the end term examination results. The reforms on use of IT integration procedures have reduced the duration of results declaration. Complete processing of the result has been automated which resulted in the display of results in student Ids. With reduced manual intervention, chances of human error have also become negligible and led to improved working efficiency with minimum usage of stationary.

The step by step screen short of the implantation procedure is attached below.
